BOARD OF RETIREMENT.

ELMER A. STEVENS, Chairman.
CARL A. RAYMOND.
CHARLES A. ANDREWS.

The Commonwealth of Massachusetts.

REPORT.

OFFICE OF THE BOARD OF RETIREMENT, STATE HOUSE, BOSTON, Jan. 15, 1913.

To the Honorable Senate and House of Representatives.

By the enactment of chapter 532 of the Acts of the year 1911 the General Court provided a retirement system for employees in the service of the Commonwealth and of the metropolitan district. Previously there had been established pension or retirement systems for specific classes of persons in the service of the Commonwealth, - for judges, for veterans of the civil war, for certain persons employed at the prisons and reformatories, and for the metropolitan park and the district police officers. The act of 1911 was the first retirement act of general scope, and by its terms it affected a maximum number of some 6,200 persons. The general scheme upon which this law is constructed is that upon completion of not less than thirty-five years of continuous service any employee may retire at will; that upon the completion of not less than fifteen years of continuous service any employee may retire or may be retired upon reaching the age of sixty years; and that every employee in the Retirement Association, upon reaching the age of seventy years, shall be retired.

There is deducted from the salary or wages of every member of the Retirement Association, as often as it is paid to him, an amount not less than 1 per cent. nor more than 5 per cent. of his salary or wages up to \$30 per week. The amounts so deducted, with their earnings, form a fund which at the retirement of the individual purchases for him an annuity, the amount of which is determined by a mortality table. At his

retirement, also, the Commonwealth gives him a pension equal to the annuity which his contributions have purchased. The annuity and pension are paid together, monthly, by the State Treasurer during the life of the annuitant. The law provides a maximum retirement allowance of one-half of the average pay received during the ten years preceding retirement, and a minimum allowance of \$200 a year.

With reference to those persons in the employ of the Commonwealth at the time the law took effect, many of whom had given many years to the service, the law as originally enacted and as amended by chapter 363 of the Acts of the year 1912 provides that the amount of the retirement allowance shall be the same as though the act had been in effect during the whole of their service, and they had been contributing to the retirement fund during all the years of their employment. In other words, the person entering the service after the law went into effect will, upon retirement, receive an annuity purchased in full by his contributions and a pension of like amount given him by the Commonwealth; the person already employed at the time the law went into effect will receive, upon retirement, if he elected to become a member of the Retirement Association, a pension equal to an annuity such as would have resulted from his contributions if he had contributed during the whole period of his service, and a further pension of like amount. In the case of this latter class of employees the whole of the pension and a part of the pension annuity, greater or less, depending upon the length of prior service, will be given by the Commonwealth.

By the terms of the law, all permanent employees entering the service after it went into effect become members of the Retirement Association, and contribute to the annuity fund. To every employee in the service on Jan. 1, 1912, the law gave a choice as to whether he would become a member of the association by providing that every employee should become a member unless, not later than Jan. 31, 1912, he, in writing, informed the Insurance Commissioner of his desire not to be included in the membership.

On Jan. 1, 1912, there were eligible to membership in the association some 6,200 employees. On Feb. 1, 1912, 2,874 indi-

viduals had declined to become members and 3,324 were members of the Retirement Association. The total number of eligible employees in the service of the State and metropolitan departments on Jan. 1, 1912, was 1,258. Of these, 924, or over 72 per cent., became members. In the institutions there were eligible 4,940 persons. Of these, 2,400, or about 49 per cent., became members. It is worthy of note that in the departments where civil service tenure holds the percentage of membership is large, while in the institutions where tenure is less secure. slightly less than half of the employees entered the Retirement Association. One other factor besides uncertainty of tenure is likely to have had its effect upon the employees in their decision as to whether or not they should become members, — that is, their failure to secure a clear understanding of the effect upon them of membership in the association. Circulars had been sent out and an earnest attempt had been made to present to every employee the essential facts as to the retirement system. There is evidence that many individuals failed to get a clear understanding, however, and thus declined membership which they ought to have accepted for their own best interests. tion is likely to arise as to whether these employees ought not to be given another opportunity to become members. The Board of Retirement does not now make any recommendation upon this point for the reason that its members are firmly of the opinion that no substantial changes in the law are advisable until a somewhat more extended trial of it has been had.

One other feature of the law worthy of mention is its provision that if an employee leaves the service before reaching the retirement age there shall be paid back to him, or his estate, the amount of money actually contributed by him, with interest.

The administration of this law was placed in the hands of a Board of Retirement composed of the Treasurer and Receiver-General, ex officio, a member of the association elected by members, and a third person chosen by these two. The duty of conducting an election was placed upon the Insurance Commissioner, who gave to the members of the association an opportunity to send in their ballots by mail. In the month of February, 1912, the association thus elected, as the second member of the

Board, Mr. Carl A. Raymond, second Deputy Auditor, and the membership of the Board was completed by the selection as its third member of Mr. Charles A. Andrews, the Deputy Tax Commissioner.

In general, the law is but a skeleton. The Board of Retirement is authorized to make such rules and by-laws as may be necessary, not inconsistent with the provisions of the act. problems of administration confronting the Board were many: most of them were difficult, because there was no available experience in other States upon which reliance could be placed. As rapidly as possible, however, the policy of the Board was established, and the details of office organization were settled. The retirement system became fully operative on June 1, 1912, and from all salaries or wages accruing to members of the association after that date deductions were made. One of the most perplexing questions to be determined was the rate of deduction. The law provided that it should be not less than 1 nor more than 5 per cent. of the salary or wages, not exceeding \$30 a week. It appeared to be impossible to establish any general plan of percentages which should accomplish the same proportionate retirement allowance for all members, since there was no information as to ages upon which employees would retire. After many weeks of consideration the Board determined that each employee should contribute 3 per cent. of his cash salary or wages, unless he should elect to contribute 5 per cent., and every member was given one month in which to exercise his choice. The number of those electing to contribute 5 per cent. was 1,074.

In every case where the member is paid his salary directly by the Treasurer and Receiver-General the amount of the deduction is figured in the office of the Board of Retirement and the deduction from his pay is made by the Treasurer. In cases where salaries or wages are paid by some disbursing officer, as in the institutions, the deductions are figured and are made by such officer, who reports his doings regularly to the Board and who sends to it his check covering the amount of the deductions he has made. The clerical staff of the Board of Retirement reviews in detail all work thus performed by the different disbursing officers, and the Board has in its office at all times

a full exhibit of the account of each member of the association. The number of separate deductions thus made by the clerks of the Board and by the disbursing officers at the institutions is about 3,300 each month. The total amount of money deducted from the pay of members of the association between June 1 and Nov. 30, 1912, is \$47,500.76. Twelve members have died and 327 have left the service since June 1; the amount of refunds in these cases has been \$1,365.94.

On June 1, when the retirement system became operative, 27 persons retired. Twenty-four of these had reached age seventy and thus were compelled to retire, and 3, being more than sixty years of age, retired at their own election. Since June 1, 18 other persons have retired, 1 of whom had reached age seventy. The total amount of the retirement allowances paid to the 45 individuals who have retired previous to December 1 is \$5,353.78. The largest single annual allowance is \$743.33, and 24 individuals are receiving the minimum allowance of \$200 a year. The length of service performed by those who have retired varies, but it is interesting to note that one individual had given fifty-five years of his life, and another forty-seven years, to the service of the Commonwealth.

The Board has established a system of reimbursement to the institutions whose disbursing officers perform services in the matter of deductions, and at the close of the fiscal year had paid to such institutions a total amount of \$1,102.99. This item is much smaller than would be the cost of hiring clerks of our own to visit the institutions and there perform the necessary work. Reimbursement was considered wise in order that. so far as possible, the cost of operating the retirement system may at all times be in evidence. The estimate made by the special commission which investigated the whole matter of a retirement system three years ago was that the annual cost of its administration, exclusive of retirement allowances, would be \$25,000. It is gratifying to be able to report, therefore, that for the part year in which it has been in operation the total administration expenses have been only \$5,082.66, and that for the full fiscal year of 1913 the Board asks for only \$8,500.

As to the cost for retirement allowance it is, of course, too early to make definite statements. The Board has asked for

an appropriation for this purpose of \$32,000, which is the best estimate it can make. The uncertainty in this matter is due to the fact that any employee may retire at will any time after completing fifteen years of service and attaining age sixty. Our experience is not vet sufficiently extensive to justify any very definite conclusions as to the rapidity of such retirements: neither is it possible yet for the Board to set forth any conclusions as to the effect of this retirement system upon the service as a whole. It is significant, however, that no head of a department or institution has asked for the retirement of a single individual. It is possible, of course, that there are no employees under age seventy, and yet eligible to retirement, who have so far become inefficient that the good of the service requires their retirement. It is scarcely to be believed, however, that this rule holds true among 3,300 employees. The spirit of the law appears to be that heads of departments and institutions shall request the Board of Retirement to retire such as have become unable to perform efficient service. The Board intends to consider this aspect of the matter at an early date, and to call it specifically to the attention of executive officers of the Commonwealth, since the Board believes that the law will fail of its full purpose if it does not help to produce an improved service as well as afford assistance to those individuals who retire under its provisions.

RECOMMENDATIONS OF THE STATE BOARD OF RETIREMENT.

Clause (b) of the second paragraph of section 8 of chapter 532 of the Acts of 1911 provides that if a member of the Retirement Association dies before becoming entitled to a pension, there shall be paid back to his legal representatives such contributions as he has made to the retirement system.

It has already happened, and presumably may frequently happen in the future, that no administrator or executor is appointed to care for the estate of such a deceased person, the reason being that the estate is of such small value that to put it through the probate court would cost more than the proceeds of the whole estate.

The Attorney-General has informed us that the term "legal

representatives" as used in this clause can mean nothing more than the executor or administrator. To compel the appointment of an executor or administrator of these small estates for the purpose of receiving refunds from the retirement fund would be a hardship. We therefore ask authority to provide for the payment of small sums as they become due to interested persons other than the legal representatives of the estate, and we have submitted a bill designed to accomplish this.

LAW RELATING TO BOARD OF RETIREMENT.

Chapter 532, Acts of the Year 1911, as amended by Chapter 363, Acts of the $\gamma_{\rm EAR}$

AN ACT TO ESTABLISH A RETIREMENT SYSTEM FOR THE EMPLOYEES OF THE COMMONWEALTH.

Section 1. In this act, unless the context otherwise requires: —

- (a) The words "retirement system" mean the arrangements provided in this act for the payment of pensions.
- (b) The word "annuities" means the payments for life derived from money contributed by the employees.
- (c) The word "employees" means permanent and regular employees in the direct service of the commonwealth or in the metropolitan district service, whose only or principal employment is in such service.
- (d) The word "pensions" means the payments for life derived from money contributed by the commonwealth.
- (e) The words "regular interest" mean interest at three per cent per annum compounded semi-annually on the last days of December and June, and reckoned for full three and six months' periods only.
- (f) The words "continuous service" mean uninterrupted employment, with these exceptions: a lay-off on account of illness or reduction of force, and a leave of absence, suspension or dismissal followed by reinstatement within one year. As to appointees of the sergeant-at-arms the interval between sessions of the general court shall not be considered as breaking the continuity of service.

In the case of employees of any department or institution formerly administered by a city, county or corporation and later taken over by the commonwealth, service rendered prior to such transfer shall be counted as a part of the continuous service for the purposes of this act.

ESTABLISHMENT OF RETIREMENT SYSTEM.

Section 2. The retirement system shall be established on the first day of January or the first day of July following the expiration of three months after the date on which this act takes effect.

THE RETIREMENT ASSOCIATION.

- SECTION 3. A retirement association shall be organized among the employees of the commonwealth, including employees in the metropolitan district service, as follows:
- (1) All employees of the commonwealth, on the date when the retirement system is established, may become members of the association. On the expiration of thirty days from said date every such employee shall be considered to have elected to become, and shall thereby become, a member, unless he shall have within that period, sent notice in writing to the state insurance commissioner that he does not wish to join the association.
- (2) All employees who enter the service of the commonwealth after the date when the retirement system is established, except persons who have already passed the age of fifty-five years, shall upon completing ninety days of service become thereby members of the association. Persons over fifty-five years of age who enter the service of the commonwealth after the establishment of the retirement system shall not be allowed to become members of the association, and no such employee shall remain in the service of the commonwealth after reaching the age of seventy years.
- (3) No officer elected by popular vote may become a member of the association, nor any employee who is or will be entitled to a pension from the commonwealth for any reason other than membership in the association.
- (4) Any member who reaches the age of sixty years and has been in the continuous service of the commonwealth for a period of fifteen years immediately preceding may retire or be retired by the board of retirement upon recommendation of the head of the department in which he is employed, and any member who reaches the age of seventy must so retire.
- (5) Any member who has completed a period of thirty-five years of continuous service may retire, or may be retired at any age by the board of retirement upon recommendation of the head of the department in which he is employed, if such action be deemed advisable for the good of the service.
- (6) Employees who are paid partly by the commonwealth and partly by a county having a retirement system shall be enrolled as members of the state retirement association. Such employees shall be assessed on their full wages or salaries and the assessments on the part of such wages or salaries paid by the county shall be deducted by the treasurer of the county and turned over by him

to the retirement association fund of the commonwealth. When any such employee is retired under the provisions of this act the treasurer of the commonwealth shall be reimbursed out of the treasury of the county for a part of the pension payments to such employee equivalent to the amount of the annuity payable on the assessments on that part of his wages or salary paid by the county which was deducted and turned over to the retirement association fund of the commonwealth in the manner hereinbefore provided.

THE BOARD OF RETIREMENT.

- (1) The management of the retirement system is hereby vested in the board of retirement, consisting of three members, one of whom shall be the state treasurer; the second member shall be a member of the association elected by the latter within sixty days after the date on which the retirement system is established, in a manner to be determined by the state insurance commissioner; the third member shall be chosen by the other two members. In case of the failure of the latter to choose the third member within thirty days after the election of the second member, the governor shall appoint the third member. The first person so chosen or appointed as third member shall serve for two years; otherwise and thereafter the term of office of the two elected members shall be three years. On a vacancy occurring in the board for any cause or on the expiration of the term of office of any member, a successor of the person whose place has become vacant or whose term has expired shall be chosen in the same manner as his predecessor
- (2) The members of the board of retirement shall serve without compensation; but they shall be reimbursed out of the contingent fund for any expense or loss of salary or wages which they may incur through service on the board. All claims for reimbursement on this account shall be subject to the approval of the governor and council.
- (3) The state treasurer shall have charge and control of the funds of the system, subject to the approval of the board of retirement, and shall invest and reinvest the same, and may from time to time sell any securities held by him and invest and reinvest the proceeds, and any and all unappropriated income of said funds: provided, however, that all funds received by him, and not required for current disbursements, shall be invested in accordance with the provisions of the laws of this commonwealth relating to the investment of the funds of savings banks. He shall in the investment

of the funds give preference to the securities that are legal for the investment of the sinking funds of the commonwealth. He may, whenever he sells such securities, deliver the securities so sold upon receiving the proceeds thereof, and may execute any and all documents necessary to transfer the title thereto.

- (4) The board of retirement shall have power to make by-laws and regulations not inconsistent with the provisions of this act, and to employ such clerical or other assistance as may be necessary for the fulfillment of its purposes, subject to the approval of the governor and council.
- (5) The board shall determine the percentage of wages or salary that employees shall contribute to the pension fund, subject to the minimum and maximum percentages, and shall, furthermore, have the power to classify employees for the purposes of the retirement system and to establish different rates of contribution for different classes within the prescribed limits.
- (6) The state treasurer shall, in January of each year, unless for cause the insurance commissioner shall have granted an extension of time, file in the office of the insurance commissioner a sworn statement, which shall exhibit the financial condition of the retirement system on the thirty-first day of the preceding December, and its financial transactions for the year ending with said day. The said statement shall be in a form approved by the insurance commissioner, and shall show, among other things, the liability of the retirement system on account of the following items:—

A. Deposit Reserves.

The total of the deposits of the members actually received by the treasurer or due from the commonwealth under section five, (2) A, and held subject to withdrawal by such members.

B. Interest Reserve.

Regular interest on such deposits.

C. Annuity Reserve.

The net value of the annuities entered upon under section six, (2) B, on the basis of the mortality tables and interest rates provided for in this act.

D. Expense and Contingent Fund.

- (a) The unexpended portion of the amounts received under section five, (1).
 - (b) The contingent fund.

E. Gifts and Bequests.

The amounts received as gifts or bequests and held under the terms of such gifts or bequests.

F. Other Liabilities.

All other liabilities.

· G. Surplus.

- (a) Annuity Surplus. The undistributed surplus arising from annuity deposits.
 - (b) Other Surplus. All unassigned funds.

CREATION OF THE RETIREMENT FUND.

SECTION 5. The funds of the retirement system shall be raised as follows:—

(1) Expense and Contingent Fund.

The general court shall appropriate annually such an amount as may be necessary to defray the whole expense of administration, according to estimates prepared by the treasurer.

(2) Annuity and Pension Fund.

- A. Deposits by Members. Each member shall deposit in this fund from his salary or wages, as often as the same are payable, not less than one per cent and not more than five per cent of the amount of his wages or salary, as determined by the board of retirement under the provisions of section four (5): provided, however, that employees who receive more than thirty dollars weekly in salary or wages shall not be assessed for contribution to this fund on the excess above that amount.
- B. Contributions of the Commonwealth. (a) Each month the commonwealth shall contribute such amount as the board of retirement may determine to be necessary to pay current pensions for subsequent service, under section six, (2) C (a).
- (b) Each year, in January, the commonwealth shall contribute an amount equal to the surplus arising from annuity deposits. In case there should be a deficiency arising from such annuity deposits, instead of a surplus, then the commonwealth shall make good the deficiency.
- (c) Each month the commonwealth shall contribute such amount as the board of retirement may determine to be necessary to pay current pensions for prior service under section six, (2) C (b).

(d) Each month the commonwealth shall contribute such amount as the board of retirement may determine to be necessary to ensure the minimum payments provided for in section $\sin E$.

(3) Provision for Payments.

All amounts payable by members of the association under paragraph (2) A of this section shall be deducted by the commonwealth from the amounts payable to them as salary or wages, as often as the same are payable, and shall immediately be credited to the retirement fund by the state treasurer.

DISTRIBUTION OF FUNDS.

SECTION 6. The state treasurer shall administer the funds of the pension system in accordance with the following plan:—

(1) Expense and Contingent Fund.

The fund provided for by section five, (1), shall be used, so far as may be necessary, for the payment of the expenses of administration. The portions not so used, if any, shall be repaid into the treasury of the commonwealth. In case the amount appropriated for the expense of a contingent fund in any year should prove insufficient, the commonwealth shall appropriate in the following year such additional sum as may be required to cover the deficit.

(2) Annuity and Pension Funds.

- A. Refunds. (a) Should a member of the association cease to be an employee of the commonwealth for any cause other than death before becoming entitled to a pension, there shall be refunded to him all the money paid in by him under section five, (2) A, with regular interest.
- (b) Should a member of the association die before becoming entitled to a pension, there shall be paid to his legal representatives all the money paid in by him under section five, (2) A, with such interest as shall have been earned on such deposits.
- B. Annuities from Employees' Deposits.—Any member who reaches the age of sixty years and has been in the continuous service of the commonwealth for fifteen years immediately preceding, and then or thereafter retires or is retired, any member who retires or is retired at the age of seventy years, and any member who is retired for the good of the service under the provisions of section three, (5), shall receive an annuity to which the sum of his de-

posits under section five, (2), with regular interest, shall entitle him, according to the tables adopted by the board of retirement, in one of the following forms:—

- (a) A life annuity, payable monthly.
- (b) A life annuity, payable monthly, with the provision that in the event of the death of the annuitant before receiving payments equal to the sum, at the date of his retirement, of his deposits under section five, (2) A, with regular interest, the difference shall be paid to his legal representatives.
- \hat{C} . Pensions derived from Contributions by the Commonwealth. (a) Pensions based upon subsequent service. Any member entitled to an annuity under paragraph (2) B of this section shall receive in addition thereto a pension for life payable monthly equivalent to that annuity, to be paid out of the fund contributed by the commonwealth under the provisions of section five, (2) B (a).
- (b) Pensions based upon prior service. Any member of the association who reaches the age of sixty years, having been in the continuous service of the commonwealth for fifteen years or more immediately preceding, and then or thereafter retires or is retired, and any member who completes thirty-five years of continuous service and then or thereafter retires or is retired, shall receive in addition to the annuity and pension provided for by paragraphs (2) B and C (a) of this section, an extra pension for life as large as the amount of the annuity and pension to which he might have acquired a claim if the retirement system had been in operation at the time when he entered the service of the commonwealth, and if accordingly he had paid regular contributions from that date to the date of the establishment of the retirement association at the same rate as that first adopted by the board of retirement, and if such deductions had been accumulated with regular interest.

In the case of employees who are paid partly by the commonwealth and partly by a county having a retirement system, or who have rendered service in the past both for the commonwealth and for such county, all of the continuous service rendered by any such employee either for the commonwealth or for the county before the establishment of the retirement system shall be counted as part of the prior service for the purposes of this act.

In the case of members of the association related as husband and wife, if one of the two retires or is retired the other shall have the right also to retire, and shall be paid a retiring allowance proportionate to the amount of his or her accumulated contributions to date, or, in case the allowance thus calculated is less than the minimum allowance of two hundred dollars hereinafter provided for, shall be paid that sum annually.

If the accumulated contributions of any employee retired under the provisions of this act exceed the amount required to provide an annuity equal to one fourth of the average wages or salary of such employee during the last ten years prior to his retirement, the excess above that amount shall be paid to such employee in a lump sum with the first monthly payment on the account of his retiring allowance.

Any employee who had already reached the age of fifty-five years on the date when the retirement system was established, and also became a member of the association may be retired under the provisions of the preceding paragraph [intending to refer to paragraph (2) C (b) of section 6] without having completed the otherwise required service period of fifteen years. For the purpose of computing any pension payable for prior service, the board of retirement may estimate on the basis determined by them the wages received at any period for which they may deem it impracticable to consult the original records.

Any employee not a member of the association who had already reached the age of fifty-five years on the date when the retirement system was established may be retired at any time and shall be paid a pension equivalent to the minimum payment hereinafter provided for.

- D. Application of Surplus. The board of retirement shall have power to determine the application of any surplus, as defined under section four, (6) G, subject to the approval of the insurance commissioner.
- E. Minimum and Maximum Payments. In no case shall the total monthly payment to a member be at a rate less than two hundred dollars per year, or at a rate more than one half the amount of the average salary or wages received by the member during the ten years prior to his retirement.
- F. Association Membership and Pension Certificate. Membership in the association shall be evidenced by a certificate to be issued to each member by the board of retirement, and the right to an annuity or a pension shall be evidenced by a policy to be issued to each member who retires or is retired by the board of retirement.

TAXATION, ATTACHMENTS AND ASSIGNMENTS.

Section 7. The funds of the retirement system, so far as they are invested in personal property, shall be exempt from taxation.

That portion of the wages of a member deducted or to be deducted under this act, the right of a member to an annuity or pension, and all his rights in the funds of the retirement system shall be exempt from taxation, and from the operation of any law relating to bankruptcy or insolvency, and shall not be attached or taken upon execution or other process of any court. No assignment of any right in or to said funds shall be valid.

SUPERVISION BY INSURANCE COMMISSIONER.

Section 8. The insurance commissioner shall prescribe for the retirement system of the commonwealth one or more mortality tables, and shall determine what rates of interest shall be established in connection with such tables, and may later modify such tables or prescribe other tables to represent more accurately the expense of the retirement system, or may change said rates of interest and may determine the application of the changes so made. He shall also prescribe and supervise the methods of bookkeeping of the retirement association formed under the provisions of this act.

The insurance commissioner shall at least once in each year, either personally or by deputy or assistant, thoroughly inspect and examine the affairs of the retirement association to ascertain its financial condition, its ability to fulfill its obligations, whether all parties in interest have complied with the provisions of law applicable to the retirement association, and whether the transactions of the board of retirement have been in accordance with the rights and equities of those in interest. The retirement system shall be credited, in the account of its financial condition, with the amounts due from the commonwealth, under the provisions of section five, (2) B (a), its investments having fixed maturities upon which the interest is not in default at amortized values, and its other investments at a reasonable valuation.

For the purposes aforesaid, the insurance commissioner or other persons making examination shall have access to all the securities, books and papers of the retirement system, and may summon and administer oaths and examine as witnesses the members of the board of retirement or any other person relative to the financial affairs, transactions and condition of the retirement system. The insurance commissioner shall preserve in a permanent form a full record of the proceedings at such examination, and the results thereof. Upon the completion of such examination, verification and valuation, the insurance commissioner shall make a report in writing of his findings to the board of retirement, and shall send a copy thereof to the governor and the executive council of the commonwealth.

Section 9. If, in the judgment of the insurance commissioner, the commonwealth or the board of retirement has violated or neglected to comply with any of the provisions of this act, or of the rules and regulations established by the board of retirement hereunder, he shall give notice thereof to the governor of the commonwealth and to the board of retirement, and thereafter if such violation or neglect continues shall forthwith present the facts to the attorney-general for his action.

Section 10. The superior court shall have jurisdiction in equity upon petition of the insurance commissioner or of any interested party to compel the observance and restrain the violation of this act, and of the rules and regulations established by the board of retirement hereunder.

SECTION 11. This act shall take effect upon its passage.

REPORT

OF THE

BOARD OF RETIREMENT.

JANUARY, 1914.

WRIGHT & POTTER PRINTING CO., STATE PRINTERS, 32 DERNE STREET.

1914.

APPROVED BY
THE STATE BOARD OF PUBLICATION.

BOARD OF RETIREMENT.

ELMER A. STEVENS, Chairman.
CARL A. RAYMOND.
CHARLES A. ANDREWS.

The Commonwealth of Massachusetts.

Board of Retirement, State House, Boston, Jan. 13, 1914.

Hon. Grafton D. Cushing, Speaker of the House of Representatives.

DEAR SIR: — I transmit to you herewith for the use of the Legislature the annual report of the Board of Retirement for the year ending Nov. 30, 1913.

Respectfully yours,

ELMER A. STEVENS,

Chairman, Board of Retirement.

The Commonwealth of Massachusetts.

REPORT.

Board of Retirement, State House, Boston, Jan. 15, 1914.

To the Honorable Senate and House of Representatives.

By the enactment of chapter 532 of the Acts of the year 1911 the Commonwealth established a retirement system for her employees not included in retirement or pension systems previously established. This act went into full effect on June 1, 1912. The report submitted by the Board of Retirement last year, therefore, covered a period of operation of only six months. The report now submitted covers a full year and affords the first review upon which can be based any reasonable conclusions as to the probable future development of the retirement system and of its scope and cost.

On Dec. 1, 1912, there were 3.121 members of the Retirement Association. On Dec. 1, 1913, there were 4,020 members. During the year 1,522 individuals have joined the association and 589 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 34 have been retired, 8 by reason of reaching the age of seventy years, and 26 at their own request, at the age of sixty or over. In addition to those, retirement allowances have been voted to 2 employees who had declined membership in the association but who were, nevertheless, eligible to retirement upon the minimum allowance of \$200. By chapter 310 of the Acts of 1913 there was extended to those in the service on Jan. 1, 1912, who had declined membership in the association, another opportunity to join the association at any time previous to Jan. 1, 1914. This legislation was not requested by the Board of Retirement, although the matter was discussed in its last annual report. Many had declined membership because of a failure to appreciate the requirements, benefits and obligations of membership. By virtue of this act 160 have joined the association; of these, 93 are employed at the institutions and 67 in the State or metropolitan departments. The membership of the association was increased 1,362 by the compulsory entrance of employees who have entered the service since Jan. 1, 1912, and, who had, during the past year, completed a probationary period and have thus become "permanent and regular" employees within the meaning of the law. By deducting from this number the number of those who have died, who have resigned and who have been retired we find an increase in membership of 739. This indicates with considerable accuracy the expansion of the State service during the past year.

Since the law became operative on June 1, 1912, 81 employees have been retired, of whom 36 were retired during the past year; 6 annuitants have died since retirement so that retirement allowances are now being paid to 75 former employees. Of this number 27 were retired at the age of seventy, and 48 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1913, as pensions was \$17,576.31; the largest yearly amount payable to any individual was \$905.14; the number of those who received the maximum retirement allowance, *i.e.*, one-half of the average of salary for the ten years preceding retirement, was 19; and the average annual retirement allowance paid to the whole number who benefited by the system during the year was \$290.52.

The funds of the association have increased from \$47,500.76 on hand Dec. 1, 1912, to \$151,426.93 one year later. No distribution of surplus to the individual accounts has been made, since the accrued surplus is too small to divide satisfactorily among more than 4,000 participants.

The essential facts as to the membership and the finances of the Retirement Association appear in the following tables:—

It can be seen that the retirement system is now fully established; that it covers a large percentage of employees: that it both makes possible and necessary retirement from the service at a time when inefficiency is likely to be in evidence: and also it affords to those retired, at least in part, a living income. There is in the law no general disability clause allowing the retirement of any individual before he has become sixty vears of age. The Board has not specifically studied the matter of the probable effect of the insertion of such a provision. though it has heard of individual cases where persons are kept in the service though largely incapacitated, apparently because of the real hardship which would follow dismissal. If the retirement system exists chiefly for the benefit of the service. as we believe it does, the question of retirement for disability is likely to arise at any time, and will in our judgment merit careful consideration.

In other pension systems it is claimed to have been found that because of approaching retirement certain employees have relaxed their efforts for good service in the belief or knowledge that even so they will be continued in the service until the retirement age arrives. No evidence of such a situation among the members of the Retirement Association has been brought to our attention. It is not likely to exist in the class of employees in most of the departments and institutions for the reason that such habits of attention and effort as have been formed by long years of employment must in general have a compelling force upon their possessors, and because in general there is an excellent standard of discipline in the several departments and institutions.

The retirement system established by chapter 532 of the Acts of 1911 is not the only pension system affecting State employees. For the judges, members of the metropolitan park police, members of the district police, prison officers and instructors, and for veterans of the civil war in the State service separate pension systems have been established and are in operation. In none of these systems does the contributory principle prevail; in each of them retirement upon half pay or more is possible upon the reaching of a stated age or upon the completion of a stated period of service;

in some of them retirement for disability is possible; and in at least one there is provision for a pension to the widow and young children of the deceased employee who loses his life in the performance of his duty. The following table shows the amounts paid by the Commonwealth during the past year to pensioners under each of those five systems, the number of persons in each system who receive the pensions, together with similar figures for the Retirement Association.

¹ Includes veterans, Massachusetts Soldiers' Home.

The figure at the right of each column in parentheses shows the number of individual pensions paid under each system; "Under chapter 532," the figures represent only the amount paid by the State; the annuities paid from members' contributions are not included.

According to the best information we can secure there are now in the service in the five preferred classes 670 individuals. The average number retired from these five classes and receiving pensions during the year of 1913 is 108, and the total annual cost of pensions to these persons is \$83,497.33. This is an average of \$780.35. The smallest annual payment is one-half of the salary at the date of retirement, the largest is three-fourths of such salary. With reference to all of these pensions no contribution by the individual was made during his period of service, and none is provided for to be made by persons now employed in any of these five classes.

As compared with this, we find that in the Retirement Association there is an average of 61 receiving retirement allowances, and that the total annual cost to the Commonwealth on account of these persons is \$17,576.31. This is an average of \$290.52. Under this system the maximum payment is one-half the average of salary for the ten years preceding retirement, and the smallest is \$200. Thus among the five preferred classes the number retired is 16 per cent. of the number now in the service, while in the general retirement system this percentage is only $1\frac{1}{2}$. Again, in the former, the average pension is \$780.35 and in the latter only \$290.52. In the former the pension is at one-half salary at the retirement date, or, in the case of certain judges, three-fourths of such salary; in the latter, the retirement allowance is never more than one-half of an average salary, and in the case of only 19 of the 75 persons now receiving retirement allowances is the amount paid equal to this one-half. The total annual expense to the Commonwealth under the general retirement system in the first full year of its operation is undoubtedly less than it will be later. To some extent, therefore, a comparison of this item with a similar item for the five preferred systems, all of which have been in operation some years, is unfair. But the comparison of averages appears to be just to all systems. The conclusion is correct, therefore, that the general retirement system, established by chapter 532 of the Acts of 1911, does and will afford retirement allowances small in comparison with those to be found in the five preferred classes.

It is to be borne in mind, also, that the net cost to the Commonwealth of maintaining the five preferred systems will always equal the total amount of pensions, and that while a similar situation with reference to the general retirement system exists at its beginning, the proportion of the total retirement allowance to be paid by the Commonwealth under this system will constantly decrease until it becomes only one-half of such amount. Judged by the standards previously established in the five preferred systems, therefore, the general retirement system is restricted in character and is found to be moderate in cost.

There are at present in the Retirement Association 237 persons who, by virtue of having reached the age of at least sixty years, will be eligible to retirement during the coming year. For 4 of them retirement will be obligatory at the age of seventy. How many of the others will retire is of course not now known. The system is not yet old enough to afford an experience in this matter from which any reliable estimate can be made. The Board has therefore submitted its estimate for appropriations with considerable uncertainty as to the amount likely to be needed, conscious of the fact that it cannot accurately substantiate its request. Since the establishment of the association the membership has increased from 3,324 to 4,020.

The work of the Board and its expense of administration has been substantially constant, and need not be expected to increase largely during the coming year.

RECOMMENDATIONS FOR LEGISLATION.

Section 6 (2) of chapter 532 of the Acts of 1911 provides for payments in the three following cases and amounts:—

First — To a member of the association who leaves the service before becoming entitled to retirement, the amount of his deposits "with regular interest."

Second. — To the estate of a member of the association who dies before becoming entitled to retirement, the amount of his deposits "with such interest as shall have been earned on such deposits."

Third. — To a member who retires or is retired "an annuity to which the sum of his deposits... with regular interest shall entitle him...."

"Regular interest" is defined in the act as "interest at three per cent. per annum."

It appears from the above that in the first and third cases the member of the association will receive no benefit from any surplus credited to his account, while in the second case the estate of a deceased member will receive such surplus in full. If a member is to receive no benefit from the surplus at his retirement there appears to be no adequate reason why the surplus should ever be distributed to the individual accounts, since at the retirement of a member the surplus which has been charged up to his account will necessarily revert to the funds of the association. In this case there will have been an intricate system of bookkeeping with nothing accomplished thereby. Neither does there appear to be sufficient reason for depriving a member who leaves the service, as in the first case above, of a part of the earnings of his deposits. The Board is of the opinion that in all three of the above cases the treatment of the surplus should be similar, and that the individual should receive the full benefit therefrom. Accordingly, we have prepared a bill making such amendments as the facts seem to warrant. It is to be observed that no inequalities have arisen because of the anomaly of the present law, since no surplus has been credited to individual accounts.

1915.

APPROVED BY
THE STATE BOARD OF PUBLICATION.

BOARD OF RETIREMENT.

FREDERICK W. MANSFIELD, Chairman.
CARL A. RAYMOND.
CHARLES A. ANDREWS.

The Commonwealth of Massachusetts.

Board of Retirement, State House, Boston, Jan. 15, 1915.

Hon. Channing H. Cox, Speaker of the House of Representatives.

Dear Sir: — I transmit to you herewith for the use of the Legislature the annual report of the Board of Retirement for the year ending Nov. 30, 1914.

Respectfully yours,

FREDERICK W. MANSFIELD,

Chairman, Board of Retirement.

The Commonwealth of Massachusetts.

REPORT.

BOARD OF RETIREMENT, STATE HOUSE, BOSTON, Jan. 15, 1915.

To the Honorable Senate and House of Representatives.

In January, 1914, Hon. Frederick W. Mansfield, by virtue of becoming Treasurer and Receiver-General of the Commonwealth, became a member of the Board of Retirement, and he was forthwith chosen chairman of the Board. In February the term of office of Mr. Chas. A. Andrews expired, and he was elected by the other members of the Board, in accordance with law, as a member of the Board for a term of three years. During the year the Board has been composed of these two and Mr. Carl A. Raymond, who in 1912 was elected a member by the members of the association for a term of three years.

On Dec. 1, 1913, there were 4,020 members of the Retirement Association. On Dec. 1, 1914, there were 4,783 members. During the year 1,630 individuals have joined the association, and 839 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 28 have been retired, 7 by reason of reaching the age of seventy years, and 21 at their own request, at the age of sixty or over. The membership of the association was increased 1,630 by the compulsory entrance of employees who have entered the service since Dec. 1, 1913, and who had, during the past year, completed a probationary period and have thus become "permanent and regular" employees within the meaning of the law. By deducting from this number the number of those who have died, who have resigned and who have been retired, we find an increase in membership of 763. This

indicates with considerable accuracy the expansion of the State service during the past year.

Since the law became operative, on June 1, 1912, 109 employees have been retired, of whom 28 were retired during the past year; 10 annuitants and 1 non-member have died since retirement, so that retirement allowances are now being paid to 98 former employees. Of this number 33 were retired at the age of seventy, and 64 retired of their own volition, and 1 non-member for the good of the service, upon the request of the head of the department in which he was employed.

The total amount paid to these retired employees during the year ending Dec. 1, 1914, as pensions was \$24,918.58, as compared with payments of \$17,576.31 during the year ending Dec. 1, 1913; the largest yearly amount payable to any individual was \$905.14; the number of those who received the maximum retirement allowance, *i.e.* one-half of the average of salary for the ten years preceding retirement, was 30. The average annual retirement allowance paid to the whole number who benefited by the system during the year was \$283.17, and the average cash salary received by those persons for the ten years preceding retirement was \$734.50.

During the year there was made a distribution of surplus to the individual accounts of members. The total amount thus credited to members' accounts was \$1,754.73, and was equal to \$1.20 upon each \$100 of each account as it stood on Dec. 31, 1913.

It can be seen that the retirement system covers a large percentage of employees; that it makes both possible and necessary retirement from the service at a time when inefficiency is likely to be in evidence; and also it affords to those retired, at least in part, a living income. By chapter 419 of the Acts of 1914, retirement for permanent disability at any age, after fifteen years of service, was made possible. Under this provision of law one retirement has been granted during the year. We believe this law is wise in making it possible to remove from the service those who through illness or misfortune have become unable to perform efficiently the duties for which they have been employed.

The retirement system, established by chapter 532 of the

Acts of 1911, is not the only pension system affecting State employees. For the judges, members of the metropolitan park police, members of the district police, prison officers and instructors, and for veterans of the civil war in the State service separate pension systems have been established and are in operation. In none of these systems does the contributory principle prevail: in each of them retirement upon half pay or more is possible upon the reaching of a stated age or upon the completion of a stated period of service; in some of them retirement for disability is possible; and in at least one there is provision for a pension to the widow and young children of the deceased employee who loses his life in the performance of his duty. The tables on page 13 show the amounts paid by the Commonwealth during the past year to pensioners under each of those five systems, the number of persons in each system who receive the pensions, together with similar figures for the Retirement Association.

According to the best information we can secure there are now in the service in the five preferred classes 699 individuals. The average number retired from these five classes and receiving pensions during the year of 1914 was 113, and the total annual cost of pensions to these persons is \$91,589.94. This is an average of \$844.15. With reference to all of these pensions no contribution by the individual was made during his period of service, and none is provided for to be made by persons now employed in any of these five classes.

As compared with this, we find that in the Retirement Association there is an average of 88 receiving retirement allowances, and that the total annual cost to the Commonwealth on account of these persons is \$24,918.58. This is an average of \$283.17. Thus among the five preferred classes the number retired is 16 per cent. of the number now in the service, while in the general retirement this percentage is a trifle over 1½. Again, in the former, the average pension is \$844.15, and in the latter only \$283.17. In the former the pension is at one-half salary at the retirement date, or, in the case of certain judges, three-fourths of such salary; in the latter the retirement allowance is never more than one-half of an average salary, and in the case of only 28 of the 98 persons now receiving retirement

allowances is the amount paid equal to this one-half. It thus appears that the general retirement system, established by chapter 532 of the Acts of 1911, does and will afford retirement allowances small in comparison with those to be found in the five preferred classes.

It is to be borne in mind, also, that the net cost to the Commonwealth of maintaining the five preferred systems will always equal the total amount of pensions, and that while a similar situation with reference to the general retirement system exists at its beginning, the proportion of the total retirement allowance to be paid by the Commonwealth under this system will constantly decrease until it becomes only one-half of such amount.

There are at present in the Retirement Association 265 persons, who, by virtue of having reached the age of at least sixty years, will be eligible to retirement during the coming vear. How many of these will retire is, of course, not now The Board has therefore submitted its estimate for appropriations with considerable uncertainty as to the amount likely to be needed, conscious of the fact that it cannot accurately substantiate its request. One year ago the corresponding figures were 237, and during the year just closed 28 of these. or 11\frac{4}{5} per cent., were retired. Whether the percentage thus appearing is likely to prove reasonably constant in succeeding years, we cannot even guess, since the experience of so short a period as has elapsed since the establishment of the retirement system is insufficient for any conclusion upon this subject. The total expenses of administration of the Board for the year ending Nov. 30, 1914, were \$7,996.22.

One feature of the retirement system which is of commanding importance, and which can scarcely be too much emphasized, is the necessity it imposes upon the members to save money. At the close of the fiscal year the funds of the association were \$268,660.32. This amount had been actually contributed by members or had been earned by their contributions in a period of thirty months. In addition to this, there had been paid back to 1,715 members who had left the service of the Commonwealth \$21,869.26, and to the estates of 52 deceased members, \$1,306.33. Thus already more than \$23,000 has been

saved by members, and has been returned to them or to their estates. Of the \$268.660.32 now in the funds of the association a considerable amount will in the future be returned to present members as they shall leave the service before becoming entitled to retirement. The amount that will be thus paid back is of course unknown and cannot be estimated. But it is apparent that members of the association have saved many thousands of dollars which will be at their disposal even though they do not remain in the service long enough to receive a retirement allowance, and it is undoubtedly true that little if any of this would have been saved except for the compulsion of the retirement system. Evidence constantly reaches the Board that members look upon this feature of the retirement. system with favor, and are gratified that they have been compelled to adopt habits of saving before unknown to them. Among the benefits of the retirement system this is by no means the least, and its value is bound to be increasingly felt as the size of the individual accounts increases with the age of the association

REPORT

OF THE

STATE BOARD OF RETIREMENT.

JANUARY, 1916.

BOSTON:

WRIGHT & POTTER PRINTING CO., STATE PRINTERS, 32 DERNE STREET.

1916.

APPROVED BY
THE STATE BOARD OF PUBLICATION.

BOARD OF RETIREMENT.

Hon. CHARLES L. BURRILL, Chairman.
CARL A. RAYMOND.
Dr. JOHN E. FISH.

The Commonwealth of Massachusetts.

BOARD OF RETIFEMENT, STATE HOUSE, BOSTON, Jan. 24, 1916.

Hon. Channing H. Cox, Speaker of the House of Representatives, State House, Boston, Mass.

Dear Sir: — I transmit to you herewith for the use of the Legislature the annual report of the Board of Retirement for the year ending Nov. 30, 1915.

Respectfully yours,

CHARLES L. BURRILL,

Chairman, Board of Retirement.

The Commonwealth of Massachusetts.

REPORT.

BOARD OF RETIREMENT, STATE HOUSE, BOSTON, Jan. 1, 1916.

To the Honorable Senate and House of Representatives.

In January, 1915, the Hon. Charles L. Burrill qualified as Treasurer and Receiver-General of the Commonwealth, thereby becoming an ex officio member of the Board, and was elected chairman.

The term of office of Carl A. Raymond, second member elected by the members of the association, expired on Feb. 16, 1915. Under the direction of the Insurance Commissioner a primary was held and five persons were nominated as candidates, one of whom later withdrew. Four names appeared for election upon the official ballot. This election was also held, as required by law, under the direction of the Insurance Commissioner, and resulted in the re-election of Mr. Raymond for a period of three years.

On June 21, 1915, the Board was obliged to accept the resignation of Charles A. Andrews, third member, who was reelected for a term of three years, beginning Feb. 16, 1914. Mr. Andrews, having resigned from the State service, felt unable to give the necessary time to the work of the Board. After careful consideration the first two members of the Board elected Dr. John E. Fish, superintendent of the Massachusetts Hospital School, Canton, Mass., to fill the vacancy.

On Dec. 1, 1914, there were 4,766 members of the Retirement Association. On Dec. 1, 1915, there were 5,382 members. During the year 1,686 individuals have joined the association, and 1,046 have forfeited membership therein by reason of death

or resignation before becoming eligible to a retirement allowance. In addition, 24 have been retired, 8 by reason of reaching the age of seventy years, and 3 for permanent disability, and 13 at their own request, at the age of sixty or over. The membership of the association was increased 1,686 by the compulsory entrance of employees who have entered the service since Dec. 1, 1914, and who had, during the past year, completed a probationary period and have thus become "permanent and regular" employees within the meaning of the law. By deducting from this number the number of those who have died, who have resigned, and who have been retired we find an increase in membership of 626. This indicates with considerable accuracy the expansion of the State service during the past year.

Since the law became operative, on June 1, 1912, 133 employees have been retired, of whom 24 were retired during the past year; 13 annuitants and 1 nonmember have died since retirement, so that retirement allowances are now being paid to 119 former employees. Of this number, 43 were retired at the age of seventy or over, 3 for permanent disability, 1 nonmember for the good of the service, upon the request of the department in which he was employed, and 72 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1915, as pensions was \$30,433.91, as compared with payments of \$24,918.58 during the year ending Dec. 1, 1914; the largest yearly amount payable to any individual was \$905.14; the number of those who received the maximum retirement allowance, *i.e.*, one-half of the average cash salary for the ten years preceding retirement, was 54. The average annual retirement allowance paid to the whole number who benefited by the system during the year was \$284.79, and the average cash salary received by those persons for the ten years preceding retirement was \$777.17.

During the year there was made a distribution of surplus to the individual accounts of members. The total amount thus credited to members' accounts was \$1,337.90, and was equal to \$0.50 upon each \$100 of each account as it stood on Dec. 31, 1914.

The rate of contribution first established by the Board in accordance with the statute was 3 per cent. unless the employee elected to contribute 5 per cent. Many who became members did not act under the optional clause, and therefore contributed but 3 per cent., and later expressed a desire to have 5 per cent. deducted from their salaries. The Board questioned its right under the law to allow an individual to change from a once-established rate, and submitted three questions to the Attorney-General upon which he gave the following opinions:—

(1) That the Board has the power under the statute to allow employees to change their rates of contribution.

(2) That the Board cannot accept from employees allowed to change their rates of contribution a sum of money equal to the difference between the contributions on a 3 per cent. basis and the amount the contributions would have been if they had elected the 5 per cent. basis of contribution.

(3) That the rate first elected by employees in the service when the system went into operation is the rate which determines the basis on which their pensions for prior service will be estimated.

As the change affects only the annuity and subsequent pension part of the retirement allowance, no injustice results either to the State or to members*initially enrolled under the higher rate. The Board considers by vote each application.

The compulsory saving for the employee who leaves the service is equivalent to that accumulated under the general habit of voluntary thrift, and in case of the death of a member provides the dependents in many cases with much-needed funds. The accumulated savings refunded to members who left the service was \$23,057.30, and the amount refunded to the heirs or the estates of deceased members was \$2,674.81.

The Treasurer and Receiver-General acquires for the annuity fund only the bonds which pay the highest return upon the sum invested. The fund has earned an average rate of income during the year of 4.17 per cent.

The retirement system has 280 members who may voluntarily retire at age of sixty or over during the next fiscal year. The number who will retire is uncertain. The Board, therefore, has submitted its estimates for appropriations upon experience it has gained to the effect that the retirements will be 6 per cent.

of the eligibles. The total expenses of administration of the system for the year ending Nov. 30, 1915, were \$8,999.45.

By chapter 832 of the Acts of the year 1913 a retirement system for teachers was established. No provision, however, was made for a reciprocating allowance for prior service in cases where members of the teachers' system were transferred to the State employees' retirement system, and vice versa. This, it appeared, worked a hardship upon teachers leaving the service of the public schools and entering the service of State normal schools, thereby becoming members of the State system. It was apparent, also, that it might act as an obstacle to the Board of Education in making appointments to the staff of teachers in the normal schools from teachers in the public schools. The Board of Retirement is pleased to report that by the passage of chapters 197 and 198 of the General Acts of the year 1915 this difficult situation has been climinated.

The Board is of the opinion that legislation is necessary to define the standing of certain teachers, and other employees, employed by the Board of Education under agreements with certain cities wherein are located normal schools, with respect to the "training schools," so called, maintained for the mutual benefit of the normal school and the local school systems. This Board appointed a committee to confer with a committee appointed by the Teachers' Retirement Board upon the matter, and finds itself in substantial accord with them in the form of a bill. To carry out this recommendation a bill has been prepared and filed with the Secretary of the Commonwealth, as required by law, for the consideration of the General Court.

Publication of this Document approved by the Supervisor of Administration.

BOARD OF RETIREMENT.

Hon. CHARLES L. BURRILL, Chairman.
CARL A. RAYMOND.
DR. JOHN E. FISH.

The Commonwealth of Massachusetts.

REPORT.

BOARD OF RETIREMENT, STATE HOUSE, BOSTON, March 20, 1917.

To the Honorable Senate and House of Representatives.

The personnel of the Board remained unchanged during the year. The contributory system when inaugurated, while acceptable to the majority of employees, was not favored by a large minority. It is now interesting to note that its merits, better understood, are more fully appreciated.

This statement is emphasized by the fact that 104 employees out of 516 in the service when the permissive act of 1916 was passed, who declined membership under the original act, have, upon request, been enrolled to membership. It is interesting to note that 32 of those enrolled have been in the continuous service of the Commonwealth from ten to forty years. The Board, appreciating the importance of the act, gave individual notice to all employees interested therein.

On Dec. 1, 1915, there were 5,382 members of the Retirement Association. On Dec. 1, 1916, there were 5,458 members. During the year 1,445 individuals have joined the association, and 1,369 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 27 have been retired, 10 by reason of reaching the age of seventy years, 2 for permanent disability, and 15 at their own request, at the age of sixty or over. The membership of the association was increased 1,445 by the compulsory entrance of employees who have entered the service since Dec. 1, 1915, and who had, during the past year, completed a pro-

bationary period and have thus become "permanent and regular" employees within the meaning of the law. By deducting from this number the number of those who have died, who have resigned and who have been retired we find a net increase in membership of 76.

The merging of State departments and increased opportunity outside the State service, occasioned by greater industrial activity, caused an unusual number of refunds.

All persons employed at State penal institutions prior to June 7, 1911, other than "officers and instructors," were members of the retirement system if they did not decline membership. The passage of chapter 273, General Acts of 1916, placing all these employees under the noncontributory prison officers and instructors' act, equitably corrects what a former technicality caused to exist, as the duties of most of these persons subject them to the common hazards of penal service.

Since the law became operative on June 1, 1912, 161 employees have been retired, of whom 28 ¹ were retired during the past year; 21 annuitants and 2 non-members have died since retirement, so that retirement allowances are now being paid to 138 former employees. Of this number, 49 were retired at the age of seventy or over, 5 for permanent disability, 1 non-member for the good of the service, upon the request of the department in which he was employed, and 83 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1916, as pensions was \$36,672.76, as compared with \$30,433.91 during the year ending Dec. 1, 1915; the largest yearly amount payable to any individual was \$1,169.79; the number of those who received the maximum retirement allowance, *i.e.*, one-half of the average cash salary for the ten years preceding retirement, was sixty. The average annual retirement allowance paid to the whole number who benefited by the system during the year was \$305.

During the year an examination of the annuity fund was made by the Massachusetts Insurance Department in accordance with the law, and a distribution of the surplus to the individual accounts of members authorized. The total credited

¹ Retired non-member included.

amounted to \$5,167.02, and was equal to \$1.50 upon each \$100 of each account as it stood Sept. 30, 1915.

The accumulated savings refunded to members who left the service was \$39,164.70, and the amount refunded to the heirs or estates of deceased members was \$2,644.37.

The retirement system has 297 members who may voluntarily retire at age sixty or over during the next fiscal year, and 13 who must retire at age seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted its estimates for appropriations upon experience it has gained that 7 per cent. of the voluntary eligibles will retire, which will require about \$5,300 in addition to \$42,700, the amount of pensions in force on Nov. 30, 1916. The expenses of administration of the system for the year were: salaries, \$6,055.81; contingent expenses, \$1,016.46; reimbursement to institutions for making deductions from members' wages, etc., \$2,653.05. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

By the passage of chapter 54, General Acts of 1916, the status of certain teachers and other persons employed in training or practice schools maintained for the mutual benefit of the students of the normal school and the public school system wherein the normal school is located and a part of whose compensation is paid in varying proportions by the Commonwealth and the city or town, has been established.

RECOMMENDATIONS.

We desire to call to the attention of the General Court the basis under which deductions are made, and the sum allowed after retirement in cases where employees receive only a part of their compensation in cash. Many persons in the service of State institutions are boarded and housed at the expense of the Commonwealth, and the scale of cash compensation paid is accordingly lower than it would be otherwise.

The Board of Retirement, when preparing to inaugurate the system of making deductions, was advised by the Attorney-General that under the terms of the statute deductions could be made only from compensation paid in money. This results

in some cases in an employee contributing less than is necessary to purchase an annuity sufficient to make a retirement allowance of the minimum amount, namely, \$200 (which is guaranteed by the State), and therefore results in the State paying a larger proportion of the retirement allowance than seems to have been intended by the people drafting the law. In other cases it appears that there is an unfair discrimination between persons working in State institutions and persons working in other branches of the State's service, in so far as the retirement allowances for the persons working in the institutions are less because of smaller cash salaries for relatively the same work.

We recommend such legislative action as is just and equitable whereunder the Board of Retirement be given authority to investigate and report as to the desirability of changing existing laws to accomplish this purpose.

REPORT

OF THE

STATE BOARD OF RETIREMENT.

JANUARY, 1918.

BOSTON:

WRIGHT & POTTER PRINTING CO., STATE PRINTERS, 32 DERNE STREET. 1918. Publication of this Document
Approved by the
Supervisor of Administration.

BOARD OF RETIREMENT.

CHARLES L. BURRILL, Chairman.
CARL A. RAYMOND.
JOHN E. FISH, M.D.

The Commonwealth of Massachusetts.

Board of Retirement, State House, Boston, April 3, 1918.

Hon. Channing H. Cox, Speaker of the House of Representatives, State House, Boston, Mass.

DEAR SIR: — I transmit to you herewith for the use of the Legislature the annual report of the Board of Retirement for the year ending Nov. 30, 1917.

Very truly yours,

C. L. BURRILL, Chairman, Board of Retirement.

The Commonwealth of Massachusetts.

REPORT.

BOARD OF RETIREMENT, STATE HOUSE, BOSTON, MASS.

To the Honorable Senate and House of Representatives.

The Board of Retirement presents for your consideration its sixth report of successful operation under the same personnel as the preceding year.

On Dec. 1, 1916, there were 5,448 members of the Retirement Association. On Dec. 1, 1917, there were 5,573 members. During the year 1.361 individuals have joined the association, and 1,201 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 35 have been retired, 14 by reason of reaching the age of seventy years, 1 for permanent disability, and 20 at their own request, at the age of sixty or over. The membership of the association was increased 1,361 by the compulsory entrance of employees who have entered the service since Dec. 1, 1916, and who had, during the past year, completed a probationary period and have thus become "permanent and regular" employees within the meaning of the law. By deducting from this number those who have died, who have resigned and who have been retired we find a net increase in membership of 125.

Since the law became operative on June 1, 1912, 197 employees have been retired, of whom 36 1 were retired during the past year; 30 annuitants and 2 non-members have died since retirement, so that retirement allowances are now being paid to 165 former employees. Of this number, 58 were retired at the age of seventy or over, 5 for permanent disability, 2 non-

¹ Retired non-member included.

members for the good of the service, upon the request of the department in which they were employed, and 100 retired of their own volition

The total amount paid to these retired employees during the year ending Dec. 1, 1917, as pensions was \$43,944.47, as compared with \$36,672.76 during the year ending Dec. 1, 1916; the largest yearly amount payable to any individual was \$1,150; the number of those who received the maximum retirement allowance, i.e., one-half of the average cash salary for the ten years preceding retirement, was sixty-nine. The average retirement allowance paid to the whole number who benefited by the system during the year was \$305.

During the year an examination of the annuity fund was made by the Massachusetts Insurance Department in accordance with the law, and a distribution of the surplus to the individual accounts of members authorized. The total credited amounted to \$6,923.74, and was equal to \$1.50 upon each \$100 of each account as it stood on Sept. 30, 1916.

The accumulated savings refunded to members who left the service was \$49,355.99, and the amount refunded to the heirs or estates of deceased members was \$4,195.44.

The retirement system has 275 members who may voluntarily retire at age sixty or over during the next fiscal year, and 9 who must retire at age seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted its estimates for appropriations upon the experience it has gained that 7 per cent. of the voluntary eligibles will retire. This will require about \$6,440 in addition to \$45,560, the amount of pensions in force on Nov. 30, 1917. The expenses of administration of the system for the year were: salaries, \$6,228.56; contingent expenses, \$673.86; reimbursement to institutions for making deductions from members' wages, etc., \$2,518.73. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

In compliance with a request from the commissioners appointed under chapter 43 of the Resolves of 1916 to consolidate the laws of the Commonwealth, the Board has suggested the following changes in order to correct ambiguity and inconsistency, and make clear the existing law.

STATE RETIREMENT ACT.

Chapter 532, Acts of 1911, and Amendments and Additions thereto. Section 3.—Amend by striking out paragraph (3) and substituting the following:—

No officer elected by popular vote may become a member of the association, nor any employee who is or will be entitled to a non-contributory pension from the commonwealth; but if such employee leaves a position for which such a pension is provided before becoming entitled thereto, and takes a position to which this act applies, he shall thereupon become a member of the association.

The act seems to make no provision for employees holding positions for which non-contributory pensions are provided, like members of the district police and prison officers, who are transferred to positions to which the act applies. The Board, however, treats such employees as members of the association.

Amend paragraph (4) by inserting after the word "employed", in the fifth line, the words: — or, in case of members appointed by the governor, upon recommendation of the governor and council, — so that said paragraph shall read as follows: —

(4) Any member who reaches the age of sixty years and has been in the continuous service of the commonwealth for a period of fifteen years immediately preceding may retire or be retired by the board of retirement upon recommendation of the head of the department in which he is employed, or, in case of members appointed by the governor, upon recommendation of the governor and council, and any member who reaches the age of seventy must so retire.

A member of the State Retirement Association reaching sixty years, who has been in the continuous service of the Commonwealth fifteen years, may be retired upon the recommendation of the head of the department in which he is employed.

The Attorney-General has ruled (1913, Op. A. G. 101) that the chairman of a commission is not the head of a department in the sense that he may recommend the retirement of his fellow members, although members of commissions are within the retirement law. We therefore suggest that such officials be subject to retirement under the law, upon the recommendation of the Governor and Council.

Section 4. — Amend by striking out paragraph (3) and substituting the following: —

(3) Subject to the approval of the board of retirement, the treasurer and receiver-general shall have charge and control of the funds of the system and any and all unappropriated income thereof, and shall invest and reinvest the same when not required for current disbursements, in accordance with the provisions of chapter one hundred and ninety-two of the General Acts of nineteen hundred and sixteen.

The original paragraph provides that the State Treasurer shall invest the funds of the State Retirement Association in investments that are legal for savings banks, with a preference for investments that are legal for the sinking funds of the Commonwealth. The latter class of investments covers so wide a field that the former, in so far as they differ from the latter, are never resorted to.

Section 5. — Amend by striking out (2) B (b) and substituting the following: —

(b) Each year the commonwealth shall contribute such amount as is necessary to guarantee regular interest and make good any deficiency in the annuity fund, as of the preceding thirty-first day of December.

The first requires the Commonwealth to contribute each year in January an amount equal to the surplus arising from annuity deposits; the second requires it to make good any deficiency in them. In case the invested deposits should yield less than 3 per cent. there would be to that extent a deficiency in the annuity fund, and it is to take care of such deficiency that the second provision of the paragraph is inserted.

Under the retirement act every dollar paid in annuities from the annuity fund is matched by another contributed by the Commonwealth by way of pension. It was originally intended that the Commonwealth annually in the month of January should turn into the treasury of the association a sum adequate for the payment of pensions; in other words, a sum equal to the annuity fund, herein referred to as the surplus. In the passage of the measure through the Legislature this policy was abandoned, and provision was made for monthly payments by the Commonwealth to the pension fund. Through oversight the provision for an annual payment by the Commonwealth was retained.

Section 6.—Amend (2) B (b) by striking out the words "regular interest" in the fourth and fifth lines, and inserting in place thereof the following:—such interest as shall have been earned thereon,—and by adding at the end thereof the following:—provided that this form of annuity shall not be paid unless the amount of his accumulations will provide an annuity of one hundred dollars or more,—so that said paragraph shall read as follows:—

(b) A life annuity, payable monthly, with the provision that in the event of the death of the annuitant before receiving payments equal to the sum, at the date of his retirement, of his deposits under section five (2) A, with such interest as shall have been earned thereon, the difference shall be paid to his legal representatives, provided that this form of annuity shall not be paid unless the amount of his accumulations will provide an annuity of one hundred dollars or more.

The original section 6 (2) relates to the distribution of annuity and pension funds of the State retirement system in the shape of refunds, annuities and pensions. As originally drawn such distribution was to include "regular interest" (3 per cent. as defined by the act), but section 1, chapter 582, Acts of 1914, amended (2) A (a) of said section, relative to refunds, by striking out the words "regular interest" and substituting "such interest as shall have been earned thereon." The same change was made by section 2, chapter 582, Acts of 1914, (2) B, relating to the payment of annuities, but through oversight was not made in (2) B (b) relating to payments to the annuitant's legal representatives. The first of the above amendments makes the necessary correction. The second of the above amendments is rendered necessary by reason of giving a retired member of the State Retirement Association who chooses the smaller annuity, with a remainder over to his estate, a pension equivalent to the pension he would have received had he chosen the larger annuity (6 (2) B (a)) without such remainder. The act provides that in no case shall a retired member receive less than \$200 annually, consisting under option (a) of \$100 by way of annuity and \$100 by way of

pension. By choosing a rate of annuity less than \$100 a year, a member might compel the Commonwealth under section 6 (2) E to pay the difference up to the stated minimum, and at the same time entitle his estate to receive at death the difference between his deposits and his total annuity payments.

Amend (2) C (a) by inserting after the word "annuity," in the fourth line, the words: — to which he would be entitled if his annuity were figured under (2) B (a) of this section, — and by adding at the end thereof the following: — For the purpose of computing the pension for subsequent service of any member who has left a position in the service of the commonwealth for which a non-contributory pension is provided to take a position subject to this act, he shall be credited with regular accumulated contributions to the annuity fund during his period of service in said former position since June first, nineteen hundred and twelve, — so that said paragraph shall read as follows: —

(a) Pensions based upon subsequent service. Any member entitled to an annuity under paragraph (2) B of this section shall receive in addition thereto a pension for life payable monthly, equivalent to that annuity to which he would be entitled if his annuity were figured under (2) B (a) of this section, to be paid out of the fund contributed by the commonwealth under the provisions of section five, (2) B (a). For the purpose of computing the pension for subsequent service of any member who has left a position in the service of the commonwealth for which a non-contributory pension is provided to take a position subject to this act, he shall be credited with regular accumulated contributions to the annuity fund during his period of service in said former position since June first, nineteen hundred and twelve.

The law allows a member the option between two forms of annuity. A member choosing option (b) receives a smaller annuity payment than he would have received if he had chosen option (a), but there is a death benefit payable to his legal representatives, if he dies before receiving annuity payments, equal to the amount which he had in the annuity fund at the time of retirement. In the end, therefore, he or his estate receives the total sum to which his contributions entitle him by way of annuity.

The theory of the act is that a retiring member shall receive by way of pension the equivalent of his receipt by way of annuity. Accordingly, the law provides that pension instalments shall equal the annuity instalments, but it omits to provide a death benefit from the pension fund equal to the death benefit from the annuity fund. A member choosing option (b) therefore receives less from the pension fund than he would be entitled to receive if the theory of the act were consistently followed. This inconsistency is doubtless an oversight, and is remedied by the above amendment.

The second of the above amendments is made to supply an omission in respect to a member of the State Retirement Association who is transferred from a position entitled to a non-contributing pension to a position subject to the retirement act.

Amend (2) C (b) as amended by chapter 363, Acts of 1912, by inserting after the word "average", in the third line of the fourth paragraph, the words: — annual rate of, — so that said paragraph shall read as follows: —

If the accumulated contributions of any employee retired under the provisions of this act exceed the amount required to provide an annuity equal to one fourth of the average annual rate of wages or salary of such employee during the last ten years prior to his retirement, the excess above that amount shall be paid to such employee in a lump sum with the first monthly payment on the account of his retiring allowance.

This change is made to correspond with the change in description of maximum as provided in (2) E.

Amend by striking out (2) E and substituting the following: —

E. Minimum and Maximum Payments.—In no case shall the total monthly payment to a member be at a rate less than two hundred dollars per year, or at a rate more than one half the average annual rate of salary or wages of such member during the ten years prior to his retirement.

The original paragraph prescribes as the maximum payment to a retired member of the State Retirement Association onehalf the amount of the average salary or wages received by him during the ten years prior to his retirement. If during such ten years he has lost a considerable amount of salary by reason of illness his maximum allowance is materially reduced. This unintentional injustice is remedied by taking as the measure his average rate of salary or wages rather than the average of the total receipts.

Chapter 419, Acts of 1914.

Section 1. — Amend by striking out this section 1 and substituting the following: —

Section 1. Any employee of the commonwealth subject to and affected by chapter five hundred and thirty-two of the acts of nineteen hundred and eleven and amendments thereof may, after fifteen years of continuous service be retired for permanent disability at a yearly rate of not more than one half of his salary, based on the average annual rate of salary received during the last ten years of service: provided, however, that the minimum amount be not less than two hundred dollars and that the tables now or hereafter in use by the board of retirement be used in determining the amount to be paid, and the board of retirement may employ a physician to assist it in determining the degree of disability. The decision of the board of retirement shall be final.

The above changes the present law providing retirement allowances for disabled State employees by taking as a basis their average yearly rate of salary for the last ten years of service instead of their average salary, rendering it consistent with the State retirement act (1911, 532, section 6 (2) E). The present law empowers the Retirement Board to call upon the surgeon-general of the militia of the Commonwealth to assist it in determining the degree of disability. In view of his possible absence in the discharge of his military duties the Board believes such contingency will be corrected by the suggested change.

REPORT AND RECOMMENDATIONS.

The Board of Retirement was directed, under authority of chapter 106, Resolves of 1917, as follows:—

Resolve providing for an Investigation by the Board of Retirement relative to the Pensions and Annuities of Employees who receive Board or Lodging as a Part of their Compensation.

Resolved, That the board of retirement is hereby authorized and directed to make an investigation and to report to the next general court as

to a basis for determining the value of board, lodging, and other considerations which are a part of the compensation of certain employees in the institutions of the commonwealth, with drafts of such legislation, if any, relating to the said subject, as the board may deem expedient. [Approved May 18, 1917.

Pursuant to the directions contained in the above resolve, the Board of Retirement, after careful investigation, reports as follows:—

- 1. That inequality in retirement allowances results from the operation of the existing law between employees who receive full compensation in cash and those who receive in addition to cash some other form of compensation.
- 2. That retirement allowances under the State contributory system are proportionate to the basis upon which assessments are made.

The Board finds no justification for a discrimination in the retirement allowances between the two classes, but at the same time it is impressed with the fact that considerable discontent might be created among certain persons who would be inconvenienced by increasing the retirement assessments in cases where an established rate has prevailed for some time and their expenses have been regulated from a small wage. The Board therefore hesitates to make a recommendation for placing all employees upon the basis of having deductions made from the estimated salary or wages, including both cash and maintenance, as such action might tend to increase the difficulties of our institutions in their employment problem, which has already reached an acute state due to the scarcity of persons desiring that kind of employment.

It may be advisable to provide by law that new employees entering the service on a basis of part maintenance should be required to contribute to the retirement system upon an estimated amount to cover both cash and maintenance, and that all allowances for prior service be figured upon an estimated basis to include maintenance at a fixed rate.

The Board has accumulated certain statistics in relation to the members affected and the value of maintenance as estimated by the different institutions. From statistics supplied by 29 institutions the Board finds that only 604 out of a total of 5,440 employees receive full compensation in cash. There are 4,420 who receive in addition to cash entire maintenance, 69 who receive entire maintenance for themselves and their families, and 347 who receive cash plus the following forms of partial maintenance:—

56 cash plus full meals.
29 cash plus two meals.
179 cash plus dinners.
56 cash plus house or cottage.
27 cash plus tenement.

Only two State institutions—the State Prison and the Massachusetts Reformatory—pay total compensation in cash to their employees.

The highest valuation placed upon total maintenance by any institution is \$416, while the lowest, \$216, is supplied by several. The average value of total maintenance found from the various rates is \$265, or about \$5 per week.

The query naturally arises as to just what proportion the cash payment bears to the theoretical maintenance valuation. The answer is found in the following table which shows the number of employees who receive in addition to total maintenance the following rate of cash per annum:—

\$250 and less,							235
\$350 and less,							2,005
\$400 to \$500,							1,284
\$500 to \$600,							369
\$600 to \$700,							153
\$700 to \$800,							83
\$800 to \$900,							98
\$900 to \$1,000,							76
\$1,000 to \$1,100	Э,						31
\$1,100 to \$1,200							47
\$1,200 to \$1,300							15
\$1,300 to \$1,400							18
\$1,400 to \$1,500							16
\$1,500 to \$1,800							6
\$1,800 to \$2,000							23
\$2,500,							10
\$3,000,							7
\$3,500, .							2
\$4,000, .		•					11
. ,							

It is evident that while the scope of the subject is of considerable importance to a great many members, it is probable that comparatively few will remain in the service long enough to be retired. If a value is placed upon maintenance it should be uniform, but it is probable that a value which is reasonable to-day might not be considered so at some future date.

Adjustments in cases where employees receive cash plus partial maintenance are too difficult to be considered in any general valuation.

The matter should be confined to total maintenance, which for the period of time prior to June 1, 1912, might be \$5 per week, with provision for changes in valuation by the Board at certain intervals.

BOARD OF RETIREMENT.

CHARLES L. BURRILL, Chairman. CARL A. RAYMOND. JOHN E. FISH, M.D.

The Commonwealth of Massachusetts

BOARD OF RETIREMENT, STATE HOUSE, BOSTON, Jan. 29, 1919.

Hon. Joseph E. Warner, Speaker of the House of Representatives, State House, Boston, Mass.

DEAR SIR: — I transmit to you herewith for the use of the Legislature the annual report of the Board of Retirement for the year ending Nov. 30, 1918.

Very truly yours,

C. L. BURRILL, Chairman, Board of Retirement.

The Commonwealth of Massachusetts

REPORT.

Board of Retirement, State House, Boston, Mass., Jan. 29, 1919.

To the Honorable Senate and House of Representatives.

The Board of Retirement presents for your consideration its seventh annual report.

The term of Mr. Carl A. Raymond, second member of the Board, expired on Feb. 16, 1918. An election held under the direction of the Insurance Commissioner resulted in Mr. Raymond's being re-elected for a three-year term.

On Dec. 1, 1917, there were 5,573 members of the Retirement Association. On Dec. 1, 1918, there were 5,365. During the year 1,360 have joined the association, and 1,544 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 24 have been retired, 6 by reason of reaching seventy years of age, 2 for permanent disability, 15 upon their own request at the age of sixty or over, and 1 as being the wife of a retired member.

By deducting from the whole number enrolled those who have died, who have resigned, and who have been retired we find a net loss in membership of 208. This was, no doubt, in a large measure due to unusual opportunities offered by employment conditions due to the war.

Since the law became operative on June 1, 1912, 221 employees have been retired, and 44 annuitants and 3 non-members have died since retirement, so that retirement allowances are now being paid to 174 former employees. Of this number, 61 were retired at the age of seventy or over, 7 for permanent

disability, 1 non-member for the good of the service, upon request of the department in which he was employed, and 105 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1918, as pensions was \$49,890.50, as compared with \$43,944.47 during the year ending Dec. 1, 1917. The largest amount payable to any individual was \$1,158.88. The number of those who received the maximum retirement allowance, one-half the average cash salary for the ten years preceding retirement, was 72. The average retirement allowance paid to the whole number who benefited by the system during the year was \$315.12.

During the year an examination of the annuity fund was made by the Massachusetts Insurance Department in accordance with the law, and a distribution of the surplus to the individual accounts of members authorized. The total credited amounted to \$7,927.49, and was equal to \$1.40 on each \$100 of each account as it stood on Sept. 30, 1917.

The accumulated savings refunded to members who left the service were \$83,400.69, and the amount refunded to the heirs or estates of deceased members was \$5,689.65.

The retirement system has 279 members who may voluntarily retire at the age of sixty or over during the next fiscal year, 5 under sixty years of age who have completed thirty-five years of service, and 11 who must retire at the age of 70, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted its estimates for appropriation upon experience that it has gained that 7 per cent. of the voluntary eligibles will retire. This will require about \$6,100 in addition to \$52,408.51, the amount of pensions in force on Nov. 30, 1918.

The expenses of the administration of the system for the year were: salaries, \$6,107.02; contingent expenses, \$736.31; reimbursement to institutions for making deductions from members' salaries, etc., \$2,230.88. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

The Board begs to suggest the following two amendments to the State Retirement Act (chapter 532, Acts of 1911, and amendments and additions thereto):—

In section 1 amend definition of "continuous service," in paragraph (f), by adding at the end thereof the following:—
provided, however, such reinstatement may occur after the expiration of two years in the case of employees in the military or naval service of the United States (or her allies) who are engaged in war or detained thereafter, awaiting demobilization or release, so that said paragraph shall read as follows:—

(f) The words "continuous service" mean uninterrupted employment, with these exceptions: a lay-off on account of illness or reduction of force, and a leave of absence, suspension or dismissal followed by reinstatement within two years: provided, however, such reinstatement may occur after the expiration of two years in the case of employees in the military or naval service of the United States (or her allies) who are engaged in war or detained thereafter, awaiting demobilization or release.

The present definition of "continuous service" would make necessary a refund of accounts of those members, who, owing to enrollment in the military or naval service of the United States in the present war, may be separated from the service of the Commonwealth, on leave of absence or otherwise, for a period extending over two years. This further entails loss of credit for service rendered prior to their subsequent reinstatement, and materially impairs their probable retirement allowances. In order that these members may not be deprived of credit for prior service owing to absence extending over two years on account of the war, we submit herewith draft of a bill to secure for them such continuous service credit.

Amend section 4 by striking out paragraph (6), A, B, C, D, E, F and G, and substituting the following:—

(6) The treasurer and receiver general and the board of retirement shall each file in the office of the insurance commissioner on or before the fifteenth day of February in each year, unless for cause the insurance commissioner shall have granted an extension of time, a sworn statement which shall be in a form prescribed by the insurance commissioner and which shall exhibit the financial condition of the retirement system on the thirty-first day of the preceding December. The treasurer and receiver general shall also file each year a copy of said statement with the board of retirement.

The present law does not require the Board of Retirement to file a report of its financial condition with the Insurance Commissioner. Owing to the fact that some of the data for the report, such as returns from institutions, are not received until late in January, it is practically impossible to prepare a report for filing in January. Under ordinary circumstances February 15 would allow sufficient time. These recommendations have been embodied in the draft of a bill submitted.

CHARLES L. BURRILL, Chairman. CARL A. RAYMOND. JOHN E. FISH, M.D.

BOARD OF RETIREMENT.

CHARLES L. BURRILL, Chairman. CARL A. RAYMOND. JOHN E. FISH, M.D.

The Commonwealth of Massachusetts

Board of Retirement, State House, Boston, Jan. 14, 1920.

Hon. Joseph E. Warner, Speaker of the House of Representatives, State House, Boston, Mass.

DEAR SIR: — I transmit to you herewith, for the use of the Legislature, the annual report of the Board of Retirement for the year ending Nov. 30, 1919.

Very truly yours,

CHARLES L. BURRILL, Chairman, Board of Retirement.

The Commonwealth of Massachusetts

REPORT.

Board of Retirement, State House, Boston, Mass., Jan. 14, 1920.

To the Honorable Senate and House of Representatives.

The Board of Retirement presents for your consideration its eighth annual report.

The personnel of the Board remained unchanged during the year.

On Dec. 1, 1918, there were 5,365 members of the Retirement Association. On Dec. 1, 1919, there were 6,113. During the year 1,910 have joined the association, and 1,190 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 31 have been retired, 11 by reason of reaching seventy years of age, 2 for permanent disability, 17 upon their own request at the age of sixty or over, and 1 as a non-member of the association upon recommendation of the department in which he was employed.

By deducting from the whole number enrolled those who have died, who have resigned, and who have been retired, we find a net gain in membership of 748.

Since the law became operative on June 1, 1912, 252 employees have been retired, and 53 annuitants and 3 non-members have died since retirement, so that retirement allowances are now being paid to 196 former employees. Of this number, 70 were retired at the age of seventy or over, 7 for permanent disability, 2 non-members for the good of the service upon request of the departments in which they were employed, and 117 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1919, as pensions was \$56,052.47 as compared with \$49,890.50 during the year ending Dec. 1, 1918.

The largest amount payable to any individual was \$1,200. The number of those who received a retirement allowance of one-half the average cash salary for the ten years preceding retirement was 75. The average retirement allowance paid to the whole number who benefited by the system during the year was \$328.05.

During the year an examination of the annuity fund was made by the Massachusetts Insurance Department in accordance with the law, and a distribution of the surplus to the individual accounts of members authorized. The total credited amounted to \$9,446.54, and was equal to \$1.40 on each \$100 of each account as it stood on Sept. 30, 1918.

The accumulated savings refunded to members who left the service were \$69,785.17, and the amount refunded to the heirs or estates of deceased members was \$10,819.89.

The retirement system has 279 members who may voluntarily retire at the age of sixty or over during the next fiscal year, 18 under sixty years of age who have completed thirty-five years of service, and 14 who must retire at the age of 70, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted its estimates for appropriation upon experience that it has gained that 7 per cent of the voluntary eligibles will retire. This will require about \$3,540 in addition to \$60,236.41, the amount of pensions in force on Nov. 30, 1919.

The expenses of the administration of the system for the year were: salaries, \$7,355.50; contingent expenses, \$761.58; reimbursement to institutions for making deductions from members' salaries, etc., \$2,172.12. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

The Board begs to suggest the following amendments to the State Retirement Act (chapter 532, Acts of 1911, and amendments and additions thereto):—

The Commonwealth at various times has assumed control of departments or institutions formerly administered by a city, county or corporation. The Commonwealth has provided that the service rendered to an undertaking by certain employees prior to being transferred with the undertaking shall become a part of the continuous service for the Commonwealth of all who happen to be under fifty-five years of age on the date of transfer. By limiting the benefits of membership in the Retirement Association to only those under age fifty-five, discrimination and injustice result to those over fifty-five years of age at the time when the undertaking is taken over by the Commonwealth.

Section 1. Section three, paragraph two, of chapter five hundred and thirty-two of the acts of the year nineteen hundred and eleven, as amended by chapter three hundred and sixty-three of the acts of the year nineteen hundred and twelve, is hereby further amended by adding to said paragraph the following: — All persons who are members of the retirement association established by chapter eight hundred and thirty-two of the acts of the year nineteen hundred and thirteen who enter the service of the commonwealth and persons in the employ of a department or institution formerly administered by a city, county, or corporation when it is taken over by the commonwealth, shall become members of the retirement association established by chapter five hundred and thirty-two of the acts of the year nineteen hundred and eleven, irrespective of age, and no such employee shall remain in the service of the commonwealth after reaching the age of seventy years,—so that said paragraph shall read as follows:—(2) All employees who enter the service of the commonwealth after the date when the retirement system is established, except persons who have already passed the age of fifty-five years, shall upon completing ninety days of service become thereby members of the association. Persons over fifty-five years of age who enter the service of the commonwealth after the establishment of the retirement system shall not be allowed to become members of the association, and no such employee shall remain in the service of the commonwealth after reaching the age of seventy years. All persons who are members of the retirement association established by chapter eight hundred and thirty-two of the acts of the year nineteen hundred and thirteen who enter the service of the commonwealth, and persons in the employ of a department or institution formerly administered by a city, county, or corporation when it is taken over by the commonwealth, shall become members of the retirement association established by chapter five hundred and thirty-two of the acts of the year nineteen hundred and eleven, irrespective of age, and no such employee shall remain in the service of the commonwealth after reaching the age of seventy years.

The law provides a pension for the periods of employment prior to June 1, 1912, but it does not provide any pension for the period of service rendered to an undertaking after June 1, 1912, from that date up to the date the person enters the employ of the Commonwealth by the transfer of the department or institution.

Section 2. Section six (2), C (b) of chapter five hundred and thirtytwo of the acts of the year nineteen hundred and eleven, as amended by chapter three hundred and sixty-three of the acts of the year nineteen hundred and twelve, chapter two hundred and fifty-seven of the acts of the year nineteen hundred and eighteen, section one hundred and seven is hereby further amended by adding after paragraph (b) the following new paragraph: — (c) Any member entitled to retirement under this act whose continuous employment for the commonwealth began at the time a department or institution formerly administered by a city, county, or corporation was taken over by the commonwealth shall receive at retirement in addition to the pension payable under paragraph C (b) of this section an extra pension for life equal to the annuity he would have purchased under two, B (a) of this section by five per cent contribution from the salary paid to him by the department or institution from June first. nineteen hundred and twelve, up to the date of membership in the retirement association, and if such contributions had been accumulated with regular interest, to the date of his retirement.

Certain State employees receive maintenance as a part of their compensation. Contributions to the annuity fund cannot be made from this form of compensation, which results in their contributing only on the part of compensation which is paid in cash, and which reduces in direct proportion the amount they will receive at retirement. While the law has partly corrected this by providing that no retirement allowance shall be less than \$200 per annum, it has not provided what we to-day believe is a reasonable equivalent, \$300 per annum.

Section 3. Section six (2), C (b) of chapter five hundred and thirty-two of the acts of the year nineteen hundred and eleven, as amended by chapter three hundred and sixty-three of the acts of the year nineteen hundred and twelve, is hereby further amended by striking out the words "two hundred dollars", in the third paragraph of said paragraph, and inserting the words: — three hundred dollars, — so that said paragraph shall read as follows: — In the case of members of the association related as husband and wife, if one of the two retires or is retired the other shall have the right also to retire, and shall be paid a retiring allowance proportionate to the amount of his or her accumulated contributions to date, or, in case the allowance thus calculated is less than the minimum allowance of three hundred dollars hereinafter provided for, shall be paid that sum annually.

Section 4. Section six (2) E of chapter five hundred and thirty-two of the acts of the year nineteen hundred and eleven, as amended by section one hundred and eight of chapter two hundred and fifty-seven of the acts of the year nineteen hundred and eighteen, is hereby further amended by striking out the words "two hundred dollars" and inserting the words:—three hundred dollars,—so as to read as follows:—E. Minimum and Maximum Payments.—In no case shall the total monthly payment to a member be at a rate less than three hundred dollars per year, or at a rate more than one-half the average annual rate of salary or wages of such member during the ten years prior to his retirement.

SECTION 5. Chapter four hundred and nineteen of the acts of the year nineteen hundred and fourteen, as amended by chapter two hundred and fifty-seven, section one hundred and ten. General Acts of the year nineteen hundred and eighteen, is hereby further amended by striking out the words "two hundred dollars" and inserting in place thereof the words: — three hundred dollars. — so as to read as follows: — Section 1. Any employee of the commonwealth subject to and affected by chapter five hundred and thirty-two of the acts of nineteen hundred and eleven and amendments thereof may, after fifteen years of continuous service, be retired for permanent disability at a yearly rate of not more than one half of his salary, based on the average annual rate of salary received during the last ten years of service: provided, however, that the minimum amount be not less than three hundred dollars and that the tables now in use by the board of retirement be used in determining the amount to be paid, and the board of retirement may call upon the chief surgeon of the land forces of the commonwealth, or, if he is absent or unable to act, may employ a physician to assist it in determining the degree of disability. The decision of the board of retirement shall be final.

The legislative action necessary to embody the above recommendations has been submitted by this Board in a draft of a bill.

The Commonwealth of Wassachusetts

Division of Board of Retirement, 116 State House, Boston, March 7, 1921.

Hon. Benjamin L. Young, Speaker of the House of Representatives, State House, Boston, Mass.

DEAR SIR: — I transmit to you herewith, for the use of the Legislature, the annual report of the Board of Retirement for the year ending Nov. 30, 1920.

Very truly yours,

JAMES JACKSON, Chairman, Board of Retirement.

The Commonwealth of Wassachusetts

REPORT.

Division of Board of Retirement, 116 State House, Boston, March 7, 1921.

To the Honorable Senate and House of Representatives.

The Board of Retirement presents for your consideration its ninth annual report.

On Dec. 1, 1919, there were 6,113 members of the Retirement Association. On Dec. 1, 1920, there were 6,282. During the year 1,679 have joined the association, and 1,483 have forfeited membership therein by reason of death or resignation before becoming eligible to a retirement allowance. In addition, 28 have been retired, 11 by reason of reaching seventy years of age, 1 for permanent disability, 15 upon their own request at the age of sixty or over, and 1 as a non-member of the association upon recommendation of the department in which he was employed.

By deducting from the whole number enrolled those who have died, who have resigned, and who have been retired, we find a net gain in membership of 169.

Since the law became operative on June 1, 1912, 280 employees have been retired, and 68 annuitants and 3 non-members have died since retirement, so that retirement allowances are now being paid to 209 former employees. Of this number, 70 were retired at the age of seventy or over, 8 for permanent disability, 3 non-members for the good of the service upon request of the departments in which they were employed, and 128 retired of their own volition.

The total amount paid to these retired employees during the year ending Dec. 1, 1920, as pensions was \$63,159.09 as compared with \$56,052.47 during the year ending Dec. 1, 1919.

The largest amount payable to any individual was \$1,200. The number of those who received a retirement allowance of one-half the average cash salary for the ten years preceding retirement was 50. The average retirement allowance paid to the whole number who benefited by the system during the year was \$333.97.

During the year an examination of the annuity fund was made by the Massachusetts Insurance Department in accordance with the law, and a distribution of the surplus to the individual accounts of members authorized. The total credited amounted to \$14,055.42, and was equal to \$1.75 on each \$100 of each account as it stood on Sept. 30, 1919.

The accumulated savings refunded to members who left the service were \$101,888.03, and the amount refunded to the heirs or estates of deceased members was \$7,496.99.

The retirement system has 267 members who may voluntarily retire at the age of sixty or over during the next fiscal year, 17 under sixty years of age who have completed thirty-five years of service, and 19 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted its estimates for appropriation upon experience that it has gained that 7 per cent of the voluntary eligibles will retire. This will require about \$4,680 in addition to \$66,477.87, the amount of pensions in force on Nov. 30, 1920.

The expenses of the administration of the system for the year were: salaries, \$8,343.80; contingent expenses, \$1,022.45; reimbursement to institutions for making deductions from members' salaries, etc., \$2,420.68. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

RECOMMENDATIONS FOR LEGISLATION.

The Board recommends the following amendments to the State Retirement Act (chapter 32, General Laws, sections 1 to 5, inclusive):—

The law regarding the eligibility of officials appointed by the Governor for fixed terms to membership in the Retirement

Association has been subject to varied interpretations. The Board has established rules under which certain facts would determine whether these officers of the Commonwealth would become members of the association, but has had considerable difficulty to administer the provisions of the law and the rules prescribed when there appears to be a legal difference of opinion in the matter. A section should be provided in the law to establish definitely the status of such officials with respect to their membership in the Retirement Association.

Section two, paragraph three, of chapter thirty-two of the General Laws is hereby amended by adding at the end of said paragraph the following: — An official under fifty-five years of age when appointed or reappointed by the governor for a fixed term of years may, if his sole employment is in the service of the commonwealth, become a member of the retirement association by making written application for membership within one year from the date of his original appointment or subsequent reappointment to the same office. An official who is a member of the retirement association shall not receive credit for any period of service which he may have rendered as an official from June first, nineteen hundred and twelve, to the dates of his appointment or reappointment which immediately preceded his membership in the retirement association: and when he is enrolled upon application he shall continue to be a member of the association until retired, or until he ceases to be an official or employee of the commonwealth, provided, that officials who are members of the association when this act takes effect may, upon written application to the board within six months after said date, withdraw their membership and their accounts in the association.

The Retirement Act prescribes a certain age beyond which no person subject to its provisions should remain in the service of the Commonwealth. The law makes it a mandatory function of the Board and empowers them with full authority to retire all members of the association at age seventy. It prescribes also that certain individuals who were too old to become members of the association when they were employed shall not remain in the service after reaching age seventy, but it does not give the Board any authority to enforce this provision and restrain any violations thereof. The law should give the Board an effective way to see that its provisions have only one interpretation affecting all, and a section similar to

the one now in the civil service law should be provided in the retirement law to accomplish the desired results.

Section thirty-five of chapter thirty-two of the General Laws is hereby amended by adding at the end of said paragraph the following: — If, in the judgment of the board of retirement, a person is appointed or employed in the service in violation of the provisions of sections one to five, inclusive, of this chapter, or in violation of any rules or regulations of the board consistent with the provisions of said sections, the board shall after written notice to the appointing or employing officer or officers, and to such persons, notify in writing the treasurer and auditor or other disbursing officer of the commonwealth; and the payment of any salary or compensation to such person shall be illegal and shall cease at the expiration of one week after the latter notice. It shall be unlawful for the treasurer, auditor or other disbursing officer of the commonwealth to draw, sign or issue, or to authorize the drawing, signing or issuing of, any warrant, or to make payment of any salary or compensation to the person so found by the board to be illegally employed.

The legislative action necessary to embody the above recommendations has been submitted by this Board in a draft of a bill.

Publication of this Document approved by the Supervisor of Administration.

BOARD OF RETIREMENT.

JAMES JACKSON, Chairman. WARREN A. MERRILL. JOHN E. FISH, M.D.

Division of Board of Retirement, 116 State House, Boston, March 6, 1922.

To the Honorable Senate and House of Representatives, State House, Boston,

Mass.

Gentlemen: — I transmit to you herewith, for the use of the Legislature, the annual report of the Board of Retirement for the fiscal year ending Nov. 30, 1921.

Very truly yours,

JAMES JACKSON,

Chairman.

REPORT.

Division of Board of Retirement, State House, Boston, March 6, 1922.

To the Honorable Senate and House of Representatives.

The tenth annual report of the Board of Retirement for the year ending Nov. 30, 1921, is herewith presented for your consideration.

The third term of Mr. Carl A. Raymond, the elected member of the Board by the members of the Retirement Association, who has served since it was organized in 1912, expired on Feb. 16, 1921. Mr. Raymond declined re-election, and the contest, held under the direction of the Commissioner of Insurance, resulted in the election of Mr. Warren A. Merrill of the Department of Mental Diseases for a term of three years.

The provisions of the contributory law have been in operation approximately ten years, and during that period of time amendments have been made to certain laws which were passed before the general contributory law, and which provided for the retirement of certain classes of employees under a non-contributory law, so that now all who enter the State or metropolitan district service, with the exception of certain veterans and judges, have no pension rights under a non-contributory law, but must be retired under the general contributory law. Veterans of the World or Spanish War may be retired under either the general contributory law or under a special non-contributory act.

The present fund consists of \$1,185,237.37, which has been deducted from the salary or wages of the members, and \$158,440.53, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts on Nov. 30, 1921, amounts to \$1,343,677.90.

The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$1.75 to each \$100 of each account as it stood on Sept. 30, 1920; the total thus credited amounted to \$17,465.43.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1917, $4\frac{1}{2}$ per cent; 1918, $4\frac{2}{5}$ per cent; 1919, $4\frac{2}{5}$ per cent; 1920, $4\frac{3}{4}$ per cent; 1921, $4\frac{3}{4}$ per cent. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof.

The membership of the Retirement Association when it was first organized was 3,324, and the membership on Nov. 30, 1921, was 6,997. When the contributory law was passed all persons in the service who were not provided with a pension under some non-contributory law were given the option of becoming a member of the association, and thus providing for themselves a pension. They had the option of accepting the pension privilege, and of those who declined to accept the right to a future pension, there appears to be only about 168 now in the service out of an average normal pay roll of about 11,500 employees, who by their own act are not entitled to any pension from the State.

During the year 1,752 new employees have become members of the association and 993 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 44 persons during the year, —18 by reason of reaching the age of seventy, 1 for permanent disability, and 25 between sixty and seventy years of age upon their own request.

The number of employees who have been granted a retirement allowance since the law became operative June 1, 1912, is 324. Since retirement 79 annuitants and 4 non-members have died, so that retirement allowances are now being paid to 241

former employees. Of this number, 83 were retired at the age of seventy or over; 8 were retired for permanent disability; 2 non-members, who were over fifty-five years of age when the retirement law was passed, were retired upon the requests of the departments in which they were employed; and 148 were retired upon their request between sixty and seventy years of age.

The following number at present ages, nearest birthday, are receiving a retirement allowance:—

		=										
	Ag	Е.	Number.		AGE.			Number.		Age		Number.

52			-	69				13	86		٠.	1
53			-	70				27	87			-
54			3	71				16	88			-
55			2	72				22	89			-
56			1	73		•		11				

During the year ending Nov. 30, 1921, \$72,318.13 was paid as pensions to persons upon the retired list as compared with \$63,159.09 for the previous year. The largest retirement allowance being paid to an individual is \$1,362.92. The average retirement allowance paid to the persons on the list Dec. 1, 1921, is \$355.

By chapter 487, Acts of 1921, an amendment was made to the law providing compensation to a widow during her widowhood, or if no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. One payment is now being made under this act.

The accumulated savings refunded to members who left the service were \$69,186.12, and the amount refunded to the heirs or estates of deceased members was \$7,282.50.

The retirement system has 300 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 14 under sixty years of age who have completed thirty-five years of service; and 15 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board had submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7 per cent of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$5,740 in addition to \$79,884.62, the amount of pensions in force on Nov. 30, 1921.

The expenses of the administration of the system for the year were: salaries, \$7,398.50; contingent expenses, \$1,045.05; reimbursement to institutions for making deductions from members' salaries, etc., \$2,347.10. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

RECOMMENDATIONS FOR LEGISLATION.

The Board recommends the following amendments to the State Retirement Act (chapter 32, General Laws, sections 1 to 5, inclusive):—

The Board of Retirement has been advised by the Attorney-General that under the terms of the statutes deductions can be made only from the compensation paid in money. Many persons in the service of State institutions are boarded and housed at the expense of the Commonwealth, and the scale of cash compensation paid is accordingly lower than it would be otherwise.

The basis upon which assessments are made is one of the most important factors in determining the quantum of a retirement allowance, and inequality in the amount of retirement allowance results under the existing law between employees who receive full compensation in cash and those who receive in addition to cash some other form of compensation.

Section one of chapter thirty-two of the General Laws is hereby amended by adding after the word "meanings", in the second line, the following: — "Salary or wages", cash received for regular services plus such allowance for other compensation not paid in cash as may be hereinafter

provided.

Section three of chapter thirty-two of the General Laws is hereby amended by adding at the end of said section the following new paragraph: — The board shall add to the cash payment for regular services in cases where a state institution employee receives a non-cash allowance to cover compensation, in the form of full or complete boarding and housing in accordance with the practice in such state institution, an amount at the rate of five dollars per week, which amount, added to the cash, shall be subject to annuity fund assessments.

To change the provisions of law in cases where a husband and wife are both employed by the State and one retires, the other may retire irrespective of age or length of service, so that the latter will only be entitled to a pension from the State equal to the annuity purchasable from his or her contributions, even though such pension and annuity may be less than the minimum provided for persons who have served the otherwise required period of years and attained the otherwise required age.

Section five of chapter thirty-two of the General Laws is hereby amended by striking out the following subparagraph of paragraph (2) C (b):—
"Where members of the association are husband and wife, if one of the two retires or is retired the other may also retire, and shall be paid a retiring allowance proportionate to the amount of his accumulated contributions to date, or, in case the allowance thus calculated is less than the minimum allowance hereinafter provided for, shall be paid that sum annually", and inserting in place thereof the following new subparagraph:

— Where members of the association are husband and wife, if one of the two retires or is retired the other may, irrespective of age and service, on the date on which the husband or wife is retired, be retired by the board,

and if so retired shall be paid at the attained age the retiring allowances provided under paragraph (2) B and C of this section; provided, however, that the minimum allowance provided under section five (2) E shall not apply to a member whose retirement allowance is granted under this paragraph.

It is recommended that legislation be passed to incorporate into the law these recommendations.

Respectfully submitted,

JAMES JACKSON, Chairman. WARREN A. MERRILL. JOHN E. FISH, M.D.

Division of Board of Retirement, 116 State House, Boston, March 17, 1923.

To the Honorable Senate and House of Representatives, State House, Boston, Massachusetts.

Gentlemen: — I transmit to you herewith for the use of the legislature the annual report of the Board of Retirement for the fiscal year ending November 30, 1922.

Very truly yours,

JAMES JACKSON, Chairman.

REPORT.

Division of Board of Retirement, State House, Boston, November 30, 1922.

To the Honorable Senate and House of Representatives.

The eleventh annual report of the Board of Retirement for the year ending

November 30, 1922, is herewith presented for your consideration.

The personnel of the Board remained unchanged during the year. In the annual report of the Board for the fiscal year 1921, the attention of the Legislature was requested upon the provisions of the statutes under which deductions could only be made from the compensation paid to members in cash. Nearly all of the members employed in the State institution service are boarded and housed in the institutions and the scale of cash compensation is lower than it would otherwise be. In order to adjust the inequality in the amount of the retirement allowances between those who receive full compensation in cash and those who receive in addition to cash full boarding and housing, the Legislature amended the law so that a nominal value is now provided in the law for the computation of assessments and the retirement allowances of those in the full maintenance group.

The Commonwealth has amended all of the laws which were passed prior to the General Contributory law under which a non-contributory form of pension was provided for certain classes of employees so that now new entrants in such positions have no right to a non-contributory pension. The Legislature has only passed one law for the payment of a non-contributory pension to any preferred class of employees since the General Contributory law was passed. A non-contributory form of pension was provided in 1920 for veterans of the Spanish and World wars. This group of employees have a dual pension right as they may be retired under either the General Contributory law or under the special non-contributory law, just mentioned. A veteran retired under the non-contributory law will waive the other pension and will be paid back all of his contributions with interest in the contributory system. Other than this exception the Commonwealth has firmly maintained and extended the contributory pension principles. A feature, which can scarcely be too much emphasized, is the necessity which the contributory system imposes upon the members to save money.

The contributory law has been in operation since January 1, 1912, approximately eleven years, and the present fund consists of \$1,438,020.63, which has been deducted from the salary or wages of the members, and \$207,209.14, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts on November 30, 1922, amounts to \$1,645,229.77.

The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$1.75 to each \$100 of each account as it stood on September 30, 1921; the total thus credited amounted to \$21,764.11.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1918, $4\frac{2}{5}\%$; 1919, $4\frac{2}{5}\%$; 1920, $4\frac{3}{4}\%$; 1921, $4\frac{3}{4}\%$; 1922, $4\frac{3}{4}\%$. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths

and subdivisions thereof.

The membership of the Retirement Association when it was first organized was 3,324, and the membership on November 30, 1922, was 7,648. When the contributory law was passed all persons in the service who were not provided with a pension under some non-contributory law were given the option of becoming a member of the association, and thus providing for themselves a pension. They had the option of accepting the pension privilege, and of those who declined to accept the right to a future pension, there appears to be only about 143 now in the service out of an average normal pay roll of about 11,500 employees, who by their own act are not entitled to any pension from the State.

During the year 2,014 new employees have become members of the association and 1,325 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 38 persons during the year, — 12 by reason of reaching the age of seventy, 2 for ordinary permanent disability, and 24 between sixty and seventy years of age upon their own request.

The number of employees who have been granted a retirement allowance since the law became operative June 1, 1912, is 362. Since retirement 95 annuitants and 4 non-members have died, so that retirement allowances are now being paid to 263 former employees. Of this number, 87 were retired at the age of seventy or over; 8 were retired for permanent disability; 2 non-members, who were over fifty-five years of age when the retirement law was passed, were retired upon the request of the departments in which they were employed; and 166 were retired upon their request between sixty and seventy years of age.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

56				1	73			٠	18						

During the year ending November 30, 1922, \$83,599.89 was paid as pensions to persons upon the retired list as compared with \$72,318.13 for the previous year. The largest retirement allowance being paid to an individual is \$1,557.47. The average retirement allowance paid to the persons on the list December 1, 1922, is \$372.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. One payment is

now being made under this act.

The accumulated savings refunded to members who left the service were \$84,861.03, and the amount refunded to the heirs or estates of deceased members

was \$15,662,35.

The retirement system has 329 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 19 under sixty years of age who have completed thirty-five years of service; and 16 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$6,094 in addition to \$91,877.03, the amount of pensions in force on November 30, 1922.

The expenses of the administration of the system for the year were: salaries, \$7,465.00; contingent expenses, \$832.02; reimbursement to institutions for making deductions from members' salaries, etc., \$2,640.68. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable

cost of operating the system.

RECOMMENDATIONS FOR LEGISLATION.

The Board recommends the following amendments to the State Retirement

Act (chapter 32, General Laws, sections 1 to 5, inclusive):

When a member of the association retires, the contributions from his salary and the interest credited to his account are used to purchase an annuity. The State pays a pension and the sum of the pension and the annuity make the total payment called retirement allowance. The form of annuity selected has no effect on the amount of PENSION which is paid from STATE APPROPRIATIONS.

The two parts of a retirement allowance are paid from different funds, and inasmuch as the annuity is paid from an accumulated sum based upon salary deductions, the member at retirement has a choice of one of TWO annuity options

as follows: -

Option A — Full Annuity.

This form of annuity is payable for life, and all payments cease upon death.

Option B — Refund.

The annuity payments under this form are payable for life and are smaller than those provided under Option A, but if the annuitant dies before receiving annuity payments equal to the amount used to purchase the annuity, the difference will be paid to his legal representative. The Option B annuity under the present law may be paid to only the members whose accounts are large enough at the age when they retire to provide such an annuity of \$100 or more.

The Board believes that the amount of the account to purchase the annuity should not prevent a member from electing a form of annuity which may provide something for his estate in case conditions indicate to him that he should make

such a choice.

It is important that the election of the refund annuity should not require the State to pay a larger pension on account of the smaller annuity under the refund plan, and that the amount of the total retirement allowance in each case be kept on the basis of equivalents to fill the particular benefits which the member wishes to provide.

Section 1. Section five of chapter thirty-two of the General Laws, as amended by sections three and four of chapter three hundred and forty-one of the acts of nine-teen hundred and twenty-two, is hereby further amended by striking out paragraph (2) B (b) and inserting in place thereof the following:— (b) A life annuity of less amount, payable monthly, with the provision that if the annuitant dies before receiv-ing annuity payments equal to the amount used to purchase the annuity, the difference shall be paid to his legal representatives. by sections three and four of chapter three hundred and forty-one of the acts of nine-

Section 2. Said section five, as amended by sections three and four of said chapter three hundred and forty-one, is hereby further amended by striking out paragraph (2) E and inserting in place thereof the following:—E. Minimum and Maximum Payments.—Except as otherwise provided, in no case shall a member be retired at a rate of pension less than such an amount that the annual pension plus the annual amount which would have been paid from the annuity fund if the member had chosen an annuity computed under 2 B (a) of this section shall be three hundred dollars and in no case shall a member be retired with a pension in excess of the amount which added to the annuity to which he would have been entitled if he had chosen the annuity under $2\ B\ (a)$ of this section would provide a total retirement allowance of more than one half the average annual rate of his salary or wages during the five years prior to retirement. The rate of pay received by a member on the date immediately preceding a period of absence without pay shall be used as the rate of pay which he would have received during the absence without pay for the purpose of determining the maximum pension and the maximum annuity under this section.

Respectfully submitted.

JAMES JACKSON, Chairman. WARREN A. MERRILL. JOHN E. FISH, M.D.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1923

DEPARTMENT OF TREASURER AND RECEIVER-GENERAL

MASS. DOCS.

REPORT

Division of Board of Retirement, State House, Boston, November 30, 1923.

To the Honorable Senate and House of Representatives.

The twelfth annual report of the Board of Retirement for the year ending Novem-

ber 30, 1923, is herewith presented for your consideration.

The personnel of the Board remained unchanged during the year. By chapter 205, 1923, the legislature amended the refund annuity option of the law, as outlined in the recommendations of the Board in the eleventh annual report for the year ending November 30, 1922.

The contributory law has been in operation since January 1, 1912, approximately twelve years, and the present fund consists of \$1,681,011.73, which has been deducted from the salaries or wages of the members, and \$268,431.48 which has been credited as interest and extra dividends to the members' accounts, so that the total

of the accounts on November 30, 1923, amounts to \$1,949,443.21.

The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$2.00 to each \$100 of each account as it stood on September 30, 1922; the total thus credited amounted to \$30,094.46.

The interest derived from the investment of the annuity funds has provided for

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1919, 42%; 1920, 43%; 1921, 43%; 1922, 43%; 1923, 5%. The annuity Fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof.

The membership of the Retirement Association when it was first organized was 3,324, and the membership on November 30, 1923, was 7,612. When the contributory law was passed all persons in the service who were not provided with a pension under some non-contributory law were given the option of becoming members of the association, and thus providing for themselves a pension. They had the option of accepting the pension privilege, and of those who declined to accept the right to a future pension, there appears to be only about 143 now in the service out of an average normal pay roll of about 11,500 employees, who by their own act are not

entitled to any pension from the State.

During the year, 1,616 new employees have become members of the Association and 1,604 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 48 persons during the year, — 19 by reason of reaching the age of seventy, 4 for ordinary permanent disability, 2 with thirty-five or over years of service under age 60, and 23 between sixty and seventy years of age upon their own request. The total of the retiring allowances of the 48 employees retired during the year 1923 is \$22,191.29. Of this amount, \$3,051.88 was annuity derived from the contributions made by the members before retirement and the balance was pension paid from State appropriation.

The following statistics relate to the 48 employees who were retired during the fiscal year 1923.

)	Cases.	Average Age at Retire- ment.	Average Length of Service.	Average Salary Last 5 Years.	Average Annuity.	Average Pension.	Average Retiring Al- lowance.
Disability cases	444	55 66	21 26	\$1,528 1,415	\$50 00 65 00	\$260 411	\$310 476
Total for year	48	66	26	\$1,425	\$64 00	\$400	\$462

P.D. 99.

The number of employees who have been granted a retirement allowance since the law became operative June 1, 1912, is 410. Since retirement 110 annuitants and 5 non-members have died, so that retirement allowances are now being paid to 295 former employees. Of this number 101 were retired at the age of seventy or over; 12 were retired for permanent disability; 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed; and 181 were retired upon their request between sixty and seventy years of age.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

	A	GE.	No.		Ac	ЭE.	No.		A	JE.	No.		Ag	e.	No.
40 41 42 43 44 45 46 47 48 49 50 51 52			1 1	53 54 55 56 57 58 59 60 61 62 63 64 65			2 2 2 4 2 1 4 4 6 9 6 10 7	66 67 68 69 70 71 72 73 74 75 76 77			10 16 12 21 32 19 26 19 18 9 12 10	79 80 81 82 83 84 85 86 87 88 89	Total	:	3 5 2 2 1 1 1 2 - 1 -

The average age of persons on the retired list is 70.07 years.

During the year ending November 30, 1923, \$98,245.27 was paid as pensions to persons upon the retired list as compared with \$83,599.89 for the previous year. The largest retirement allowance being paid to an individual is \$1,363.00. The average retirement allowance paid to the persons on the list December 1, 1923, is \$382.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. One payment is now being made under this act.

The accumulated savings refunded to members who left the service were \$140,359,66 and the amount refunded to the heirs or estates of deceased members

was \$11.624.07.

The retirement system has 318 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 18 under sixty years of age who have completed thirty-five years of service; and 17 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$5,866.00 in addition to \$103,634.00, the amount of pensions in force on November 30, 1923. The expenses of the administration of the system for the year were: salaries

The expenses of the administration of the system for the year were: salaries \$7,790.16; contingent expenses, \$836.92; reimbursement to institutions for making deductions from members' salaries, etc., \$2,932.32. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of oper-

ating the system.

Respectfully submitted,

JAMES JACKSON, Chairman. WARREN A. MERRILL. JOHN E. FISH, M.D.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

Year Ending November 30, 1924

Department of Treasurer and Receiver-General

ASS.

Publication of this Document
approved by the
Commission on Adminstration and Finance

REPORT

Division of Board of Retirement, State House, Boston, November 30, 1924.

To the Honorable Senate and House of Representatives.

The thirteenth annual report of the Board of Retirement for the year ending November 30, 1924, is herewith presented for your consideration.

The personnel of the Board remained unchanged during the year.

The contributory law has been in operation since January 1, 1912, approximately thirteen years, and the present fund consists of \$1,971,536.06, which has been deducted from the salaries or wages of the members, and \$343,000.42, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on November 30, 1924, amounts to \$2,314,536.48.

The annuity reserve for the payment of annuities to members on the retired list December 31, 1924, was \$103,211.44, and the gross assets on said date were \$2,567,712.86. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$2.00 to each \$100 of each account as it stood on September 30, 1923; the total thus credited amounted to \$36.159.50.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1920, 43/4%; 1921, 43/4%; 1922, 43/4%; 1923, 5%; 1924, 5%. The annuity Fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof.

The membership of the Retirement Association when it was first organized

was 3324, and the membership on November 30, 1924, was 8273.

During the year, 1971 new employees have become members of the Association and 1259 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 51 persons during the year,—16 by reason of reaching the age of seventy, 4 for ordinary disability, 1 for permanent disability resulting from accidental injury in line of duty, 1 with thirty-five or more years of service under age 60, and 29 between sixty and seventy years of age upon their own request. The total of the retiring allowances of the 51 employees retired during the year 1924 is \$21,351.89. Of this amount, \$3,626.50 was annuity derived from the contributions made by the members before retirement and the balance was pension paid from State appropriation.

The following statistics relate to the 51 employees who were retired during the

fiscal year 1924.

	Cases.	Average Age at Retire- ment.	Average Length of Service.	Average Salary Last 5 Years.	Average Annuity.	Average Pension.	Average Retiring Al- lowance.

60 or over	46	67	25	1,628	75.00	350	447
Total for year .	51	65	25	\$1,492	\$71.00	\$347	\$419

The number of employees who have been granted a retirement allowance since the law became operative June 1, 1912, is 461. Since retirement 127 annuitants and 5 non-members have died, so that retirement allowances are now being paid to 329 former employees. Of this number 114 were retired at the age of seventy or over; 16 were retired for permanent disability either ordinary or accidental; 1 non-member who was over fifty-five years of age when the retire-

P.D. 99

ment law was passed, was retired upon the request of the department in which he was employed; and 198 were retired upon their request between sixty and seventy years of age.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

	AGE.	No.		AGE.	No.		AGE.	No.		Ac	ЭE.	No.
40 41 42 43 44 45 46 47 48 49 50 51		1 1 1	53 54 55 56 57 58 59 60 61 62 63 64 65		1 2 2 3 3 2 5 5 8 6 9 9 15	66 67 68 69 70 71 72 73 74 75 76 77		 9 10 18 14 37 30 19 25 17 18 9	79 80 81 82 83 84 85 86 87 88 89	otal		11 3 5 2 2 1 1 1 2 - 1

The average age of persons on the retired list is 67.93 years.

During the year ending November 30, 1924, \$110,348.44 was paid as pensions to persons upon the retired list as compared with \$98,245.27 for the previous year. The largest retirement allowance being paid to an individual is \$1,363.00. The average retirement allowance paid to the persons on the list December 1, 1924 is \$385.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the members' rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. One payment is now being made under this act.

The accumulated savings refunded to members who left the service were \$128,464.12 and the amount refunded to the heirs or estates of deceased members

was \$9.906.51.

The retirement system has 357 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 19 under sixty years of age who have completed thirty-five years of service; and 20 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$7,400 in addition to \$116,952.57, the amount of pensions in force on November 30, 1924.

The expenses of the administration of the system for the year were: Salaries \$8,371.39; contingent expenses, \$683.08; reimbursement to institutions for making deductions from members' salaries, etc., \$2,999.76. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable

cost of operating the system.

The Board believes that the State contributory law should allow credit for the service of an employee to a county when immediately prior to entering the service of the State, he was employed by a county where he was provided with a contributory or non-contributory form of county pension law. The Board favors legislation provided the county shall pay the total cost of the pension for the service rendered solely to the county, and in the case where the salary was received in part from the State and in part from the county, that each shall pay the cost of the pension in the same proportion as the salary was paid during the period of employment, and that the amount of pension shall be computed according to the formular provided in the State contributory law.

Respectfully submitted,

JAMÉS JACKSON, Chairman. WARREN A. MERRILL. JOHN E. FISH, M. D. 4

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

Year Ending November 30, 1925

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

Division of Board of Retirement, State House, Boston, November 30, 1925.

To the Honorable Senate and House of Representatives.

The fourteenth annual report of the Board of Retirement for the year ending

November 30, 1925, is herewith presented for your consideration.

The contributory law has been in operation since January 1, 1912, approximately fourteen years, and the present fund consists of \$2,249,522.89, which has been deducted from the salaries or wages of the members, and \$428,228.62, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on November 30, 1925, amounts to \$2,677,751.51.

The annuity reserve for the payment of annuities to members on the retired list December 31, 1925, was \$121,120.00, and the gross assets on said date were \$2,939,150.89. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$2.00 to each \$100 of each account as it stood on September 30, 1924; the total thus credited

amounted to \$42,619.06.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1921, $4\frac{3}{4}\%$; 1922, $4\frac{3}{4}\%$; 1923, 5%; 1924, 5%; 1925, 5%. The annuity Fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof.

The contributing members of the Retirement Association when it was first organized was 3,324, and the contributing members on November 30, 1925, was

8,368.

During the year, 1,781 new employees have become members of the Association and 1,651 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 35 persons during the year, 21 by reason of reaching the age of seventy, 4 for ordinary disability, 1 for permanent disability resulting from accidental injury in line of duty, and 9 between sixty and seventy years of age upon their own request. The total of the retiring allowances of the 35 employees retired during the year 1925 is \$17,635.40. Of this amount, \$3,242.06 was annuity derived from the contributions made by the members before retirement and the balance was pension paid from State appropriation.

The following statistics relate to the 35 employees who were retired during the

fiscal year 1925:

	Cases	Average Age at Retire- ment.	Average Length of Service.	Average Salary Last 5 Years.	Average Annuity.	Average Pension.	Average Retiring Al- lowance.
Disability cases	5	57	21	\$1,445	\$49	\$348	\$397
	30	68	25	1,598	97	362	459
	35	67	25	\$1,578	\$90	\$360	\$450

The number of employees who have been granted a retirement allowance since the law became operative, June 1, 1912, is 496, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 3. Since retirement 146 annuitants and 5 non-members have died, so that retirement allowances are now being paid to 345 former employees. Of this number 124 were retired at the age of seventy or over; 18 were retired for ordinary permanent disability, and 2 were retired for permanent accidental disability because of such injuries received in the line of duty; 1 non-

member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed; and 200 were retired upon their request between sixty and seventy years of age.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the members' rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Three payments are now being made under this act. The largest payment to a widow is \$750.00; the average is \$614.28.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

Age.	No.	Age.	No.	Age.	No.	Age.	No.
40	1 - 1 - 1	53	1 1 3 2 5 3 2 7 6 8 9 10	66	15 11 9 17 30 36 31 17 24 17 16 8 12	79	7 9 3 4 2 2 2 1 0 1 0 1 345

The average age of persons on the retired list is 70.46 years.

During the year ending November 30, 1925, \$120,003.93 was paid as pension to persons upon the retired list as compared with \$110,348.44 for the previous year. The largest retirement allowance being paid to an individual is \$1,770.96. The average retirement allowance paid to the persons on the list December 1, 1925, is \$395.00.

The accumulated savings refunded to members who left the service were \$179,155.99, and the amount refunded to the heirs or estates of deceased members was \$19,231.32.

The retirement system has 385 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 22 under sixty years of age who have completed thirty-five years of service; and 21 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$7,800 in addition to \$119,935.00, the amount of pensions in force on November 30, 1925. The Board has requested an appropriation of \$128,000 to cover the cost of pensions for the year ending November 30, 1926.

The expenses of the administration of the system for the year were: Salaries, \$8,584.28; contingent expenses, \$789.62; reimbursement to institutions for making deductions from members' salaries, etc., \$3,000.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

AMENDMENTS AND ADDITIONS TO THE RETIREMENT LAW PASSED BY THE GENERAL COURT DURING THE SESSION OF 1925.

A new provision was added to the law under Chapter 244. Acts of 1925, so that a contributing member may name a surviving beneficiary who will be paid the sum of the member's deposits with accumulated interest in the Annuity Fund if the member prior to his death files in proper form a beneficiary appointment. The same option is provided for the retired member who at the time of his retirement elected the form of annuity which provided for the payment of the

difference between the amount of his account at the time of his retirement and the sum of the annuity payments received by him up to the date of his death.

The three provisions of the law regarding the payment of the contributions with interest after the death of a member of the Retirement Association are as follows:—

WHEN NO BENEFICIARY HAS BEEN DESIGNATED:

(1) The account of a member when over \$100.00 must be paid to his executor or administrator.

(2) The account when under \$100.00 and when there has been no demand upon the Retirement Board by a duly appointed executor or administrator may be paid AFTER THE EXPIRATION OF THREE MONTHS from the date of death of the member to such person or persons as appear in the judgment of the Retirement Board to be entitled thereto, and such payment shall be a bar to recovery by any other person.

PAYMENT TO A BENEFICIARY:

(3) Any member by a written instrument duly executed by him and FILED with the Retirement Board prior to his death may nominate a beneficiary to receive any sum to which his heirs or legal representatives would otherwise be entitled (under I or 2) and payment to such beneficiary shall be a bar to recovery by any other person. A member may change a beneficiary should he later desire to do so, and payment will be made to the last beneficiary appearing in the records of the Retirement Board at the death of such member.

Chapter 244, Acts of 1925, also added another new provision to the law, which allows a member who resigns from the service when he is eligible to retirement the option of taking his accumulated savings in the annuity fund or being retired. In order to obtain his accumulated savings, a member is required to waive and release by a written instrument all of his, his heirs', assigns', legal representatives' or beneficiary's rights in the annuity and pension funds.

A retirement allowance will not be forced upon any employee who does not want to be classed in any way a public pensioner even when only fifty per cent at the most will come from the public treasury, as in most cases the annuity which comes from the member's own savings will ultimately be one-half of the retirement

allowance.

Chapter 12, Acts of 1925, amended the law so that an instructor of the blind or a teacher or principal of a state normal school or college where classes are graded or conducted by a school year or term who reaches age seventy may remain until the end of said term or year; except, that any person reaching said age in July, August, or September shall be retired. By this statute the Legislature recognizes the importance of permitting a short extension of service so that an instructor may carry through a course of study and not have his working plan interrupted at a most critical time by his compulsory retirement at age seventy.

Respectfully submitted,

WILLIAM S. YOUNGMAN, Chairman. WARREN A. MERRILL. JOHN E. FISH, M. D.

KARL H. OLIVER, Notary Public.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

Year Ending November 30, 1926

Department of Treasurer and Receiver-General

MASS. DOCS.

REPORT

Division of Board of Retirement, State House, Boston, December 31, 1926.

To the Honorable Senate and House of Representatives.

The fifteenth annual report of the Board of Retirement is herewith presented for your consideration.

The contributory law has been in operation since January 1, 1912, approximately fifteen years, and the present fund consists of \$2,608,522.38, which has been deducted from the salaries or wages of the members, and \$557,985.68 which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1926 amounts to \$3,166,508.06.

The annuity reserve for the payment of annuities to members on the retired list December 31, 1926 was \$135,742.00, and the gross assets on said date were \$3,354,894.11. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$1.75 to each \$100 of each account as it stood on September 30, 1925. The total thus credited amounted to \$43,165.65.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1922, 434%; 1923, 5%, 1924, 5%; 1925, 5%; 1926, 434%. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service were \$207,183.07, and the amount refunded to the heirs or estates of deceased members was \$34,866.53.

The contributing members of the Retirement Association when it was first organized were 3,324, and the contributing members on November 30, 1926, were 8,693.

During the year ending November 30, 1926, 1867 new employees have become members of the Association and 1,507 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 37 persons during the year, 17 by reason of reaching the age of seventy, 3 for ordinary disability, 2 for permanent disability resulting from accidental injury in line of duty, 1 under age sixty who had completed thirty-five years of service retired voluntarily, and 14 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 37 employees retired during the year ending November 30, 1926 is \$19,846.40. Of this amount, \$3,865.10 was annuity derived from the contributions made by the members before retirement and the balance was pension paid from State appropriation.

The following statistics relate to the 37 employees who were retired during the year November 30, 1926.

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Al- lowance

Total for year	37	66.45	22.68	\$1680.	\$104.47	\$431.92	\$536.39

The number of employees who have been granted a retirement allowance since the law became operative, June 1, 1912, is 532, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 3. Since retirement 178 annuitants and 5 non-members have died, so that retirement allowances are now being paid to 349 former employees. Of this number 123 were retired at the age of seventy or over; 186 were retired upon their request between sixty and seventy years of age; 12 were retired with 35 years of service under age sixty; 4 were wives retired at time of retirement of husbands; 19 were retired for

3 P.D. 99

ordinary permanent disability, and 4 were retired for permanent accidental disability because of such injuries received in the line of duty: 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the

request of the department in which he was employed.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the members' rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Three payments are now being made under this act. The largest payment to a widow is \$750.00; the average is \$614.28.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

Age	No.	Age	No. Age	No.	Age	No.
40	1 - 1 - 1 - 2 - 2 -	53	66	13 17 12 12 33 28 32 25 16 24 14 14 18	79	7 7 7 7 3 3 2 1 2 1 - 1 349

The average age of persons on the retired list is 70.46 years.

During the year ending November 30, 1926, \$128,330.75 was paid as pensions to persons upon the retired list as compared with \$120,003.93 for the previous year. The largest retirement allowance being paid to an individual is \$1.960.74. annuity from the savings of the retired member is \$207.16 and the pension paid by the State is \$1,753.58. The average retirement allowance paid to the persons on the list November 30, 1926, is \$413.97.

The retirement system has 389 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 20 under sixty years of age who have completed thirty-five years of service; and 21 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$6,200 in addition to \$132,800.00, the amount of pensions in force on November 30, 1926. The Board has requested an appropriation of \$139,000 to cover the cost of pensions for the year ending November 30, 1927.

The expenses of the administration of the system for the year were: Salaries, \$8,998.15; contingent expenses, \$649.08; reimbursement to institutions for making deductions from members' salaries, etc., \$3,000.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operat-

ing the system.

(2)

AMENDMENT TO THE RETIREMENT LAW PASSED BY THE GENERAL COURT DURING THE SESSION OF 1926.

Under Chapter 300, Acts of the year 1926 a member who has at some time contributed 3% of his salary or wages and who has changed or shall change to the 5% basis of contribution may make up the amount due to make his account equal to the sum which 5% contributions would have amounted to for the period during which he contributed 3% of his salary or wages.

The law provides for the payment of the amount due as follows:

- Members under sixty years of age may pay the amount in one sum or,
 - may pay the amount by installments, but all installments must be (b) paid within five years or before the member reaches age sixty. Members over sixty must pay the amount due in one sum.

4

At the time of retirement a member who pays the sum will have the pensions for all of his service plus the annuity figured on what 5% contributions will provide in a retirement allowance. All of the service includes the service during which actual contributions were made to the Annuity Fund and also the service prior to June first, nineteen hundred and twelve, where the pension under paragraph (2) C (b) sec. 5, Chapter 32, General Laws, is figured on assumed contributions from the salary received

RECOMMENDATION.

Members of the Retirement Association for employees of the Commonwealth are required by law to contribute a per cent of their salary or wages at the time of each payment. These contributions are kept by the State in an Annuity Fund and invested in securities legal for the investment of the sinking funds of the Common-The income from the investment of the Annuity Fund is credited as interest to the members' accounts compounded semi-annually on June 30th and December "Regular interest." as defined in the law, will not permit the Board to pay to a member who leaves the State service between compound interest dates any additional interest for the period from the previous compound interest date to the time of termination of service; nor will it allow his account to remain in the fund until after the succeeding compound interest date in order not to suffer loss of interest. The estate of a deceased member who died while in the service will not receive any additional interest for the period of service subsequent to the last compound interest date even though the law in certain instances requires that payment of the accounts shall not be made until three months from the date of death of the member. The Board of Retirement recommends that the law be amended so that interest may be computed on the amount of a member's account at the last compound interest date from said date to the first day of the month in which service ended in the case of retirement or refund, or to the first day of the month in which payment is made in the case of death while in the service.

Respectfully submitted,
WILLIAM S. YOUNGMAN, Chairman.
WARREN A. MERRILL.
JOHN E. FISH

A figure in parentheses in any column shows the number of pensioners under each system November 30; under contributory systems the figures represent the amount paid by the State, plus the annuities paid from members contributions.

Public school teachers with fifteen verse red service who served prior to July 1, 1914 (five preceding retirement), minimum, \$400. Under State Employees' Act of 1911, minimum of \$200 to all retired prior to Aug. 26, 1920, and \$300 to all retired after said date.

Pensions paid by the State and by the several counties in the same proportion as the salaries were paid at the time of retirement.

Comparative Financial Statement as of December 31st.

WILLIAM S. YOUNGMAN WARREN A. MERRILL Board of Retirement. JOHN E. FISH

Subscribed and sworn to before me this fourteenth day of February, 1927.

WALTER S. KENDALL, Notary Public.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

Year Ending November 30, 1927

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

REPORT

Division of Board of Retirement, State House, Boston, December 31, 1927.

To the Honorable Senate and House of Representatives.

The sixteenth annual report of the Board of Retirement is herewith presented

for your consideration.

The personnel of the Board consists of three members. Two changes in the Board membership occurred during the year. Mrs. Elizabeth F. Moloney was elected for a term of three years beginning February 16, 1927, upon ballots cast by members of the Retirement Association as the employee representative member of the Board. Dr. Clarence L. Scamman was appointed as third member by Mr. William S. Youngman, State Treasurer, chairman ex officio, and Mrs. Moloney. Mrs. Moloney is the first woman to serve as a member of the Board.

The contributory law has been in operation since January 1, 1912, approximately sixteen years, and the present fund consists of \$2,963,613.57, which has been deducted from the salaries or wages of the members, and \$671,727.15, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1927, amounts to

\$3,635,340.72.

The annuity reserve for the payment of annuities to members on the retired list December 31, 1927, was \$161,737.00, and the gross assets on said date were \$3,855,584.53. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited an extra dividend of \$1.75 to each \$100. of each account as it stood on September 30, 1926. The total thus credited amounted

to \$49,689.84.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1923, 5%; 1924, 5%; 1925, 5%; 1926, 4¾4%; 1927, 4¾4%. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service were \$176,068.64, and the amount refunded to the heirs or estates of deceased members was \$24,602.86.

The contributing members of the Retirement Association when it was first organized were 3,324, and the contributing members on November 30, 1927, were 8,924; males, 5,051; females, 3,873. There are 267 accounts payable of former members who left the service between 1912–1927 inclusive, amounting to \$6,068.20.

The following statistics relate to the 45 employees who were retired during the

vear November 30, 1927.

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Al- lowance
Disability Ordinary	5 3 37	55.80 50.33 67.46	24.80 23.00 25.62	\$2071. 1719. 1715.	\$52.12 66.93 118.83	\$242.52 689.69 423.79	\$294.64 756.62 542.62
Total for year	45	65.02	25.33	\$1755.	\$107.96	\$442.51	\$545.81

During the year ending November 30, 1927, 1,820 new employees have become members of the Association and 1,310 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 45 persons during the year, 20 by reason of reaching the age of seventy, 5 for ordinary disability, 3 for permanent disability resulting from accidental injury in line of duty, (0) under age sixty who had completed thirty-five years of service retired voluntarily, and 17 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 45 employees retired

during the year ending November 30, 1927, is \$23,817.17. Of this amount, \$4,855.13 was annuity derived from the contributions made by the members before retirement and the balance of \$18,962.04 was pension paid from State appropriation. Two widows of members were granted annual pensions amounting to \$1,836.00 on account of the death of the husband from injuries received in line of duty. The widows' pension is paid for life or until remarriage.

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1927 (AGE NEAREST BIRTHDAY)

Widows not included

Sex	Under 60	60	61	62	63	64	65	66	67	68	69	70	Total
Males Females	29 25	26 19	17 14	17 6	12 14	17 8	18 10	26 7	22 4	20 14	12 5	195 41	411 166
Totals	54	45	31	23	26	25	28	33	26	34	17	236	577

The number of employees who have been granted a retirement allowance since the law became operative, June 1, 1912, is 577, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 5. Since retirement 205 annuitants and 5 non-members have died, so that retirement allowances are now being paid to 372 former employees. Of this number 133 were retired at the age of seventy or over; 194 were retired upon their request between sixty and seventy years of age; 12 were retired with 35 years of service under age sixty; 4 were wives retired at time of retirement of husbands; 21 were retired for ordinary permanent disability; 7 were retired for permanent accidental disability because of such injuries received in the line of duty; 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Five payments are now being made under this act. The largest payment to a widow is \$936.00; the

average is \$735.77.

Present Ages and Number of Persons who are receiving a Retirement Allowance.

Age	No. Age	No.	'Age No.	Age	No.
40	1 53 - 54 - 55 - 55 - 55 - 57 - 58 - 59 - 60 - 1 61 - 63 - 64 - 2 65	- 1 66 67 67 68 68 69 69 69 69 69 69 69 69 69 69 69 69 69		79	8 7 6 5 2 3 2 1 2 1 - 1

The average age of persons on the retired list is 70.83 years.

There was also paid during said year in annuities \$20,618.24 from the annuity reserve fund represented by the deposits and interest credited to each member's account at the time of his retirement. This amount may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

During the year ending November 30, 1927, \$133,028.54 was paid as pensions to persons upon the retired list as compared with \$128,330.75 for the previous year. The largest retirement allowance being paid to an individual is \$1,770.96 composed

P. D. 99

of an annuity paid from the savings of the retired member of \$178.03 and a pension paid by the State of \$1,592.93. The average retirement allowance paid to the persons on the list November 30, 1927, is \$423.84. The total annual retirement allowances of persons on the list November 30, 1927, is \$162,448.03, divided as follows: annuities, \$22,453.01; pensions, \$139,995.02 (widows' pensions, \$3,678.85, and 3 extra pensions by legislative act amounting to \$1,220.00, included).

The retirement system has 437 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 27 under sixty years of age who have completed thirty-five years of service; and 25 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 7% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$7,100. in addition to the amount of pensions in force on November 30, 1927. The Board has requested an appropriation of \$146,500. to cover the cost of pensions for the year ending November 30, 1928.

The expenses of the administration of the system for the year were: Salaries, \$9,212.51; contingent expenses, \$829.83; adding machine, \$467.70; reimbursement to institutions for making deductions from members' salaries, etc., \$3,500.00. The reimbursement to State institutions is purely a bookkeeping transaction to

show the probable cost of operating the system.

The law provides that the minimum retirement allowance shall be based upon the form of annuity which gives the largest return from the employees' accumulated savings and which form of annuity does not provide any payments to the estate in case of the early death of the retired employee. The age at retirement, length of service, rate and amount of contribution, and the rate of interest credited to such contributions during employment are the factors which determine the amount of pension or annuity. The Board believes that the minimum retirement allowance should not be less than four hundred and eighty dollars per year in case a member has purchased the largest amount of annuity possible under the terms of the law (contributed 5%) during a period of State service long enough to be considered a reasonable proportion of the average working period.

AMENDMENT TO THE RETIREMENT LAW PASSED BY THE GENERAL COURT DURING THE SESSION OF 1927

Under Chapter 101, Acts of the year 1927, the law was amended so that additional interest may be credited to the account of a member who leaves the service between compound interest dates. In such cases the law now provides that additional interest shall be credited at the rate prescribed for "regular interest" and figured on the amount of the account at the last compound interest date for the period from said date to the first day of the month in which the member left, or, if the member dies while in the service or is retired, up to the first day of the month in which the refund is made or retirement becomes effective, as the case may be. Previous to this amendment, a member who left the State service between compound interest dates (June 30th, December 31st) did not receive any additional interest for any period after the last compound interest date, nor would the law permit an account to remain in the fund until after the succeeding compound interest date in order not to suffer loss of interest.

RECOMMENDATIONS FOR LEGISLATION

The Board of Retirement recommends striking out paragraph (8) of section 2 of chapter 32 of the General Laws, and the substitution of a new paragraph (8) to correct the ambiguous language of this paragraph caused at the time of the consolidation of the laws. The Board does not recommend any change in the law which will increase or decrease the present provisions of the law regarding the amount of retirement allowance to be paid to persons retired because of permanent disability from ordinary causes in the course of their employment.

P. D. 99

The retirement law provides for the retirement of persons suffering from permanent disability resulting from injuries received through no fault of their own in the course of their employment, and if death results from such injury certain payments are made to the widow or minor children. The Board recommends the addition of a new paragraph (11) to section 2, so that the Commonwealth will only grant such disability pension to a member, or the death benefits to his widow or minor children, when the "injuries" received by the employee, fatal or otherwise, came as a natural and proximate result of an accident occurring within the scope of duty without contributory negligence on the part of the employee.

Respectfully submitted,

WILLIAM S. YOUNGMAN, Chairman. ELIZABETH F. MOLONEY. CLARENCE L. SCAMMAN.

paid by the State, plus the annuities paid from members' contributions.

Publis school traceners with fiften years of service who served prior to July 1, 1914 (five preceding retirement), minimum, \$400. Under State Employees' Act of 1911, minimum of \$200 to all retired prior to Aug. 26, 1920, and \$300 to all retired after said date.

Only the pension paid by the State. The total pension is paid jointly by the State and the County in the same proportion as the salaries were paid at the time of retire-A figure in parentheses in any column shows the number of pensioners under each system November 30; under contributory systems the figures represent the amount

ment. The County payment is not stated.

Comparative Financial Statement as of December 31st.

"'Regular Interest,' interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months' periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i. e., 1927, 3 + 1 3-4=4 3-4%.

Notice.—The figures given in this statement are on the basis of the year ending December thirty-first

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1928

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

The Commonwealth of Massachusetts

REPORT

Division of Board of Retirement, State House, Boston, December 31, 1928.

To the Honorable Senate and House of Representatives:

The seventeenth annual report of the Board of Retirement is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributary law has been in operation since January 1, 1912, approximately seventeen years, and the present fund consists of \$3,332,893.55, which has been deducted from the salaries or wages of the members, and \$799,227.84, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1928, amounts to \$4,132,121.39.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1928, was \$189,304.00, and the gross assets on said date were \$4,381,416.52. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1928, \$57,188.94 as an extra dividend at the rate of one and three quarters per cent on the dollars standing to the credit of such accounts on September 30, 1927. Regular interest amounting to \$110,988.17 was also credited to members' accounts during the year which plus \$57,188.94 (surplus) made a total distribution of interest

amounting to \$168,177.11.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1924, 5%; 1925, 5%; 1926, 434%; 1927, 434%; 1928, 434%. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service were \$186,691.10, and the amount refunded to the heirs, estates or beneficiaries of deceased members was \$36,626.36. There was also paid during said year in annuities \$25,001.10 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on November 30, 1928, were 9,263; males, 5,265; females, 3,998. There are 258 accounts payable of former members who left the service between 1912–1928, inclusive, amounting to

\$4,823,43,

The following statistics relate to the 40 employees who were retired during the year November 30, 1928:

TABLE I

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary Accidental Retirements at age 60 or over	1	60.00	22.00	\$1,314.95	\$44.88	\$245.64	\$290.52
	1	70.00	17.00	1,400.00	179.64	520.36	700.00
	38	68.30	28.10	1,878.55	143.87	485.92	629.79
	40	68.12	27.68	\$1,852.49	\$142.29	\$480.77	\$623.06

When a member is retired he receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State).

During the year ending November 30, 1928, 1,770 new employees have become members of the Association and 1,400 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 40 persons during the year; 24 by reason of reaching the age of seventy;

I for ordinary disability: 1 for permanent disability resulting from accidental injury in line of duty; (0) under age sixty who had completed thirty-five years of service retired voluntarily; and 14 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 40 employees retired during the year ending November 30, 1928, is \$24,922.84. Of this amount, \$5,691.72 was annuity derived from the contributions made by the members before retirement and the balance of \$19,231.12 was pension paid from State appropriations. Three widows of members were granted annual pensions amounting to \$2,100.00 on account of the death of the husband from injuries received in line of duty. The widows' pension is paid for life or until remarriage.

Table 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1928

(AGE NEAREST BIRTHDAY)

Widows not included

	Sex				Under 60	60	61	62	63	64	65	66	67	68	69	70	Total
Males . Females .	:	:	:	:	29 24	27 19	17 15	17 7	14 16	17 8	18 13	28 7	22 4	21 14	13 6	220 41	443 174
Totals					53	46	32	24	30	25	31	35	26	35	19	261	617

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 617, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 8. Since retirement 221 members and 5 non-members have died, so that retirement allowances are now being paid to 391 former employees. Of this number 147 were retired at the age of seventy or over; 198 were retired upon their request between sixty and seventy years of age; 12 were retired with 35 years of service under age sixty; 4 were wives retired at time of retirement of husbands; 21 were retired for ordinary permanent disability; 8 were retired for permanent accidental disability because of such injuries received in the line of duty; 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eight payments are now being made under this act. The largest payment to a widow is \$936.00; the average is \$722.35.

At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts: **Annuity** (paid from his contributions plus interest credited thereto while employed) plus **Pension** (paid by State).

During the year ending November 30, 1928, \$149,401.42 was paid as pensions to persons upon the retired list as compared with \$133,028.54 for the previous year. The largest retirement allowance being paid to an individual is \$2,250.00 composed of an annuity paid from the savings of the retired member of \$260.64 and a pension paid by the State of \$1,989.36. The average retirement allowance paid to the persons on the list November 30, 1928, is \$443.81. The total annual retirement allowances of persons on the list November 30, 1928, is \$180,230.01, divided as follows; annuities, \$26,800.91; pensions, \$153,429.10 (widows' pensions, \$5,778.85, and 2 extra pensions by legislative act amounting to \$920.00, included).

The retirement system has 447 members who may voluntarily retire at the age of sixty to seventy during the coming fiscal year; 47 under sixty years of age who have completed thirty-five years of service; and 21 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 5% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$8,450 in addition to the amount of pensions in force on November 30, 1928. The Board has requested an appropriation of \$161,500 to cover the cost of pensions for the year ending November 30, 1929.

52	:	:	:	:	_	65 .	:	: :	10	78	: :	:	:	10	91	Total	:	:	391

The average age of persons on the retired list is 71.34 years.

The expenses of the administration of the system for the year were: Salaries, \$9,313.80; contingent expenses, \$827.65; reimbursement to institutions for making deductions from members' salaries, etc., \$3,500.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

¹ The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1928 was \$3,500.

² Cost for 6 months. (First pension was paid 6-1-1912.)

P. D. 99

LAWS PASSED BY THE GENERAL COURT DURING THE SESSION OF 1928 AMENDING OR REVISING THE GENERAL LAWS

Chapter 248, Acts of 1928, Revised Paragraph 8, Section 2, Chapter 32, General Laws

The present provisions of said paragraph permits a member of the Retirement Association under age sixty who has rendered fifteen or more years of service to retire, if after examination by a physician he is found by the Board to be permanently disabled for performance of duty; provided such disability is not the result of his own vicious habits or misconduct. The retirement allowance in case of retirement for ordinary disability is to be computed by the same method used in computing the retirement allowance of persons retired between ages sixty to seventy.

A member is protected in case of ordinary permanent disability (not temporary disability) after he has completed at least fifteen years of service even though he is under the usual retirement age (sixty to seventy) otherwise required by the law.

SECTION 2 OF SAID CHAPTER ADDS A NEW PARAGRAPH (11) TO SAID SECTION 2.

This paragraph defined the word "injuries" as used in paragraphs 9 and 10 of the retirement law. Under this definition the benefit and protection of the retirement allowance may only be paid to members who received "injuries" resulting in permanent disability or death, which are the natural and proximate results of an accident occurring in the performance and within the scope of duty, and without fault of the member. The paragraph also provides that payments on account of permanent accidental disability or death shall not date earlier than the date of receipt by the Board of the written application for accidental injury benefits.

CHAPTER 251-1928

This Act amended Chapter 29, of the General Laws, by adding after Section 9 A New Section 9A

This act provides for an annual system of reimbursement by the cities and towns of the Metropolitan District of the sum paid to retired employees of the Metropolitan District Commission, or its predecessors, under the State retirement law. Employees of the Metropolitan District Commission, or its predecessors, have been classified for retirement purposes with State employees, and the entire cost of their retirement allowances have in the past been paid from State appropriations. Beginning with the year 1929 and each year thereafter the sum assessed upon the cities and towns of the Metropolitan District shall be an amount equal to the total pensions paid to retired employees, or their dependents, of said District Commission during the year ending on the preceding November 30th. The amount of assessments when paid shall become a part of the general revenue of the Commonwealth. Section 2 of this act provides for an assessment upon the Metropolitan District for the total cost of pensions paid by the State to retired employees, or their dependents, of the Metropolitan District for the six years prior to December 1, 1927. The amount of assessments for this period (\$100,143.65) became a part of the general revenue of the Commonwealth by assessments levied in 1928 upon the cities and towns comprising the Metropolitan District.

Respectfully submitted,

WILLIAM S. YOUNGMAN, Chairman, ELIZABETH F. MOLONEY. CLARENCE L. SCAMMAN.

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealtn in the year in which the assessments are made.

² Reimbursement in 1928 covered the cost of pensions for the six years prior to December 1, 1927. 1 An equal amount was paid by the State.

¹ At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts: **Pension** (paid by the State) plus **Annuity** (paid from contributions plus interest credited to the members account during his service).

Members began to contribute from salary or wages June 1, 1912. Contributions plus interest purchases an annuity at retirement and the pension for service after 6-1-1912 is equivalent to the annuity purchased by the member. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-1912 is paid by the state. Additional pensions, if any, by special act of Legislature included. If the sum of pensions (A plus B) added to the **Annuity** (paid from member's savings plus interest additional posson, the State pays an additional pension (C) to make a minimum retirement allowance of not less than \$300.

Justice of the Peace.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1929

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

> Publication of this Document Approved by the Commission on Administration and Finance

The Commonwealth of Massachusetts

Division of Board of Retirement, State House, Boston, November 30, 1929.

To the Honorable Senate and House of Representatives:

The eighteenth annual report of the Board of Retirement is herewith presented for your consideration.

One change in the personnel of the Board occurred during the year. Hon. John W. Haigis, Treasurer and Receiver-General, became ex-officio, chairman of the Board.

The contributory law has been in operation since January 1, 1912, approximately eighteen years, and the present fund consists of \$3,721,204.14, which has been deducted from the salaries or wages of the members, and \$937,248.95, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1929, amounts to \$4,658,453.09.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1929, was \$215,171.00, and the gross assets on said date were \$4,944,428.98. The Insurance Department made the annual examination in aecordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1929, \$56,100.94 as an extra dividend at the rate of one and one-half per cent on the dollars standing to the credit of such accounts on September 30, 1928. Regular interest amounting to \$125,902.53 was also eredited to members' accounts during the year which plus \$56,100.94 (surplus) made a total distribution of interest amounting to \$182,003,47.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1925, 5%; 1926, 43/4%; 1927, 43/4%; 1928, 43/4%; 1929, 41/2%. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service were \$200,955.78, and the amount refunded to the heirs, estates or beneficiaries of deceased members was \$29,682.32. There was also paid during said year in annuities \$28,397.92 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on November 30, 1929, were 9,649; males, 5,472; females, 4,177. There are 255 accounts payable of former members who left the service between 1912-1929, inclusive, amounting to \$4,370.44.

The following statistics relate to the 41 employees who were retired during the vear November 30, 1929.

TABLE 1

Total for year	41	66 48	26 73	\$1,845 16	\$145 35	\$463 62	\$608 98

When a member is retired he receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum.

During the year ending November 30, 1929, 1,757 new employees have become members of the Association and 1.333 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 41 persons during the year; 17 by reason of reaching the age of seventy: 1 for ordinary disability: 3 for permanent disability resulting from accidental injury in line of duty; I under age sixty who had completed thirty-five years of service retired voluntarily; 18 between sixty and seventy years of age upon their request; and 1 wife retired with husband. When a husband or wife has acquired retirement rights the spouse may retire at the same time simply on the retirement rights of the other. The retiremnt allowance is based on the service rendered etc., without any minimum provisions. The total of the retiring allowance of the 41 employees retired during the year ending November 30, 1929, is \$24,968.04. Of this amount, \$5,959.44 was annuity derived from the contributions made by the members before retirement and the balance of \$19,-008.60 was pension paid from State appropriations. No applications were received from widows of members for pensions on account of the death of the hushand from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of onehalf the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eight payments are now being made under this act. The largest payment to a widow

is \$936.00; the average is \$722.35.

TABLE 2 TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1929 (AGE NEAREST BIRTHDAY) Widows not included

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 658, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 8. Since retirement 245 members and 5 nonmembers have died, so that retirement allowances are now being paid to 408 former employees. Of this number 152 were retired at the age of seventy or

TABLE 3 TOTAL ANNUITIES TO EMPLOYEES RETIRED DURING EACH YEAR ENDING NOVEMBER 30TH (See Table 1 for average retirement allowance.)

				тот	AL ANNUIT	es for Re	TIREMENT			Total

At retirement a member receives a retirement allowance. A retirement allowance is composed of two ts: Annuity (paid from his contributions plus interest credited thereto while employed) plus Pension

over: 206 were retired upon their request between sixty and seventy years of age; 13 were retired with 35 years of service under age sixty; 5 were wives retired at time of retirement of husbands; 20 were retired for ordinary permanent disability; 11 were retired for permanent accidental disability because of such injuries received in the line of duty; 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed.

During the year ending November 30, 1929, \$158.133.44 was paid as pensions to persons upon the retired list as compared with \$149,401,42 for the previous year. The largest retirement allowance being paid to an individual is \$2,250.00 composed of an annuity paid from the savings of the retired member of \$260.64 and a pension paid by the State of \$1.989.36. The average retirement allowance paid to the persons on the list November 30, 1929, is \$459.92. The total annual retirement allowances of persons on the list November 30, 1929, is \$193,425.64, divided as follows: annuities, \$30.835.16; pensions, \$162.590.48 (widows' pensions, \$5,778.85, included).

The retirement system has 514 members who may voluntarily retire during the coming fiscal year; and 21 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 5% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$9,100 in addition to the amount of pensions in force on November 30, 1929. The Board has requested an appropriation of \$171,700 to cover the cost of pensions for the year ending November 30, 1930.

¹ The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1929 was \$4,000.

² Cost for 6 months. (First pension was paid 6-1-1912.)

ing deductions from members' salaries, etc., \$4,000.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

LAWS PASSED BY THE GENERAL COURT DURING THE SESSION OF 1929 AMENDING OR REVISING THE GENERAL LAWS

Chapter 366, Acts of 1929, Revised Paragraph (2) A (a), Section 4, Chapter 32, General Laws.

This amendment provides that after January 1, 1930 the maximum contribution to the Annuity Fund shall be based upon salary or wages received not exceeding the weekly rate of \$35.00 or \$1820, per annum (5%-\$91.00) instead of \$30.00 per week, \$1560. per annum (5%-\$78.00) which has been in effect since 1912. All employees becoming members of the Retirement Association after January 1, 1930 and active members who received on said date salary or wages at \$30.00 or less per week, are required to pay contributions from the salary or wages received, but not on the salary received exceeding the weekly rate of \$35.00. Any member who received on January 1, 1930 a weekly rate of salary exceeding \$30.00 per week is not required to pay contributions from the salary he receives above said amount, but any such member may at any time upon his written application to the Board contribute from the salary or wages received not exceeding the weekly rate of \$35.00. The law does not permit members to pay a sum of money to adjust their accounts to what their assessments plus interest would have amounted to under the new maximum for service between 1912 to 1929, inclusive. Any member who received more than \$30.00 per week on January 1, 1930, must contribute before January 1, 1931 from the salary or wages received exceeding \$30.00 per week to have his pension for service prior to June 1. 1912 computed upon salary or wages received not exceeding the weekly rate of \$35.00, otherwise the maximum assessment will be based upon the \$30.00 weekly rate.

CHAPTER 367, ACTS OF 1929, REVISED PARAGRAPH (2) E OF SECTION 5, CHAPTER 32, GENERAL LAWS.

This act provides a retirement allowance not less than \$480. per year for members who pay 5% contributions to the Annuity Fund including those who have adjusted their accounts to a 5% basis under Chapter 300, Acts of 1926, and who retire with twenty-five or more years of service. The other minimum of \$300. per year which has been in the law for several years remains the same as heretofore for certain cases where a member is retired with fifteen, or less than twenty-five, years of service and where the rate of contribution is not a factor.

Respectfully submitted,
JOHN W. HAIGIS, Chairman.
ELIZABETH F. MOLONEY.
CLARENCE L. SCAMMAN.

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

1 An equal amount was paid by the State.

A retirement allowance is composed of two parts: Pension (paid by the State) plus Annuity (paid from 1 At retirement a member receives a retirement allowance.

contributions plus interest credited to the members' account during his service).

Members began to contribute from salary or wages June 1, 1912. Contributions plus interest purchase an annuity at retirement and the pension for service after 6-1-1912 is paid by the state. Is equivalent to the annuity purchased by the member. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-1912 is paid by the state. Additional pensions, if any, by special act of Legislature included. If the sum of pensions (A plus B) added to the Annuity (posid from members plus interest additional pension (C) to make a minimum retirement allowance of not less than \$300 for less than twenty-five prears service after September 1929 who paid 5% assessments will receive a retirement allowance not less than \$480.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1930

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

The Commonwealth of Massachusetts REPORT

Division of Board of Retirement, State House, Boston, November 30, 1930.

To the Honorable Senate and House of Representatives:

The nineteenth annual report of the Board of Retirement is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributory law has been in operation since January 1, 1912, approximately nineteen years, and the present fund consists of \$4,186,233.69, which has been deducted from the salaries or wages of the members, and \$1,094,577.04, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1930, amounts to \$5,280,810.73.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1930, was \$254,025.00, and the gross assets on said date were \$5,610,997.33. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1930, \$63,951.64 as an extra dividend at the rate of one and one-half per cent on the dollars standing to the credit of such accounts on September 30, 1929. Regular interest amounting to \$142, 672.82 was also credited to members' accounts during the year which plus \$63,951.64 (surplus) made a total distribution of interest

amounting to \$206,624.46.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1926, 4\frac{4}{4}\%; 1927, 4\frac{3}{4}\%; 1928, 4\frac{3}{4}\%; 1929, 4\frac{1}{2}\%; 1930, 4\frac{1}{2}\%. The annuity fund is invested according to restrictions and limitations of the statutes in only the securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service during the year ending December 31, 1930 were \$187,344.83, and the amount refunded to the heirs, estates or beneficiaries of deceased members was \$37,487.30. There was also paid during said year in annuities \$33,276.08 from the annuity reserve fund composed of retired members' accounts. which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on December 31, 1930, were 10,326; males, 5,833; females, 4,493. There are 256 accounts payable of former members who left the service between 1912–1930, inclusive, amounting to

\$3,494,42.

The following statistics relate to the 44 employees who were retired during the year November 30, 1930.

TABLE 1

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary Accidental Retirements (Ape and Service) Retirements with Spouse Total for year	1 1 42 - 44	39.00 70.00 67.23 66.65	16 20 27.93 - 27.47	\$1,320 1,897 2,047 - \$2,026	\$61.20 265.80 165.30	\$233.40 754.20 477.21 - \$477.96	\$294.60 1,020.00 642.51 - \$643.18

When a member is retired he receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum.

During the year ending November 30, 1930, 1,783 new employees have become members of the Association and 1,171 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 44 persons during the year; 20 by reason of reaching the age of seventy; 1 for ordinary disability; 1 for permanent disability resulting from accidental injury in line of duty; 1 under age sixty who had completed thirty-five years of service retired voluntarily; 21 between sixty and seventy years of age upon their request. The total of the retiring allowance of the 44 employees retired during the year ending November 30, 1930, is \$28,299.96. Of this amount, \$7,269.60 was annuity derived from the contributions made by the members before retirement and the balance of \$21,030.36 was pension paid from State appropriations. Three applications were approved for pensions to widows of members on account of the death of the husband from injuries received in line of duty amounting to annual payments of \$2,730.00.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eleven payments are now being made under this law. The largest payment to a widow is \$990.00;

the average is \$773.54.

TABLE 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1930
(AGE NEAREST BIRTHDAY)

Widows not included

	Sex				Under 60	60	61	62	63	64	65	66	67	68	69	70	Total
Males . Females .	:	:	:	:	33 26	$\frac{28}{20}$	19 16	20 8	17 16	21 8	20 15	30 9	25 5	23 17	16 8	254 48	506 196
Totals					59	48	35	28	33	29	35	39	30	40	24	302	702

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 702, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 11. Since retirement 275 members and 5 non-members have died, so that retirement allowances are now being paid to 422 former employees. Of this number 160 were retired at the age of seventy or over; 211 were retired upon their request between sixty and seventy years of age; 14 were retired with 35 years of service under age sixty; 5 were wives retired at time of retirement of husbands; 21 were retired for ordinary permanent disability; 10 were retired for permanent accidental disability because of such injuries received in the line of duty; 1 non-member who was over fifty-five years of age when the retirement law was passed, was retired upon the request of the department in which he was employed.

At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto while employed) plus Pension (paid by State).

During the year ending November 30, 1930, \$167,230.87 was paid as pensions to persons upon the retired list as compared with \$158,133.44 for the previous year. The largest retirement allowance being paid to an individual is \$2,250.00 composed of an annuity paid from the savings of the retired member of \$260.64 and a pension paid by the State of \$1,989.36. The average retirement allowance paid to the persons on the list November 30, 1930, is \$481.93. The total annual retirement allowances of persons on the list November 30, 1930, is \$211,882.77, divided as follows: annuity, \$36,260.51; pensions, \$175,622.26 (widows' pensions, \$8,508.85, included).

The retirement system has 519 members who may voluntarily retire during the coming fiscal year; and 22 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates of the amount of appropriation required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$8,300 in addition to the amount of pensions in force on November 30, 1930. The Board has requested an appropriation of \$183,800 to cover the cost of pensions for the year ending November 30, 1931.

Table 4

NUMBER OF RETIRED EMPLOYEES ON LIST NOVEMBER 30, 1930, ACCORDING TO AGE LAST BIRTHDAY (WIDOWS EXCLUDED)

Age	No.		Age)	No.		Age		No.			Age		No.
39	1 1 2 1 1 1	55 . 56 . 57 . 58 . 59 . 60 . 61 . 62 . 63 . 64 . 65 . 66 .			 3 -1 3 1 4 8 7 9 8 16 12 12	68 69 70 71 72 73 74 75 76 77 78 79 80			17 16 37 38 32 32 22 20 26 20 12 16 8	81 82 83 84 85 86 87 88 90 91 92 93	· · · · · · · · · · · · · · · · · · ·			10 4 5 4 5 2 1 1 1 1 1 1 1 1 4 2 2

The average age of persons on the retired list is 71.81 years.

The expenses of the administration of the system for the year were: Salaries, \$10,247.50; contingent expenses, \$847.56; reimbursement to institutions for making deductions from members' salaries, etc., \$4,335.47. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system.

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1930 was \$4,335.

²Cost for 6 months. (First pension was paid 6-1-1912.)

P.D. 99

LAWS PASSED BY THE GENERAL COURT DURING THE SESSION OF 1930 AMENDING OR REVISING THE GENERAL LAWS

Chapter 335, Acts of 1930, Revised Paragraphs (2) A (B), 2 B (B) and F of Section 5, Chapter 32, General Laws.

These amendments changed the provisions of law so that a member might name more than one surviving beneficiary but not contingent beneficiaries. The proportion allotted to each beneficiary will only be paid in case of survivorship and any proportion not so payable will be paid to the deceased member's estate except that when the total of any such amount is under \$100 payment may be made to the person appearing the judgment of the Board entitled thereto. The acts of minors in making beneficiary appointments were also made valid but a minor must name a beneficiary or beneficiaries of his kindred.

RECOMMENDATION FOR LEGISLATION.

The State retirement law provides that a member may be on a leave of absence on account of sickness without breaking the continuity of his service, provided he is reinstated in the active service before the expiration of two years from the date of beginning of the leave of absence. A member who receives payments under the workmen's compensation law for two or more years is required to withdraw from the Retirement Association, and if he is re-employed after such absence no credit is allowed under the retirement law for the service between June 1, 1912, to the date of injury. The Board believes that the entire period of payment to an injured employee under the compensation law should not interfere with his membership in the Retirement Association and not break the continuity of his service. It is therefore recommended that the entire period of payments under the compensation law be a part of continuous service under the retirement law.

Respectfully submitted,

JOHN W. HAIGIS, Chairman ELIZABETH F. MOLONEY CLARENCE L. SCAMMAN

1 At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuity (paid from Members began to contribute from salary or wages June 1, 1912. Contributions plus interest purchase an annuity at retirement and the pension for service after 6-1-1912 contributions plus interest credited to the members' account during his service). (See Table 1.)

is equivalent to the annuity purchased by the member. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-1912 is paid by the state.

2 Additions, the Annuity Coad from member's savings plus interest
2 Additions possions, if any, by special act of Legislature included. If the sum of pensions of A plus B) added to the Annuity Coad from member's savings plus interest
additions) does not exceed \$300, the State pays an additional pension (C) to make a minimum retirement allowance of not less than \$300 for less than twenty-five years of
additions) does not exceed \$300, the State pays an additional pension (C) to make a minimum retirement allowance of not less than \$300 for less than twenty-five years of service. Any member retired with twenty-five or more years service after September, 1929, who paid 5% assessments will receive a retirement allowance not less than \$480.

"Regular Interest,' interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1929, 3 plus 1½ equals 4½%.

CHARLES F. HURLEY ELIZABETH F. MOLONEY CLARENCE L. SCAMMAN

Board of Retirement.

Subscribed and sworn to before me this sixteenth day of February, 1931.

A. HARRIS PATON,

Justice of the Peace.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1931

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

The Commonwealth of Massachusetts

REPORT

DIVISION OF BOARD OF RETIREMENT, State House, Boston, November 30, 1931.

To the Honorable Senate and House of Representatives:

The twentieth annual report of the Board of Retirement is herewith

presented for your consideration.

Two changes in the personnel of the Board occurred during the year. Hon. Charles F. Hurley, Treasurer and Receiver-General, became exofficio, Chairman of the Board, and Dr. Harry Schwartzman was appointed as third member. Dr. Clarence L. Scamman, formerly Assistant Director in the Massachusetts Department of Public Health, and third member of the Retirement Board resigned from the State service to take up public health work in another state.

The contributory law has been in operation since January 1, 1912, approximately twenty years, and the present fund consists of \$4,727,428.45, which has been deducted from the salaries or wages of the members, and \$1,283,131.89, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1931, amounts to

\$6,010,560.34.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1931, was \$271,792.00, and the gross assets on said date were \$6,370,972.95. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1931, \$72,670.31 as an extra dividend at the rate of one and one-half percent on the dollars standing to the credit of such accounts on September 30, 1930. Regular interest amounting to \$162,104.95 was also credited to members' accounts during the year which plus \$72,670.31 (surplus) made a total distribution

of interest amounting to \$234,775.26.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1927, 4¾%; 1928, 4¾%; 1929, 4½%; 1930, 4½%; 1931 4½%. The annuity fund is invested according to restrictions and limitations of the statutes in securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service during the year ending December 31, 1931 were \$166,541.46, and the amount refunded to the heirs, estates or beneficiaries of deceased members was \$50,229.31. There was also paid during said year in annuities \$38,603.79 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on December 31, 1931, were 11,417; males, 6,492; females, 4,925. There are 276 accounts payable of former members who left the service between

1912-1931, inclusive, amounting to \$4,684.48.

The following statistics relate to the 32 employees who were retired during the year November 30, 1931.

TABLE 1

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary	1 2 28 1 32	54.00 54.00 68.07 58.00	27.00 10.00 26.57 22.00 25.40	\$1,800 1,681 1,857 1,378 \$1,829	\$87.24 54.90 187.23 75.96 \$172.36	\$379.44 755.88 422.64 95.16 \$431.89	\$466.68 810.78 609.87 171.12 \$604.25

When a member is retired he receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum.

During the year ending November 30, 1931, 2,271 new employees have become members of the Association and 1,033 have left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 32 persons during the year; 18 by reason of reaching the age of 70; 1 for ordinary disability; 2 for permanent disability resulting from accidental injury in line of duty; 0 under age sixty who had completed thirty-five years of service retired voluntarily; 10 between sixty and seventy years of age upon their request, and 1 wife retired with her husband. A spouse under the retirement age has the right to retire on the day the other retires or is retired. The total of the retiring allowances of the 32 employees retired during the year ending November 30, 1931, is \$19,335.96. Of this amount, \$5,515.56 was annuity derived from the contributions made by the members before retirement and the balance of \$13,820.40 was pension paid from State appropriations. No applications were presented for pensions to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eleven payments are now being made under this law. The largest payment to a widow is \$990.00; the average is \$773.54.

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 728 members and 6 non-members, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 11. Since retirement 302 members and 5 non-members have died, so that retirement allowances are now being paid to 427 former employees. Of this number 166 were retired at the age of seventy or over; 209 were retired upon their request between sixty and seventy years of age; 14 were retired with 35 years of service under age sixty; 6 were wives retired at time of retirement of husbands; 19 were retired for ordinary permanent disability; 12 were retired for perman-

ent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

Table 3 ANNUITIES GRANTED TO EMPLOYEES RETIRED DURING EACH YEAR ENDING NOVEMBER 30TH (See Table 1 for average retirement allowance.)

					BASIS FOR	RETIREME	NT			
	YE	AR		Age and Service (15 or More Yrs. Service)	PERMA DISAR Ordinary		Grand Total	Average Annuity of Mem- bers Re- tired Age Service	Largest	Total in Force November 30th

two parts: Annuity (paid from his contributions plus interest credited thereto while employed) plus Pension (paid by State). At retirement a member receives a retirement allowance.

During the year ending November 30, 1931, \$178,078.55 was paid as pensions to persons upon the retired list as compared with \$167,230.87 for the previous year. The largest retirement allowance being paid to an individual is \$2,250.00 composed of an annuity paid from the savings of the retired member of \$260.64 and a pension paid by the State of \$1,989.36. The average retirement allowance paid to retired employees on the list November 30, 1931, is \$494.32. The total annual retirement allowances of persons on the list November 30, 1931, is \$219,585.34, divided as follows; annuity, \$39,914.28; pensions, \$179,671.06 (widows'

pensions, \$8,508.85, included).

The retirement system has 614 members who may voluntarily retire during the coming fiscal year; and 39 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$10,680 in addition to the amount of pensions in force on December 31, 1931. The Board has requested an appropriation of \$194,200 to cover the cost of pensions for the year ending November 30, 1932.

P.D. 99

The expenses of the administration of the system for the year were: Salaries, \$10,365.48; contingent expenses, \$1,026.25; reimbursement to institutions for making deductions from members' salaries, etc., \$4,449.37. The reimbursement to State institutions is purely a book-keeping transaction to show the probable cost of operating the system (See foot note Table 5).

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1931 was \$4,449.37,

²Cost for 6 months. (First pension was paid 6-1-1912.)

LAWS PASSED BY THE GENERAL COURT DURING THE SESSION OF 1931 AMENDING OR REVISING THE GENERAL LAWS

CHAPTER 378, ACTS OF 1931

The State Retirement Law was amended so that a member who receives payments under the Workmens Compensation Law on account of injuries received in line of duty may be treated in all respects as a contributing member except as to liability to contribute to the Annuity Fund during the entire period of payments under said law and for an additional period of thirty days.

If such a member is reinstated in the active service within thirty days from the date of termination of compensation payments all of the time covered by compensation payments including any additional time within said thirty day period is counted a part of his continuous service under the retirement law. Any member attaining age seventy during the period of compensation payments must be retired on the termination date of compensation payments, and any member otherwise meeting the age of service requirements necessary for retirement prior to the date of termination of compensation payments if not reinstated in the service, may apply for retirement without being required to be reinstated in the service. A member is not required to leave his account

Respectfully submitted,

ing with the Board the necessary waivers.

but may withdraw same while receiving compensation payments by fil-

1 At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuity (paid from

contributions plus interest credited to the member's account during his service). (See Table 1.)

Members began to contribute from salary or wages June 1, 1912. Contributions plus interest purchased annuity at retirement and the pension for service state 6-1-1912 is paid by the state.

Additional pensions, if any, by special set of Legislature included. If the sum of pensions (A plus B) added to the Annuity (Paid from member's savings plus interest additional pensions, if any, by special set of Legislature included. If the sum of pensions (A plus B) added to the Annuity (Paid from member's savings plus interest additional to the state pays an additional pension (C) to make a minimum retirement allowance of not less than twenty-five years of service. Any member retired with twenty-five or more years service after September, 1929, who paid 5% assessments will receive a retirement allowance not less than \$480.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1932

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

The Commonwealth of Massachusetts

REPORT

DIVISION OF BOARD OF RETIREMENT STATE HOUSE, BOSTON, November 30, 1932

To the Honorable Senate and House of Representatives:

The twenty-first annual report of the Board of Retirement is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributory law has been in operation since January 1, 1912, twenty-one years, and the present fund consists of \$5,311,481.85, which has been deducted from the salaries or wages of the members, and \$1,482,494.49, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contributing on December 31, 1932, amounts to \$6,793,976.34.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1932, was \$339,409.00, and the gross assets on said date were \$7,239,416.02. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1932, \$82,619.85 as an extra dividend at the rate of one and one-half percent on the dollars standing to the credit of such accounts on September 30, 1931. Regular interest amounting to \$184,158.44 was also credited to members' accounts during the year which plus \$82,619.85 (surplus) made a total distribution of interest amounting to \$266,778.29.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1928, 4¾%; 1929, 4½% 1930, 4½%; 1931, 4½%; 1932, 4½%. The annuity fund is invested according to restrictions and limitations of the statutes in securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of Commonwealths and subdivisions thereof. The accumulated savings refunded to members who left the service during the year ending December 31, 1932 were \$166,287.09, and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$47,112.25, and after retirement was \$7,942.71. There was also paid during said year in annuities \$44,852.45 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January 1912) was 3,324, and the contributing members on December 31, 1932, were 12,371; males, 7,049; females, 5,322. There are 279 accounts payable to former members who left the service between 1912–1932, in-

clusive, present address unknown, amounting to \$4,908.87.

Table 1
Statistics relating to employees retired during year ending November 30, 1932

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary Accidental	2 3 50 1	50.00 63.33 68.26 57.00	19.00 19.33 30.54 19.00	\$1,007.92 2,121.00 2,141.46 888.00	192.72 209.50	\$252.66 769.34 567.84 60.72	\$297.96 962.06 777.34 112.32
Total for year	56	67.14	29.32	\$2,077.50	\$199.92	\$558.33	\$758.25

When a member is retired he receives a Retirement Allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum.

During the year ending November 30, 1932, 1,904 new employees became members of the Association and 961 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 56 persons during the year; 28 by reason of reaching the age of 70; 2 for ordinary disability; 3 for permanent disability resulting from accidental injury in line of duty; 1 under age sixty who had completed thirty-five years of service retired voluntarily; 21 between sixty and seventy years of age upon their request, and 1 wife retired with her husband. A spouse under the retirement age has the right to retire on the day the other retires or is retired. The total of the retiring allowances of the 56 employees retired during the year ending November 30, 1932, is \$42,461.79. Of this amount, \$11,195.36 was annuity derived from the contributions made by the members before retirement and the balance of \$31,266.43 was pension paid from State appropriations. No applications were presented for pensions to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eleven payments are now being made under this law. The largest

payment to a widow is \$990.00; the average is \$773.54.

TABLE 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1932
(AGE NEAREST BIRTHDAY)
Widows not included

Sex	Under 60	60	61	62	63	64	65	66	67	68	69	70	Total
Males Females	37 29	30 23	21 16	23 8	18 16	22	23 17	34 10	26 5	25 18	18 8	292 62	569 221
Totals	66	53	37	31	34	31	40	44	31	43	26	354	790

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 784 members and 6 non-members, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 11. Since retirement 332 members and 5 non-members have died, so that retirement allowances are now being paid to 453 former employees. Of this number 175 were retired at the age of seventy or over; 220 were retired upon their request between sixty and seventy years of age; 15 were retired with 35 years of service under age sixty; 6 were wives retired at time of retirement of husbands; 22 were retired for ordinary permanent disability; 14 were retired for permanent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

																Tot	al			453

During the year ending November 30, 1932, \$188,311.00 was paid as pensions to persons upon the retired list as compared with \$178,078.55 for the previous year and in addition the state paid \$2,118.64 covering the net loss to maintain the annuity reserve on December 31, 1931. The largest retirement allowance being paid to an individual is \$2,250.00 composed of an annuity paid from the savings of the retired member of \$260.64 and a pension paid by the State of \$1,989.36. The average retirement allowance paid to retired employees on the list November 30, 1932, is \$526.77. The total annual retirement allowances of persons on the list November 30, 1932, is \$247,135.83, divided as follows; annuity, \$48,424.89; pensions, \$198,-710.94 (widows' pensions, \$8,508.85, included).

The retirement system has 686 members who may voluntarily retire during

the coming fiscal year; and 53 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$14,700 in addition to the amount of pensions in force on November 30, 1932. The Board has requested an appropriation of \$213,400.00 to cover the cost of pensions for the year ending November 30, 1932.

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1932 was \$4,467.93.

2Cost for 6 months. (First pension was paid 6-1-1912).

The expenses of the administration of the system for the year were: Salaries, \$10,500.38; contingent expenses, \$728.70; reimbursement to institutions for making deductions from members' salaries, etc., \$4,467.73. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system (See foot note Table 4).

Table 5 ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE Year 1932

	Park Di	VISION	1	Sewei	Division		
Park Maintenance	Boule- vards ¹	Charles River Basin	Wellington Bridge	North System	South System	WATER DIVISION	TOTAL
\$6,382.21	\$1,220.36	\$1,446.63	\$201.03	\$4,780.50	\$3,266.79	\$11,064.06	\$28,361.58

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

1An equal amount was paid by the State without Reimbursement. The first reimbursement was made in 1928, covering 1922–1927 inclusive, \$100,143.65; 1929, \$23,514.51; 1930, \$25,061.62; 1931, \$26,176.73.

P.D. 99

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metropolitan District Commission. The net cost of pensions paid to employees retired from the direct service of the commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the state in the following year as given in table 5. The reimbursement in 1932 covers the cost for 1931.

REQUIREMENTS FOR RETIREMENTS

Any time between ages 60 and 70 with 15 or more years service.
 Any age with 15 years service for ordinary permanent disability.

3. Any age with 35 years service.4. Compulsory retirement at age 70.

5. Any time after membership in retirement association for permanent disability resulting from an injury received in an accident while in the discharge of duty without fault of the member.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children while under sixteen years of age.

LAWS PASSED BY THE GENERAL COURT DURING THE SESSION OF 1932 AMENDING OR REVISING THE GENERAL LAWS

CHAPTER 268, ACTS OF 1932.

This amendment (1) increases the cash value of full or complete boarding and housing from \$5.00 per week to \$7.00 per week and (2) also includes every position in the service where such a non-cash allowance is received as

part of the total compensation.

Heretofore the law provided a non-cash allowance of \$5.00 per week for an institution employee. Now an employee of a State department will accumulate assessments from his full compensation and thus increase the size of his annuity at retirement, and if he is unfortunate and receives a permanent disability resulting from accidental injuries, will be paid a retirement allowance of one-half of the sum of his cash rate of pay plus the maintenance allowance of approximately \$365; where heretofore the value of the non-cash allowance was only for institution employees and at the rate of \$260. per year.

Respectfully submitted,
CHARLES F. HURLEY, Chairman
ELIZABETH F. MOLONEY
HARRY SCHWARTZMAN, M.D.

*Eurollment Membership, Feb. 1, 1912, 3,324. Membership Nov. 30, 1932, Males 7,019; Females, 5,249; plus 297 accounts payable.

*Payments to widow during widowhood, or if no widow, for benefit of child or children while under sixten years of age, if death is the natural and proximate result of accidental injuries overdrenance and within the scope of duty.

*Most members with 35 or more years of service retire between the retirement age periods of 60 to 70 years.

*Active Accounts are present employees and Accounts payable are unpaid accounts of deceased members and unclaimed accounts of former members whose present address

is unknown. Number of unpaid Accounts Dec. 31, 1932 — deceased members 18, \$7,761,18; all others 279, \$4,908,87.

Annual Retirement Allowance

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts: — Annuity and Pension. Annuity — The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

- (a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments cease upon death.
- (b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

Maximum Assessment. The maximum yearly assessment which the law allows a member to pay to the annuity fund from his salary is 5% of the salary received up to but not exceeding \$35.00 per week or \$91.00 per year. Such assessments plus interest represent a compulsory savings account.

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of service during which the Employee was a contributing member since said date.

*The Average Retirement allowance is the sum of the average annuity Table 7, and the average pension

Table 8.

PENSION

will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the The Pension is a definite amount guaranteed for life without change in amount. It is paid from State appropriations and is equal to the annuity under option (a) to which the member was entitled from his own account. In order to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State option (b) annuity.

A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuity (paid from At retirement a member receives a retirement allowance.

contributions plus interest credited to the member's account during his service). (See Table 1.)
Members began to contribute from salary or wages hune 1.912. and the pension for service after 64-1-1912 is equivalent to the annuity purchased by the member without refund provisions. The entire cost of the retirement allowance (pension plus amnuity) for service prior to 6-1-1912 is paid by the state.

If the sum of pensions (A plus B) added to the Annuity (naid from member's savings plus interest additions) does not exceed \$300. the State pays the additional pension (C) to make a minimum retirement allowance for the state han Yeardy the years of service. Any member retired after September, 1929, with twenty-five or more years service, who paid \$75 assessments for all service will receive a retirement allowance not less than \$480.

*The average retirement allowance is the sum of the average annuity Table 7, and the average pension Table 8.

"'Regular Interest,' interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1932, 3 plus 1½ equals 4½%.

ANNUAL STATEMENT OF THE CONDITION AND AFFAIRS OF THE STATE EMPLOYEES' RETIREMENT SYSTEM OF THE COMMONWEALTH OF MASSACHUSETTS. CONTRIBUTIONS BEGAN JUNE 1, 1912.

STATEMENT FOR THE YEAR ENDING DEC 31, 1932, MADE TO THE COMMISSIONER OF INSURANCE IN COMPLIANCE WITH THE PROVISIONS OF PARAGRAPH 5, SECTION 3, CHAPTER 32, GENERAL LAWS.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1933

Department of Treasurer and Receiver-General

MASS. DOCS.

REPORT

DIVISION OF BOARD OF RETIREMENT, State House, Boston, November 30, 1933.

To the Honorable Senate and House of Representatives:

The twenty-second annual report of the Board of Retirement is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributory law has been in operation since January 1, 1912, twenty-two years, and the present fund consists of \$5,839,167.06, which has been deducted from the salaries or wages of the members, and \$1,691,-137.83, which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of members contribut-

ing on December 31, 1933, amounts to \$7,530,304.89.

The annuity reserve for the payment of annuities to members on the retired list, December 31, 1933, was \$437,796.00, and the gross assets on said date were \$8,079,423.69. The Insurance Department made the annual examination in accordance with the law, and following the report, the Board, with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1933, \$93,076.00 as an extra dividend at the rate of one and one-half per cent on the dollars standing to the credit of such accounts on September 30, 1932. Regular interest amounting to \$205,783.06 was also credited to members' accounts during the year which plus \$93,076.00 (surplus) made a total distribution of interest amounting to \$298,859.06.

The interest derived from the investment of the annuity funds has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1929, $4\frac{1}{2}\%$; 1930, $4\frac{1}{2}\%$; 1931, $4\frac{1}{2}\%$; 1932, $4\frac{1}{2}\%$; 1933, $4\frac{1}{2}\%$. The annuity fund is invested according to restrictions and limitations of the statutes in securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of the Commonwealth and subdivisions thereof. The savings plus accumulated interest refunded to members who left the service during the year ending December 31, 1933 was \$214,461.47, and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$67,137.94, and after retirement was \$10,964.14. There was also paid during said year in annuities \$57,293.21 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January 1912) was 3,324, and the contributing members on December 31, 1933, were 12,285; males, 6,990; females, 5,295. There are 276 accounts payable to former members who left the service between 1912-1933, inclusive, present address unknown, amounting to \$5,657.54.

Table 1
STATISTICS RELATING TO EMPLOYEES RETIRED DURING YEAR ENDING
NOVEMBER 30, 1933

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary	4 4 75 83	55.25 62.50 68.77 67.81	19.00 16.75 28.64	\$1,277.65 1,640.18 2,204.60 \$2,132.72	\$59.49 124.41 228.18	\$235.92 562.02 483.42 \$475.28	\$295.41 686.43 711.60 \$690.33

When a member is retired he receives a retirement allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum.

During the year ending November 30, 1933, 1,325 new employees became members of the Association and 1,256 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 83 persons during the year; 50 by reason of reaching the age of 70; 4 for ordinary disability; 4 for permanent disability resulting from accidental injury in line of duty; 25 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 83 employees retired during the year ending November 30, 1933, is \$57,298.08. Of this amount, \$17,849.28 was annuity derived from the contributions made by the members before retirement and the balance of \$39,448.80 was pension paid from State appropriations. Three applications were approved for pensions to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Fourteen payments are now being made under this law. The largest payment to a widow is \$990.00; the average is \$764.38.

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 867 members and 6 non-members, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 14. Since retirement 368 members and 5 non-members have died, so that retirement allowances are now being paid to 499 former employees. Of this number 213 were retired at the age of seventy or over; 224 were retired upon their request between sixty and seventy years of age; 15 were retired with 35 years of service under age sixty; 6 were wives retired at time of retirement of husbands; 24 were retired for ordinary permanent disability; 17 were retired for permanent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

The average age of persons on the retired list is 72,27 years.

During the year ending November 30, 1933, \$214,111.39 was paid as pensions to persons upon the retired list as compared with \$188,311.00 for the previous year and in addition the state paid \$3,071.27 covering the net loss to maintain the annuity reserve on December 31, 1932. The largest retirement allowance being paid to an individual is \$2,232.00 composed of an annuity paid from the savings of the retired member of \$374.64 and a pension paid by the State of \$1,857.36. The average retirement allowance paid to retired employees on the list November 30, 1933, is \$563.92. The total annual retirement allowances of persons on the list November 30,

1933, is \$292,100.45, divided as follows; annuity, \$63,291.19; pension, \$228,809.26 (widows' pensions, included).

The retirement system has 736 members who may voluntarily retire during the coming fiscal year; and 29 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$9,900.00 in addition to the amount of pensions in force on November 30, 1933. The Board has requested an appropriation of \$238,900.00 to cover the cost of pensions for the year ending November 30, 1934.

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1933 was \$4,290.00.

2Cost for 6 months. (First pension was paid 6-1-1912.)

P.D. 99

The expenses of the administration of the system for the year were: Salaries, \$9,985.06; contingent expenses, \$1,008.27; reimbursement to institutions for making deductions from members' salaries, etc., \$4,290.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system (See foot note Table 4).

Table 5

ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE

Year 1933

	Park I	Division		Sewer	Division		
Park Maintenance	Boule- vards 1	Charles River Basin	Wellington Bridge	North System	South System	WATER DIVISION	TOTAL
\$5,987 79	\$1,536 21	\$2,549 35	\$201 03	\$4,920 18	\$4,173 99	\$12,045 03	\$31,413 58

Employees of the Metropolitan District Commission are members of the Rewirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

An equal amount was paid by the State without Reimbursement. The first reimbursement was made in 1928, covering 1922-1927 inclusive. 1930, \$25,061.62; 1931, \$26,176.73. 1932, \$28,361.58.

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metropolitan District Commission. The net cost of pensions paid to employees retired from the direct service of the Commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the state in the following year as given in table 5. The reimbursement in 1933 covers the cost for 1932.

REQUIREMENTS FOR RETIREMENTS

- 1. Any time between ages 60 and 70 with 15 or more years service.
- 2. Any age with 15 years service for ordinary permanent disability.
- 3. Any age with 35 years service.4. Compulsory retirement at age 70.
- Any time after membership in retirement association for permanent disability resulting from an injury received in an accident while in the discharge of duty without fault of the member.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children while under sixteen years of age.

Respectfully submitted,

CHARLES F. HURLEY, Chairman ELIZABETH F. MOLONEY HARRY SCHWARTZMAN, M. D.

Payments to widow during widowbood, or if no widow, for benefit of child or children while under sixteen years of age, if death is the natural and proximate result of accidental injuries occurring in performance and within the scope of duty.

2 Most members with 35 or more years of service retire between the retirement are periods of 60 to 70 years.

2 Most members with 35 or more years of service retire between the retirement are periods of deceased members and unclaimed accounts of former members whose present

address is unknown. Number of unpaid Accounts Nov. 30, 1933 — deceased members 23, \$9,684.84: all others 276, \$5,657.54.

ANNUAL RETIREMENT ALLOWANCE

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts:—Annuity and Pension. Annuity — The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

- (a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments cease upon death.
- (b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

Maximum Assessment. The maximum yearly assessment which the law allows a member to pay to the annuity fund from his salary is 5% of the salary received up to but not exceeding \$35.00 per week or \$91.00 per year. Such assessments plus interest represent a compulsory savings account.

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of service during which the Employee was a contributing member since said date.

*The Average Retirement allowance is the sum of the average annuity Table 7, and the average pension Table 8.

PENSION

ations and is equal to the annuity under option (a) to which the member was entitled from his own account. In The Pension is a definite amount guaranteed for life without change in amount. It is paid from State appropriorder to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the option (b) annuity.

			1928 1929 1930 1931 1932 1933

At retirement a member receives a retirement allowance. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuity paid from contributions plus interest credited to the member's account during his service. (See Table 1.) Members began to contribute from salary or wages June 1, 1912, and the pension for service after 6-1-1912 is equivalent to the annuity purchased by the

member without refund provisions. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-12 is paid by the State. If the sum of pensions (A plus B) added to the Annuity (paid from member's savings plus interest additions) does not exceed \$800, the State pays the additional pension (C) to make a minimum retirement allowance of not less than \$300 for less than twenty-five years of service. Any member retired after September, 1929, with twenty-five or more years service, who paid 5% assessments for all service will receive a retirement allowance not less than \$480. *The average retirement allowance is the sum of the average annuity Table 7, and the average pension Table 8.

". Regular Interest, interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1933, 3 plus 1½ equals 4½%.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1934

Department of Treasurer and Receiver-General

ASS.

REPORT

Division of Board of Retirement, State House, Boston, November 30, 1934.

To the Honorable Senate and House of Representatives:

The twenty-third annual report of the Board of Retirement for the year 1934 is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributory law has been in operation since January 1, 1912, twenty-three years, and the present fund consists of \$6,325,886.34, which has been deducted from the salaries or wages of the members, and \$1,926,285.17 which has been credited as interest and extra dividends to the members' accounts, so that the total of the

accounts of contributing members amounts to \$8,252,171.51.

The annuity reserve for the payment of annuities to members on the retired list is \$520,715.00 and the gross assets are \$8,889,477.42. The Board with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1934, \$103,401.01 as an extra dividend at the rate of one and one-half per cent on the dollars standing to the credit of such accounts on September 30, 1933. Regular interest amounting to \$227,641.69 was also credited to members' accounts during the year which plus \$103,401.01 (surplus) made a total distribution of interest

amounting to \$331,042.70.

The interest derived from the investment of the annuity fund has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1930, $4\frac{1}{2}\%$; 1931, $4\frac{1}{2}\%$; 1932, $4\frac{1}{2}\%$; 1933, $4\frac{1}{2}\%$; 1934, $4\frac{1}{2}\%$. The annuity fund is invested according to restrictions and limitations of the statutes in securities which are a legal investment for the sinking funds of the Commonwealth, these being principally the obligations of the Commonwealth and subdivisions thereof. The savings plus accumulated interest refunded to members who left the service during the year was \$271,297.96, and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$64,455.18, and after retirement was \$8,566.12. There was also paid during said year in annuities \$70,547.24 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) the first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on November 30, 1934, were 12,319; males, 6,995; females, 5,324. There are 277 accounts payable to former members who left the service between 1912-1934 inclusive, present address unknown, amounting to \$5,354.44 and 27 accounts payable to estates or benefici-

aries of deceased members amounting to \$18,875.87.

 $\begin{array}{c} \textbf{TABLE 1} \\ \textbf{STATISTICS RELATING TO EMPLOYEES RETIRED DURING YEAR ENDING} \\ \textbf{NOVEMBER 30, 1934} \end{array}$

more years service Retirements (Age 60-70 Inc.) . Retirements with Spouse	$\frac{1}{70}$	56 67 54	35 26 22	1,671.46 1,852.25 1,574.51	183.96 199.31 92.82	472.56 372.84 175.70	656.52 572.15 263.52

When a member is retired he receives a Retirement Allowance. A retirement allowance is composed of two parts: Annutity (paid from his con.ributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum. Special provision is made for retirement under age to with 35 or more years of service.

During the year ending November 30, 1934, 1,383 new employees became members of the Association and 1,229 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 76 persons during the year; 27 by reason of reaching the age of 70; 1 for ordinary disability; 2 for permanent disability resulting from accidental injury in line of duty; 43 between sixty and seventy years of age upon their request; 1 on account of thirty-five years of service; and 2 wives retired at time of retirement of husbands. The total of the retiring allowances of the 76 employees retired during the year ending November 30, 1934 is \$42,817.44. Of this amount, \$14,555.88 was annuity derived from the contributions made by the members before retirement and the balance of \$28,261.56 was pension paid from State appropriations. Three applications were approved for pensions amounting to \$1,573.44 to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Sixteen payments are now being made under this law. The largest payment to a widow is \$990.00; the average is \$767.17.

TABLE 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1934
(AGE NEAREST BIRTHDAY)

Widows not included Under Total Males Females Totals

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 943 members and 6 non-members, and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 16. Since retirement 400 members and 5 non-members have died, so that retirement allowances are now being paid to 543 former employees. Of this number 228 were retired at the age of seventy or over; 251 were retired upon their request between sixty and seventy years of age; 15 were retired with 35 years of service under age sixty; 8 were wives retired at time of retirement of husbands; 23 were retired for ordinary permanent disability; 18 were retired for permanent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

TABLE 3

NUMBER OF RETIRED EMPLOYEES ON LIST NOVEMBER 30, 1934, ACCORDING TO AGE LAST BIRTHDAY (WIDOWS EXCLUDED)

Age	No. Age	No. Age	No. Age
27	1 55	2 68	17 81

The average age of persons on the retired list is 72.11 years.

During the year ending November 30, 1934, \$238,592.03 was paid as pensions to persons upon the retired list as compared with \$214,111.39 for the previous year and in addition the State paid \$6,635.00 covering the net loss to maintain the annuity reserve on December 31, 1933. The largest retirement allowance being paid to an individual is \$2,232.00 composed of an annuity paid from the savings of the retired member of \$374.64 and a pension paid by the State of \$1,857.36. The average retirement allowance paid to retired employees on the list November 30, 1934, is \$570.45. The total annual retirement allowances of persons on the list November 30, 1934, is \$322,604.02, divided as follows; annuity, \$74,765.00; pension, \$247,839.02 (widows' pensions included, \$12,274.81.)

The retirement system has 780 members who may voluntarily retire during the coming fiscal year; and 44 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$12,200.00 in addition to the amount of pensions \$247,800.00 in force on November 30, 1934. The Board has requested an appropriation of \$260,000.00 to cover the cost of pensions for the year ending November 30, 1935.

Table 4

The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1934 was \$4,390.00.

2Cost for 6 months. (First pension was paid 6-1-1912.)

P.D. 99

The expenses of the administration of the system for the year were: Salaries, \$9,421.49; contingent expenses, \$894.56; reimbursement to institutions for making deductions from members' salaries, etc., \$4,390.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system (See foot note Table 4).

ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE

Year 1934

	PARK DI	VISION		Sewer	Division			
Park Maintenance	Boule- vards ¹	Charles River Basin	Wellington Bridge	North System	South System	WATER Division	TOTAL	
\$6,249 13	\$2,272 34	\$3,223 16	\$376 19	\$5,501 59	\$5,159 02	\$16,398 00	\$39,179 43	

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

'An equal amount was paid by the State without Reimbursement. The first reimbursement was made in 1928, covering 1922-1927 inclusive. 1931, \$26,176.73; 1932, \$28,361.58; 1933, \$31,413.58.

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metro-politan District Commission. The net cost of pensions paid to employees retired from the direct service of the Commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the state in the following year as given in table 5. The reimbursement in 1934 covers the cost for 1933.

Respectfully submitted,

CHARLES F. HURLEY, Chairman ELIZABETH F. MOLONEY HARRY SCHWARTZMAN, M.D.

SOME FACTS ABOUT THE CONTRIBUTORY RETIREMENT LAW FOR STATE EMPLOYEES.

Membership—The Law has been in operation since January 1, 1912. is contributory and accumulates an amount which at retirement provides a part and ultimately in most cases one-half of the total retirement benefit. The Law compels each permanent employee of the State or Metropolitan District Commission to save systematically for retirement purposes, and when he retires the State rewards his thrift by creating a fund equal to the sum he has provided for himself. thereby increasing his account 100% and dividing the cost of retirement benefit equally between the State and the employee, with the exception that the State pays in addition the cost of administration expenses. The system is contractual and the employee has the right to retire but he also may be retired with the approval of the Board of Retirement upon the request of the head of the department in which he is employed.

Assessments-Every member of the Retirement Association except some employed prior to June 1, 1918 is required to pay 5% of the salary he receives up to but not exceeding \$35.00 per week, but in no case shall the annual maximum assessment exceed \$91.00 per year. The assessments plus interest represent the compulsory savings account to the credit of each member. In case of death or resignation before retirement, the total contributions plus interest are refunded to the

employee, his estate or beneficiary as the case may be.

REQUIREMENTS FOR RETIREMENT

- 1. Any time between ages 60 and 70 with 15 or more years service.
- 2. Any age with 15 years service for ordinary permanent disability.

3. Any age with 35 years service.4. Compulsory retirement at age 70.

5. Any time after membership in retirement association for permanent disability resulting from an injury received in an accident while in the discharge of duty without fault of the member.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children under sixteen years of age.

Annual Retirement Allowance

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts:—Annuity and Pension. Annuity—The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

(a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments cease upon death.

(b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of service during which the Employee was a contributing member since said date.

*The Average Retirement allowance is the sum of the average annuity Table 6, and the average pension Table 7:

PENSION

The Pension is a definite amount guaranteed for life without change in amount. It is paid from State appropriations and is equal to the annuity under option (a) to which the member was entitled from his own account. In order to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the option (b) annuity.

SUMMARY

To arrive at the cost or amount of retirement benefits, the figures quoted in table 6 must be combined with the figures quoted in table 7.

TOTAL PENSIONS TO EMPLOYEES RETIRED DURING EACH YEAR ENDING NOVEMBER 30TH AND OTHER PAYMENTS ON SAID DATE. TABLE 7

(1See Table 1 for Average Retirement Allowances for 1934)

At retirement a member receives a RETHEMENT ALLOWANCE. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuiry (paid from contribu-

tions plus interest credited to the member's account during his service. (See Table 1.)
Members began to contribute from salary or wages June 1.1912, and the pension for service after 6-1-1912 is add by the State part of the retirement allowance (pension plus annuity) for service prior to 6-1-12 is paid by the State by the State by the State pays the additional pensions. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-12 is paid by the State pays the additional pension (C) fit he sum of pensions (A plus B) added to the Annurry (paid from member's savings plus interest additions) does not exceed \$300, the State pays the additional pension (C) to make a minimum retirement allowance of not less than \$300 for less than twenty-five years of service. Any member retired after September, 1929, with twenty-five or more years service, who paid 5% assessments for all service will receive a retirement allowance not less than \$480.

*The average retirement allowance is the sum of the average annuity Table 6, and the average pension Table 7.

Retirement association organized Feb. 1, 1912 with membership 3,324.

Active membership Nov. 30, 1934,—males 6995, females 5,324; a/c payable death of former members etc 304.

Payments to widow during widowhood, or if no widow, for benefit of child or children while under sixteen years of age, if death is the natural and proximate result of accidental injuries occuring in performance and within the scope of duty.

Most members with 35 or more years of service retire between the retirement age periods of 60 to 70 years.

Active Accounts are present employees and Accounts payable are unpaid accounts of deceased members and unclaimed accounts of former members whose present address is

unknown.

"'Regular Interest,' interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1934, 3 plus 1½ equals 4½%.

ANNUAL STATEMENT OF THE CONDITION AND AFFAIRS OF THE STATE EMPLOYEES' RETIREMENT SYSTEM OF THE COMMONWEALTH OF MASSACHUSETTS. CONTRIBUTIONS BEGAN JUNE 1, 1912.

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1935

Department of Treasurer and Receiver-General

MASS. DOCS. DOLL.

REPORT

Division of Board of Retirement State House, Boston, November 30, 1935.

To the Honorable Senate and House of Representatives:

The twenty-fourth annual report of the Board of Retirement for the year 1935 is herewith presented for your consideration.

No change in the personnel of the Board occurred during the year.

The contributory law has been in operation since January 1, 1912, twenty-four years, and the present fund consists of \$6,862,321.44, which has been deducted from the salaries or wages of the members, and \$2,160,370.52 which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of contributing members amounts to \$9,022,691.96.

The annuity reserve for the payment of annuities to members on the retired list is \$610,317.00 and the gross assets are \$9,755,840.00. The Board with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1935, \$95,068.78 as an extra dividend at the rate of one and one-quarter per cent on the dollars standing to the credit of such accounts on September 30, 1934. Regular interest amounting to \$249,096.20 was also credited to members' accounts during the year which plus \$95,068.78 (surplus) made a total distribution of interest amounting to \$344,164.98.

The interest derived from the investment of the annuity fund has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1931, 4½%; 1932, 4½%; 1933, 4½%; 1934, 4½%; 1935, 4¼%. The annuity fund is invested in securities which are a legal investment for the sinking funds of the Commonwealth (Chap. 29, G.L., Sec. 38, as amended), these being principally the obligations of certain States and political subdivisions thereof. The savings plus accumulated interest refunded to members who left the service during the year was \$256,827.39 and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$62,433.08, and after retirement was \$16,337.25. There was also paid during said year in annuities \$82,283.24 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was \$3,324, and the contributing members on November 30, 1935 were 13,135; males, 7,429; females, 5,706. There are 278 accounts payable to former members who left the service between 1912-1935 inclusive, present address unknown, amounting to \$8,030.79 and 24 accounts payable to estates or beneficiaries of deceased members amounting to \$7,168.89.

Table 1
STATISTICS RELATING TO EMPLOYEES RETIRED DURING YEAR ENDING NOVEMBER 30, 1935

	Cases	Average Age at Retire- ment	Average Years of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance	
Disability, Ordinary	1 6	58 58	28 22	\$1,793 00 1,731 48		\$202 20 666 62	\$333 36 806 32	
more years service . Retirements (Age 60-70 Inc.) Retirements with Spouse .	72	68	27	2,220 02	237 36	454 29	691 65	

When a member is retired he receives a Retirement Allowance. A retirement allowance is composed of two parts: Annuity (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum. Special provision is made for retirement under age 60 with 35 or more years of service.

During the year ending November 30, 1935, 1965 new employees became members of the Association and 1078 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 79 persons during the year; 44 by reason of reaching the age of 70; 1 for ordinary disability; 6 for permanent disability resulting from accidental injury in line of duty; 28 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 79 employees retired during the year ending November 30, 1935 is \$54,970.08. Of this amount, \$18,059.40 was annuity derived from the contributions made by the members before retirement and the balance of \$36,910.68 was pension paid from State appropriations. Two applications were approved for pensions amounting to \$1,230.00 to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Eighteen payments are now being made under this law. The largest payment to a widow is \$990.00; the average is \$750.26.

TABLE 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1935
(AGE NEAREST BIRTHDAY)
Widows not included

Sex				Under 60	60	61	62	63	64	65	66	67	68	69	70	Total	
Males . Females	:	:			45 35	32 30	26 18	27 12	21 21	26 11	28 21	40 16	29 7	33 25	27 15	388 95	722 306
Totals	•	•	•		80	62	44	39	42	37	49	56	36	58	42	483	1,028

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 1,022 members and 6 non-members and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 18. Since retirement 444 members and 5 non-members have died, so that retirement allowances are now being paid to 579 former employees. Of this number 251 were retired at the age of seventy or over; 260 were retired upon their request between sixty and seventy years of age; 14 were retired with 35 years of service under age sixty; 8 were wives retired at time of retirement of husband; 23 were retired for ordinary permanent disability; 22 were retired for permanent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

Table 3

NUMBER OF RETIRED EMPLOYEES ON LIST NOVEMBER 30, 1935, ACCORDING TO

AGE LAST BIRTHDAY (WIDOWS EXCLUDED)

The average age of persons on the retired list is 72.15 years.

During the year ending November 30, 1935, \$259,743.44 was paid as pensions to persons upon the retired list as compared with \$238,592.03 for the previous year and in addition the State paid \$9,447.06 covering the net loss to maintain the annuity reserve on December 31, 1934. The largest retirement allowance being paid to an individual is \$2,232.00 composed of an annuity paid from the savings of the retired member of \$374.64 and a pension paid by the State of \$1,857.36. The average retirement allowance paid to retired employees on the list November 30, 1935 is \$599.50. The total annual retirement allowances of persons on the list November 30, 1935 is \$357,446.15, divided as follows; annuity, \$87,717.52; pension, \$269,728.63 (widows' pensions included, \$13,504.81).

The retirement system has 871 members who may voluntarily retire during the coming fiscal year; and 41 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$14,300.00 in addition to the amount of pensions \$269,700.00 in force on November 30, 1935. The Board has requested an appropriation of \$284,000.00 to cover the cost of pensions for the year ending November 30, 1936.

Table 4

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1935 was \$4,195.00.

² Cost for 6 months. (First pension was paid 6-1-1912.)

The expenses of the administration of the system for the year were: Salaries, \$9.888.70; contingent expenses, \$1,649.82; reimbursement to institutions for mak-

P.D. 99

ing deductions from members' salaries, etc., \$4,195.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system (See foot note Table 4).

ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE

1 ear	1959	
	Sewer	Division

	VISION		Sewer	Division				
Park Maintenance	Boule- vards ¹	Charles River Basin	Wellington Bridge	North System			TOTAL	
\$7,874 91	\$2,700 26	\$3,631 07	\$522 03	\$6,830 67	\$6,878 47	\$19,338 46	\$47,775 87	

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251-1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

'An equal amount was paid by the State without Reimhursement. The first reimbursement was made in 1928, covering 1922-1927 inclusive. 1932, \$28,361.58; 1933, \$31,413.58; 1935, \$39,179.43.

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metropolitan District Commission. The net cost of pensions paid to employees retired from the direct service of the Commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the state in the following year as given in table 5. The reimbursement in 1935 covers the cost for 1934.

Respectfully submitted.

CHARLES F. HURLEY, Chairman ELIZABETH F. MOLONEY HARRY SCHWARTZMAN, M.D.

SOME FACTS ABOUT THE CONTRIBUTORY RETIREMENT LAW FOR STATE EMPLOYEES.

Membership—The Law has been in operation since January 1, 1912. The system is contributory and accumulates an amount which at retirement provides a part and ultimately in most cases one-half of the total retirement benefit. The Law compels each permanent employee of the State or Metropolitan District Commission to save systematically for retirement purposes, and when he retires the State rewards his thrift by creating a fund equal to the sum he has provided for himself, thereby increasing his account 100% and dividing the cost of retirement benefit equally between the State and the employee, with the exception that the State pays in addition the cost of administration expenses. The system is contractual and the employee has the right to retire but he also may be retired with the approval of the Board of Retirement upon the request of the head of the department in which he is employed.

Assessments—Every member of the Retirement Association except some employed prior to June 1, 1918 is required to pay 5% of the salary he receives up to but not exceeding \$35.00 per week, but in no case shall the annual maximum assessment exceed \$91.00 per year. The assessments plus interest represent the compulsory savings account to the credit of each member. In case of death or resignation before retirement, the total contributions plus interest are refunded

to the employee, his estate or beneficiary as the case may be.

REQUIREMENTS FOR RETIREMENT

- Any time between ages 60 and 70 with 15 or more years service. Any age with 15 years service for ordinary permanent disability. 2.
- Any age with 35 years service. 3. Compulsory retirement at age 70.

5. Any time after membership in retirement association for permanent disability resulting from an injury received in an accident while in the discharge of duty without fault of the member.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children under sixteen years of age.

Annual Retirement Allowance

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts:—Annuity and Pension. Annuity—The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

- (a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments cease upon death.
- (b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

Table 6

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of service during which the Employee was a contributing member since said date.

*The Average Retirement allowance is the sum of the average annuity Table 6, and the average

pension Table 7.

PENSION

The Pension is a definite amount guaranteed for life without change in amount. It is paid from State appropriations and is equal to the annuity under option (a) to which the member was entitled from his own account. In order to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the option (b) annuity.

SUMMARY

To arrive at the cost or amount of retirement benefits, the figures quoted in table 6 must be combined with the figures quoted in table 7.

TOTAL PENSIONS TO EMPLOYEES RETIRED DURING EACH YEAR ENDING NOVEMBER \$0TH AND OTHER PAYMENTS ON SAID DATE. TABLE 7

contributions plus interest credited to the member's account during his service. (See Table 1.)

Members began to contribute from salary or wages June 1, 1912, and the pension for service after 6-1-1912 is equivalent to the annuity purchased by the member without refund provisions. The entire cost of the retirement allowance (pension plus annuity) for service prior to 6-1-12 is paid by the State by the member of the sum of pensions. Apply 1 and 1 and 1 annuity of the sum of pensions (A plus B) added to the Annutry (paid from member savings plus interest additions) does not exceed \$300, the State pays the additional pension (C), to make a minimum retirement allowance of not less than \$300 for less than twenty-five years of service. Any member retired after September, 1929, with twenty-five or more years service, who paid \$6% assessments for all service will receive a retirement allowance not less than \$480. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annuity (paid from At retirement a member receives a RETIREMENT ALLOWANCE.

Retirement association organized Feb. 1, 1912 with membership 3,324.

Active membership Nov. 30, 1935—males 7,429; females 5,706; a/c payable including deceased former members, etc., 302.

Payments to widow during widowhood, or if no widow, for benefit of child or children while under sixteen years of age, if death is the natural and proximate result of accidental injuries occuring in performance and within the scope of duty.

*Most members with 35 or more years of service retire between the retirement age periods of 60 to 70 years.

*Active Accounts are present employees and Accounts payable are unpaid accounts of deceased members and unclaimed accounts of former members whose present address is unknown.

"Regular Interest, interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Sexthai interest, in addition to "regular interest," and is distributed on June thritten of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1985, 3 plus 1¼ equals 4¼%.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1936

Department of Treasurer and Receiver-General

ASS. OCS. OLL.

The Commonwealth of Massachusetts

REPORT

DIVISION OF BOARD OF RETIREMENT STATE HOUSE, BOSTON, November 30, 1936.

To the Honorable Senate and House of Representatives:

The twenty-fifth annual report of the Board of Retirement for the year 1936 is

herewith presented for your consideration.

The personnel of the Board consists of three members: (1) The Treasurer and Receiver General, Chairman ex officio; (2) A member of the Retirement Association; (3) a person appointed by the first and second members. Miss Rebecca J. Greene was elected for a term of three years beginning February 16, 1936 upon ballots cast by members of the Retirement Association as the employee representative member of the Board.

The contributory law has been in operation since January 1, 1912, twenty-five years, and the present fund consists of \$7,497,104.17 which has been deducted from the salaries or wages of the members, and \$2,426,698.02 which has been credited as interest and extra dividends to the members' accounts, so that the total of

the accounts of contributing members amounts to \$9,923,812.19.

The annuity reserve for the payment of annuities to members on the retired list is \$665,177.00 and the gross assets are \$10,691,437.26. The Board with the approval of the Commissioner of Insurance, credited to active accounts on June 30, 1936, \$104,313.81 as an extra dividend at the rate of one and one-quarter per cent on the dollars standing to the credit of such accounts on September 30, 1935. Regular interest amounting to \$274,036.30 was also credited to members' accounts during the year which plus \$104,313.81 (surplus) made a total distribution of in-

terest amounting to \$378,350.11.

The interest derived from the investment of the annuity fund has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1932, 4½%; 1933, 4½%; 1934, 4½%; 1935, 4½%; 1936, 4½%. The annuity fund is invested in securities which are a legal investment for the sinking funds of the Commonwealth (Chap. 29, G. L., Sec. 38, as amended), these being principally the obligations of certain States and political subdivisions thereof. The savings plus accumulated interest refunded to members who left the service during the year was \$278,047.31 and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$67,538.07 and after retirement was \$18,927.23. There was also paid during said year in annuities \$91,846.83 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January, 1912) was 3,324, and the contributing members on November 30, 1936 were 14,708; males, 8,356; females, 6,352. There are 278 accounts payable to former members who left the service between 1912-1936 inclusive, present address unknown, amounting to \$8,387.19 and 35 accounts payable to estates or benefi-

ciaries of deceased members amounting to \$21,919.51.

The average age of persons on the retired list is 72.45 years.

During the year ending November 30, 1936, 2,752 new employees became members of the Association and 1,106 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 62 persons during the year; 36 by reason of reaching the age of 70; 1 for ordinary disability; 2 for permanent disability resulting from accidental injury in line of duty; 22 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 62 employees retired during the year ending November 30, 1936 is \$46,097.28. Of this amount, \$15,975.84 was annuity derived from the contributions made by the members before retirement and the balance of \$30,121.44 was pension paid from State appropriations. Three applications were approved for pensions amounting to \$2,760.00 to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under sixteen years of age, of one-half the member's rate of pay in case of the death of a member from an injury received through no fault of his own while in the discharge of his duty. Twenty-one payments are now being made under this law. The largest payment to a widow is

\$1,230.00; the average is \$774.51.

TABLE 2

TOTAL NUMBER RETIRED UNDER THE LAW TO NOVEMBER 30, 1936
(AGE NEAREST BIRTHDAY)

Widows not included

Under Total Sex $\frac{758}{332}$ Males Females 1.090 Totals

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 1,084 members and 6 non-members and the total number of payments granted to widows on account of death of husband from accidental injuries received in line of duty is 21. Since retirement 495 members and 5 non-members have died, so that retirement allowances are now being paid to 590 former employees. Of this number 266 were retired at the age of seventy or over; 258 were retired upon their request between sixty and seventy years of age; 14 were retired with 35 years of service under age sixty; 9 were retired as spouse at time of retirement of husband or wife; 21 were retired for ordinary permanent disability; 21 were retired for permanent accidental disability because of such injuries received in the line of duty. In addition 1 non-member who was over fifty-five years of age when the retirement law was passed and who was retired upon the request of the department in which he was employed is now receiving the minimum payment.

Table 3
STATISTICS RELATING TO EMPLOYEES RETIRED DURING YEAR ENDING NOVEMBER 30, 1936

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary	1 2	52 56	19 16	\$949.03 1,149.00	\$105.36 61.14	\$194.64 502.74	\$300.00 563.88
more years service	58 1	68 55	30 24	2,078.00 1,925.00	268.66 166.32	495.78 166.32	764.44 332.64

When a member is retired he receives a Retirement Allowance. A retirement allowance is composed of two parts: Annutry (paid from his con-ributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may also retire at the same time simply on the right acquired by the other. The retirement allowance is based on the service rendered, etc., with no minimum. Special provision is made for retirement under age 60 with 35 or more years of service.

During the year ending November 30, 1936, \$273,997.61 was paid as pensions to persons upon the retired list as compared with \$259,743.44 for the previous year and in addition the State paid \$7,916.95 covering the net loss to maintain the annuity reserve on December 31, 1935. The largest retirement allowance being paid to an individual is \$2,232.00 composed of an annuity paid from the savings of the retired member of \$374.64 and a pension paid by the State of \$1,857.36. The average retirement allowance paid to retired employees on the list November 30, 1936 is \$615.16. The total annual retirement allowances of former employees on the list November 30, 1936 is \$362,946.34 divided as follows: annuity \$97,289.79; pension \$281,921.36 and in addition widows' pensions amounting to \$16,264.81.

The retirement system has 813 members who may voluntarily retire during the coming fiscal year; and 48 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$16,300.00 in addition to the amount of pensions \$281,921.36 in force November 30, 1936. The Board has requested an appropriation of \$298,200.00 to cover the cost of pensions for the year ending November 30, 1937.

¹The reimbursement is made to show the estimated additional cost of bookkeeping caused by the operation of the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the State as yearly income and the amount of such income paid to thirty-nine institutions and schools in 1936 was \$4,151.00.

²Cost for 6 months. (First pension was paid 6-1-1912.)

The expenses of the administration of the system for the year were: salaries, \$10,755.90; contingent expenses, \$2,239.81; reimbursement to institutions for making deductions from members' salaries, etc., \$4,151.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the probable cost of operating the system (See foot note Table 4).

TABLE 5

ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE

Year 1936

	PARK DI	VISION		Sewer	Division			
Park Maintenance	Boule- vards ¹	Charles River Basin	Wellington Bridge	North System	South System	WATER Division	TOTAL	
\$7,130 43	\$2,944 56	\$3,586 29	\$ 522 03	\$8,179 10	\$8,035 55	\$20,050 17	\$50,448 13	

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251–1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

1An equal amount was paid by the State without Reimbursement. The first reimbursement was made in 1928, covering 1922–1927 inclusive. 1933, \$31,413.58; 1934, \$39,179.43; 1935, \$47,775.87.

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metropolitan District Commission. The net cost of pensions paid to employees retired from the direct service of the Commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the state in the following year as given in table 5. The reimbursement in 1936 covers the cost for 1935.

Respectfully submitted.

CHARLES F. HURLEY, Chairman REBECCA J. GREENE HARRY SCHWARTZMAN, M.D.

SOME FACTS ABOUT THE CONTRIBUTORY RETIREMENT LAW FOR STATE EMPLOYEES.

Membership—The Law has been in operation since January 1, 1912. The system is contributory and accumulates an amount which at retirement provides a part and ultimately in most cases one-half of the total retirement benefit. The Law compels each permanent employee of the State or Metropolitan District Commission to save systematically for retirement purposes, and when he retires the State rewards his thrift by creating a fund equal to the sum he has provided for himself, thereby increasing his account 100% and dividing the cost of retirement benefit equally between the State and the employee, with the exception that the State pays in addition the cost of administration expenses. The system is contractual and the employee has the right to retire but he also may be retired with the approval of the Board of Retirement upon the request of the head of the department in which he is employed.

Assessments-Every member of the Retirement Association except some employed prior to June 1, 1918 is required to pay 5% of the salary he receives up to but not exceeding \$35.00 per week, but in no case shall the annual maximum assessment exceed \$91.00 per year. The assessments plus interest represent the compulsory savings account to the credit of each member. In case of death or resignation before retirement, the total contributions plus interest are refunded to the employee,

his estate or beneficiary as the case may be.

REQUIREMENTS FOR RETIREMENT

Any time between ages 60 and 70 with 15 or more years service.

Any age with 15 years service for ordinary permanent disability.

Any age with 35 years service. 3. Compulsory retirement at age 70. 4.

Any time after membership in retirement association for permanent dis-5. ability resulting from an injury received in an accident while in the discharge of duty without fault of the member.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children under sixteen years of age.

ANNUAL RETIREMENT ALLOWANCE

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts:—Annuity and Pension. Annuity—The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

(a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments cease upon death.

(b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of service during which the Employee was a contributing member since said date.

*The Average Recirement allowance is the sum of the average annuity Table 6, and the average pension

PENSION

The Pension is a definite amount guaranteed for life without change in amount. It is paid from State appropriations and is equal to the annuity under option (a) to which the member was entitled from his own account. In order to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the option (b) annuity.

SUMMARY

To arrive at the cost or amount of retirement benefits, the figures quoted in table 6 must be combined with the figures quoted in table 7.

TOTAL PENSIONS TO EMPLOYEES RETIRED DURING EACH YEAR ENDING NOVEMBER 30TH AND OTHER PAYMENTS ON SAID DATE. (See Table 1 for Average Retirement Allowances for 1936) TABLE 7

		Year	1932 1933 1934 1935 1936

Members began to contribute from salary or wages June 1, 1912, and the pension for service after 6-1-1912 is equivalent to the annuity purchased by the member without refund provisions. The entire cost of the retirement allowance (pensions provisions) are manuity for service provisions. The entire cost of the retirement allowance (pensions) provisions of the sum of pensions (A plus B) added to the salary (gaid from member's savings plus interest additions) does not exceed \$300, the State pays the additional pension (C) If the sum of pensions (A plus B) added the saving than \$300 for less than twenty-five years of service. Any member retired after September, 1929, with twenty-five or more At retirement a member receives a RETREMENT ALLOWANCE. A retirement allowance is composed of two parts; Pension (paid by the State) plus Annury (paid from contributions plus interest credited to the member's account during his service. (See Table 1.)

*The average retirement allowance is the sum of the average annuity Table 6, and the average pension Table 7. years service, who paid 5% assessments for all service will receive a retirement allowance not less than \$480.

Retirement association organized Feb. 1, 1912 with membership 3,324.

Active membership proves 30, 1936—males 8,336; females 6,352; a/c payable 313—including (a) deceased former members, (b) former members present address unknown. Payments to widow during window, for benefit of child or children while under sixteen years of age, if death is the natural and proximate result of accidental injuries occuring in performance and within the scope of duty.

Most members with 35 or more years of service retire between the retirement age periods of 60 to 70 years.

Active members and Accounts and Accounts payable are unpaid accounts of deceased members and unclaimed accounts of former members whose present address is

unknown.

"Regular Interest,' interest at three per cent per annum, compounded semi-annually on the last days of December and June and reckoned for full three and six months periods only." Surplus is extra interest, in addition to "regular interest," and is distributed on June thirtieth of each year and is figured on the accumulation of the account on the preceding September thirtieth. To obtain the interest rate each year add 3% to the rate of surplus, i.e., 1936, 3 plus 1½ equals 4½%.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

BOARD OF RETIREMENT

FOR THE

YEAR ENDING NOVEMBER 30, 1938

Department of Treasurer and Receiver-General

MASS. DOCS. COLL.

NOTE. -- Public Document No. 99 for the year 1937 is not available.

The Commonwealth of Massachusetts

REPORT

DIVISION OF BOARD OF RETIREMENT STATE HOUSE, BOSTON, December 1, 1938.

To the Honorable Senate and House of Representatives:

The twenty-seventh annual report of the Board of Retirement for the year 1938 is presented herewith for your consideration.

The personnel of the Board consists of three members: (1) The Treasurer and Receiver General, Chairman ex officio; (2) A member of the Retirement Association; (3) A person appointed by the first and second members.

The contributory law has been in operation since January 1, 1912, twenty-seven years, and the present fund consists of \$8,920,255.59 which has been deducted from the salaries or wages of the members, and \$2,840,027.49 which has been credited as interest and extra dividends to the members' accounts, so that the total of the accounts of contributing members amounts to \$11,760,-283.08.

The annuity reserve for the payment of annuities to members on the retired list is \$851,010.00 and the gross assets are \$12,811,470.52. Regular interest amounting to \$367,445.16 was credited to members' accounts during the year,

which was at the rate of 31/2% compounded annually.

The interest derived from the investment of the annuity fund has provided for the last five years substantially the following yearly rate of distribution to the members' accounts: 1934, 4½%; 1935, 4¼%; 1936, 4¼%; 1937, 3½%; 1938, 3½%. The annuity fund is invested in securities which are a legal investment for the sinking funds of the Commonwealth (Chap. 29, G. L., Sec. 38, as amended) these being principally the obligations of certain States and political subdivisions thereof. The savings plus accumulated interest refunded to members who left the service during the year was \$275,898.48 and the amount refunded to the heirs, estates or beneficiaries of members who died before retirement was \$97,126.57 and after retirement was \$16,747.20. There was also paid during said year in annuities \$118,419.75 from the annuity reserve fund composed of retired members' accounts, which may be compared with \$3.67, the amount of annuities paid during (1912) first year of operation of the retirement system.

The membership of the Retirement Association when it was first organized (January 1912) was 3,324, and the contributing members on November 30,

1938 were 17,296; males, 9678; females, 7,618.

P.D. 99

During the year ended November 30, 1938, 3,820 new employees became members of the Association and 1,355 left the service by reason of death or resignation before becoming eligible for retirement. Retirement allowances were granted to 87 persons during the year; 49 by reason of reaching the age of 70; 2 for ordinary disability; 1 for permanent disability resulting from accidental injury in line of duty; 35 between sixty and seventy years of age upon their request. The total of the retiring allowances of the 87 employees retired during the year ended November 30, 1938 is \$61,146,36. Of this amount, \$21,990.48 was annuity derived from the contributions made by members before retirement and the balance of \$39,155.88 was pension paid from State appropriations. Three applications were approved for pensions amounting to \$3,729.96 to widows of members on account of the death of the husband from injuries received in line of duty.

The law provides compensation to a widow during her widowhood, or if there is no widow, for the benefit of a child or children under eighteen years of age, of one-half the member's rate of pay in case of death of a member from injury received through no fault of his own while in the discharge of his duty. Twenty-four payments are now being made under this law. The

largest payment to a widow is \$1,890.00; the average is \$838.34.

Table 2

Total number retired under the Law to november 30, 1938 (AGE NEAREST BIRTHDAY)

Widows not included

	Sex				Under 60	60	61	62	63	64	65	66	67	68	69	70	Total

Totals				٠	96	72	47	45	49	42	64	63	42	65	54	623	1,262

The number of employees who have been granted a retirement allowance since the first employee was retired on June 1, 1912, is 1,256 members and 6 non-members and the total number of payments granted widows on account of death of husband from accidental injuries received in line of duty is 26. Since retirement 591 members and 5 non members have died, so that retirement allowances are now being paid to 666 former employees. Of this number 319 were retired at the age of seventy or over; 275 were retired upon their request between sixty and seventy years of age; 14 were retired with 35 years of service under age sixty; 10 were retired as spouse at time of retirement of husband or wife; 26 were retired for ordinary permanent disability; 21 were retired for permanent accidental disability because of such injuries received in the line of duty, and one non-member who was over fifty-five years of age when the retirement law was passed is now receiving the minimum payment.

Table 3
STATISTICS RELATING TO EMPLOYEES RETIRED DURING YEAR ENDED NOVEMBER 30, 1938

	Cases	Average Age at Retire- ment	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allow- ance
Disability, Ordinary Accidental Retirement under 60 with 35 or	2	53 45	25 25	\$1,115. 2,345.	\$102.72 128.64	\$377.28 1,030.68	\$480.00 1,159.32
more years service Retirements (Age 60-70 Inc.) . Retirements with Spouse	83 1	67.98 54	26.83 29	1,966. 1,445.	259.28 136.56	445.71 179.52	704.99 316.08

When a member is retired he receives a Retirement Allowance. A retirement allowance is composed of two parts: Annuty (paid from his contributions plus interest credited thereto during service) plus Pension (paid by the State). Spouse: when a husband or wife retires the spouse may be retired at the same time for the good of the service. The retirement allowance is based on the service rendered, etc., with no minimum. Special provision is made for retirement under age 60 with 35 or more years of service.

The largest retirement allowance being paid to an individual is \$2,693.52 composed of an annuity paid from the savings of the retired member of \$411.48 and a pension paid by the State of \$2,282.04. The average retirement allowance paid to retired employees on the list November 30, 1938 is \$637.94. The total annual retirement allowances of former employees on the list November 30, 1938 was \$424,873.19 divided as follows: annuity \$125,463.36; pension \$299,409.83 and in addition widows' pensions amounting to \$20,120.29.

The retirement system has 853 members who may voluntarily retire during the coming fiscal year; and 57 who must retire at the age of seventy, the compulsory retirement age. The number who will voluntarily retire is uncertain. The Board has submitted estimates for the amount of appropriations required to pay the cost of pensions for the next fiscal year upon experience it has gained that 4% of the members eligible to retire will voluntarily retire in addition to those who must retire at the age of seventy. This will require about \$10,500.00 in addition to the amount of pensions \$319,530.12 in force November 30, 1938. The Board has requested an appropriation of \$330,000.00 to cover the cost of pensions for the year ending November 30, 1939.

TABLE 4

PAYMENTS BY COMMONWEALTH FOR PENSIONS AND ADMINISTRATION EXPENSES OF RETIREMENT SYSTEM.
YEARS ENDED NOVEMBER 30TH.

	YEARS ENDED NOVEMBER 30TH.						
	1934	1935	1936	1937	1938		
Pensions and requirements of annuity fund Expense of administration .	\$245,227.03 14,706.05	\$269,190.50 15,733.52	\$281,914.56 17,146.71	\$290,244.31 17,666.38	\$308,688.63 18,809.17		
GROSS COST	\$259,933.08	\$284,924.02	\$299,061.27	\$307,910.69	\$327,497.80		

The expenses of administration of the system for the year were: salaries, \$11,641.78; contingent expenses, \$1,690.39; reimbusement to institutions for making deductions from members' salaries, \$5,477.00. The reimbursement to State institutions is purely a bookkeeping transaction to show the estimated cost of work connected with the retirement law at the institution, school, etc., located in different parts of the State. The institution or school is required by law to return such money to the general revenue of the commonwealth.

TABLE 5

ASSESSMENTS UPON METROPOLITAN DISTRICT TO REIMBURSE THE STATE FOR PENSIONS PAID TO EMPLOYEES RETIRED FROM THE METROPOLITAN DISTRICT SERVICE

	ivision		Sewer 1	Division			
Park Maintenance	Boule- vards ¹	Charles River Basin	Wellington Bridge	North System	South System	WATER Division	TOTAL
\$9,033.64	\$3,126.85	\$3,028.14	\$522.03	\$8,820.23	\$7,531.77	\$21,430.94	\$53,493.60

Employees of the Metropolitan District Commission are members of the Retirement System for State employees. Under Chapter 251–1928 the cost of pensions paid to former employees of the Metropolitan District Commission during each year ending November 30th are assessed in the following year upon the proper section of the Metropolitan District. Such assessments become a part of the general revenue of the Commonwealth in the year in which the assessments are made.

Financial Statement Verified. Approved.

The annual cost of pensions as given in table 4 is the gross cost of all pensions including the amount paid to employees retired from the service of the Metropolitan District Commission. The net cost of pensions paid to employees retired from the direct service of the commonwealth is the difference between the amount stated in table 4 and the reimbursement made to the State in the following year as given in table 5. The reimbursement in 1938 covers the cost for 1937.

Respectfully submitted,

WILLIAM E. HURLEY, Chairman REBECCA J. GREENE HARRY SCHWARTZMAN, M.D.

LEGISLATION

Under Chapter 26, Resolves of 1937, the Legislature established a Commission to study various bills pertaining to the State Retirement System. The full report of the Commission, House 1582-1937, recommended a re-draft of the entire State Retirement Act which became a law under Chapter 439, Acts of 1938, effective July 1, 1938. The major changes in the law are:

1. Increase of minimum retirement allowance from \$300 to \$480 per

annum. This will give greater protection to lower paid employees.

2. Contributions to be deducted from salaries up to \$2,600 instead of \$1,820. This will affect a number of higher paid employees and will provide for them a more adequate allowance.

3. The maximum retirement allowance for long service to be two thirds pay instead of half pay. This will reward long service with a better allowance and will benefit all such employees.

4. Employees in certain classes, such as police, prison officers and conservation officers, who perform dangerous and difficult work requiring men of youth and vigor, to retire at age sixty-five instead of seventy, with proper provision for extra compensation because of such earlier retirement. This will reduce the average age of employees in these classes materially, and will improve the service.

SOME FACTS ABOUT THE CONTRIBUTORY RETIREMENT LAW FOR STATE EMPLOYEES.

Membership—The Law has been in operation since January 1, 1912. system is contributory and accumulates an amount which at retirement provides a part and ultimately in most cases one-half of the total retirement benefit. The Law compels each permanent employee of the State or Metropolitan District Commission to save systematically for retirement purposes, and when he retires the State rewards his thrift by creating a fund equal to the sum he has provided for himself, thereby increasing his account 100% and dividing the cost of retirement benefit equally between the State and the employee, with the exception that the State pays in addition the cost of administration expenses. The system is contractual and the employee has the right to retire but he also may be retired with the approval of the Board of Retirement upon the request of the head of the department in which he is employed.

Assessments-Every member of the Retirement Association is required to pay 5% of the salary he receives up to \$50.00 per week, but in no case shall the annual maximum assessment exceed \$130.00 per year. The assessments plus interest represent the compulsory savings account to the credit of each member. In case of death or resignation before retirement, the total contributions plus interest are refunded to the employee, his estate or beneficiary

as the case may be.

REQUIREMENTS FOR RETIREMENT

Any time between ages 60 and 70 with 15 or more years' service. 1.

2. Any age with 35 years' service.

3. Compulsory retirement—Group 1, age 65; Group 2, age 70.

4. Any time after 20 years' service if under age 60 for ordinary permanent disability.

5. Any time after membership in retirement association for permanent disability resulting from an injury received in an accident while in the dis-

charge of duty or a hazard connected with such duty.

Group 1.—Members of the police force of the metropolitan district commission; employees of the department of correction, regardless of any official classification, whose regular duties require them to have the care and custody of prisoners including insane persons and defective delinquents at the State Farm; and conservation officers paid as such, district fire wardens and coastal wardens in the department of conservation.

Group 2.—Officials and all other employees not included in Group 1.

DEATH BENEFIT

If an accidental injury received by a member in the discharge of his duty results in his death, his widow will receive during her widowhood a pension of one-half the member's rate of salary at the time of the injury, or, if there is no widow the amount is paid for the benefit of a child or children under eighteen years of age; or if no widow or child survive then to the dependent father or mother until remarriage of either.

ANNUAL RETIREMENT ALLOWANCE

Each retired member receives an annual income called Retirement Allowance which is guaranteed for life without change. The Retirement Allowance consists of Two Parts:—Annuity and Pension. ANNUITY—The annuity is purchased on the basis of regular life insurance tables by the amount which the retiring member has to his credit in the annuity fund. A member has a choice At the time of Retirement of taking (a) life annuity or (b) cash refund annuity, and he must then choose the one best suited to his particular case. If the annuitant lives to receive annuity payments equal to the purchase price the income will continue throughout the life time of the annuitant irrespective of how long he may live thereafter.

(a) Life Annuity. This form of annuity gives the largest life income provided by the law. It is paid for life and all payments

cease upon death.

(b) Cash Refund Annuity. The annuity payments under this form are payable for life and if the member dies before the sum of the annuity payments which he has received equals the amount of his account used to purchase the annuity at the date of his retirement the difference will be paid in one sum to his estate or his beneficiary as the case may be. The annuity payments under this form are less than under option (a).

TABLE 6

The Retirement Association was organized June 1, 1912 and the Annuities cover only the period of rvice during which the Employee was a contributing member since said date.

*The Average Retirement allowance is the sum of the average annuity Table 6, and the average pension

Table 7.

PENSION

The Pension is a definite amount guranateed for life without change in amount. It is paid from State appropriations and is equal to the annuity under option (a) to which the member was entitled from his own account. In order to make this annual payment, the State must create a fund as large as the member provides for himself. The employee and the State will each provide one-half of the Retirement Allowance Benefit. The pension is not reduced if the member chooses the option (b) annuity.

SUMMARY

To arrive at the cost or amount of retirement benefits, the figures quoted in table 6 must be combined with the figures quoted in table 7.
